## **1 Background Information**

### **1.1 Introduction**

In this section of the report a brief description of the regional profile is presented with specific focus on geographical location, land area, climate, administrative set up, population and socio-economic indicators. This is to enable the reader with a general understanding of the region and its resources.

### **1.2 Geographical Location and Boundaries**

Tanga region is situated at the North-East corner of Tanzania between 4° and 6° degrees below the Equator and 37° -39°10' degrees East of the Greenwich Meridian. It (Tanga) shares borders with Kenya to the North, Morogoro and Coast regions to the South, Kilimanjaro and Arusha regions to the West and the Indian Ocean to the East.

The region comprises of eight districts. These are Lushoto, Korogwe, Muheza, Tanga, Pangani, Handeni, Kilindi, and Mkinga. The region headquarters is located in Tanga District.

### **1.3 Land Area**

The region has a total area of 27,342km<sup>2</sup>, of which 572km<sup>2</sup> are Covered by water.

### **1.4 Climate**

#### **1.4.1 Temperature**

The dominant climate is warm and wet along the coast and inland of Tanga region. The average annual temperature vary between 24C<sup>0</sup> to 32C<sup>0</sup> in lowlands. The Region experiences moderate temperature of around 24C<sup>0</sup> almost throughout the year.

#### **1.4.2 Rainfall**

The region has two main rainy seasons - the short and the long rainy seasons. The short rainy season (Vuli) is from October to November and the long rainy season (Masika) is from April to May.

In Tanga region, rainfall in Tanga varies from 96.0 to 648.0 (mm/month). The coastal plains in Tanga, Pangani and part of Muheza district there is a moderate annual rainfall of 800 – 400mm while the dry plains mostly in Handeni, Kilindi and Korogwe districts receive low rainfall ranging 200 to 600mm annually. However, the average annual rainfall varies from year to year and between ecological zones.

### **1.5 Population**

According to the 2002 Population and Housing Census, Tanga had a total of 1,642,015 inhabitants and it ranked 10<sup>th</sup> in population out of the 21 regions of Tanzania.

### **1.6 Socio-Economic Indicators**

The regional Gross Domestic Product (GDP) at current prices for the year 2006 was estimated to be TShs. 475,835 million with a per capita income of shillings 236,115. The region ranked 10<sup>th</sup> among regions on GDP and contributed about 4.3% to the national GDP.

Tanga region is famous for limestone and gypsum mineral deposits, all of which are used in the cement factory situated in the region.

It has many tourist attractions such as the Mkomazi Game Reserve, Amboni Caves, Totten Islands, Tongoni Ruins, Pangani Beach and Hot Water Baths in Amboni and Amani Nature Reserve and has first class hotels (including Mkonge Hotel and Baobab Tree Inn) with conference facilities.

Besides, the region is famous for producing both food and cash crops. The main food crops produced in Tanga region include: maize, paddy, beans and sorghum. On the other hand, the main cash crops include sisal and tea. Livestock keeping is an equally important economic activity in the region.

## PREFACE

At the end of the 2007/08 Agricultural Year, the National Bureau of Statistics (NBS) in collaboration with the Ministries of Agriculture, Food Security and Cooperatives, Livestock and Fisheries Development; Water; Industry and Trade; the Prime Minister's Office, Regional Administration and Local Government (PMO/RALG) and the Office of the Chief Government Statistician, (OCGS), Ministries of Agriculture and Natural Resources; Livestock and Fisheries conducted the Agricultural Sample Census. This is the fourth Agricultural Census to be carried out in Tanzania, the first one was conducted in 1971/72, the second in 1993/94 and 1994/95 (during 1993/94 data on household characteristics and livestock count were collected and data on crop area and production in 1994/95), and the third was conducted in 2002/03.

The census collected detailed data on crop production, crop marketing, crop storage, livestock production, fish farming, and poverty indicators. In addition to this, the census was large in its scope and coverage as it provides data that can be disaggregated at district level and thus, allow comparisons with the 2002/03 National Sample Census of Agriculture. The census covered smallholders in rural areas only and large scale farms. This report presents data disaggregated at regional and district level and it focuses on small holders crop production and livestock keeping.

The extensive nature of the census in relation to its scope and coverage is a result of the increasing demand for more detailed information to assist in the proper planning of the agricultural sector and in the administrative decentralization of planning to district level. It is hoped that this report will provide new insights for planners, policy makers, researchers and others involved in the agricultural sector in order to improve the prevailing conditions faced by agricultural households in the country.

On behalf of the Government of Tanzania, I wish to express my appreciation for the financial support provided by the development partners, in particular, the Department for International Development (DFID) and the Japanese Government through the Japan International Cooperation Agency (JICA) and others who contributed through the pooled fund mechanism.

My appreciation also goes to all those who in one-way or the other have contributed to the success of the census. In particular, I would also like to mention the enormous effort made by the Planning Group composed of professionals from the Agriculture Statistics Department of the National

Bureau of Statistics, Ministry of Agriculture, Food Security and Cooperatives, Ministry of Livestock Development and Fisheries, Ministry of Water and Irrigation, Ministry of Agriculture, Livestock and Environment, Zanzibar, the Prime Minister's Office, Regional Administration and Local Government, Ministry of Industries, Trade and Marketing and the Office of the Chief Government Statistician, Zanzibar, the Food and Agriculture Organization of the United Nations and the Censuses and Surveys Technical Working Group (CSTWG).

Finally, I would like to extend my sincere gratitude to all the professionals, the consultants, Regional and District Supervisors and field enumerators for their commendable work. Certainly without their dedication, the census would not have been successful.

Dr. Albina A. Chuwa

Director General

National Bureau of Statistics

---

## EXECUTIVE SUMMARY

### Household Characteristics

There census for Tanga region covered a total of 330,779 agricultural households. Of these households majority 64.6% (213,940) were engaged in crop production only as the major agricultural activity compared to households engaged in mixed crop and livestock production (113,476 households, 34.3%), livestock only (3,131 households, 0.95%) and pastoralists (233 households, 0.1%).

Out of a total of 330,779 households, 76% (249,885) were male-headed while 24% (80,893) were female-headed. The data show that very few households were headed by female in all districts in the region.

Out of a total of 1,615,866 household members, female household members accounted for 51% (824,679) while male household members were only 49% (791,188). The highest percent (56%) of male household members was in two age categories, namely 55-59 and 75-79 years. On the other hand, the lowest percent (39%) of male household members was in the age category of 25-29 years. Regarding female household members, the highest and lowest percentage of them were in the age category of 25-29 years and 75-79 years respectively.

Tanga region had a literacy rate of 75% (1,053,084) while illiteracy rate (those who could not read and write) was 25% (351,729). Also, 69.6% (978,415) were literate in Kiswahili, 73,858 (5.3%) were literate in both Kiswahili and English, and only 0.1% (810) were literate in other languages. Districts which recorded a literacy rate above the regional average were Muheza (81.6%), Tanga (80.5%), Pangani (79.6%), Lushoto (78.4%), and Korogwe (77%) while Kilindi recorded 62.1% which is the lowest literacy rate in the region (37.9%) while the lowest illiteracy level was recorded in Muheza (18.4%). Furthermore, Tanga District recorded the highest literacy rate in Kiswahili (74.8%), while the lowest literacy rate was recorded in Kilindi (59.2%). However, when literacy rate was measured in reference to both Kiswahili and English, Muheza had the highest percent of literacy rate (7.1%) while Kilindi District had the lowest percent of literacy (2.9%).

## **Crop Production**

### **Land Area**

The total area available to smallholders was 610,519 ha. The area average land utilized for crop production per household growing crops was 2.1 ha.

### **Planted Area**

The total area planted with annual crops and vegetables was 436,725 ha. Out of this area Lushoto had the largest planted area (96,426 ha) followed by Handeni (96,339 ha) while Tanga recorded the smallest planted area (9,251 ha). Other districts had the following figures in ha: Kilindi ( 79, 064 ha), Korogwe (69,812 ha), Muheza (55, 037 ha), Mkinga (17, 288 ha), and Pangani (12,703 ha). Besides, out of the total planted area, 41% was planted during the short rainy season for the region with Lushoto accounting for the highest percent (71%) followed by Mkinga (64%). In other districts the percent of area planted during the short rainy season ranged from 19% to 41%. In fact, Korogwe recorded the lowest percent area planted during the short rainy season.

### **Maize**

Maize was grown in all districts in Tanga region. In all, a total of 315,882 ha were planted with maize. Handeni had the largest area planted with maize (79,794 ha) followed by Kilindi (55,896 ha), and Korogwe (54,273 ha). Other districts each had less than 50,000 ha planted with maize and Tanga District had the smallest area planted with maize (7,896 ha). However, Kilindi had the largest area per maize growing households (1.33 ha) followed by Handeni (1.18). In contrast, Lushoto had the smallest area per maize growing households (0.46 ha).

### **Paddy**

Except for Lushoto paddy was grown in all districts in Tanga region with Korogwe recording the largest area planted with paddy (4,162 ha) followed by Muheza (689 ha). Other districts had much smaller areas planted with paddy. Area planted per paddy growing household varied from 0.3 ha to 0.7 ha. Also, the average area planted per paddy growing household was 0.4 ha in the region.

---

**Cassava**

Kilindi recorded the largest area planted with cassava (102 ha) followed by Lushoto (89 ha), and Pangani (30 ha). Kilindi had the largest planted area per cassava growing households (0.61 ha) followed Pangani (0.40 ha), and Lushoto (0.19 ha).

**Permanent Crops**

A total of 252,534 households were growing perennial crops in an area of 180,570 ha. The largest number of households grew banana (41,464) followed by orange (31,771), coconut (28,085), cashewnut (17,577) and mango (16,851) while other permanent crops were grown by between 2,000 and 7,000 households. In terms of percent, the highest percent of the area was planted with other crops (32.9%) followed by oranges (19.7%), cashewnut (17.9 %), coconut (11.4%), and banana (6.32%). Other permanent crops were planted in percentages ranging from 0.4% (to 4.0 %). Regarding yield, the first three crops that registered the highest yield were sugar cane (10.9 ton/ha) followed by tea (5.9 ton/ha), and mango (5.0 ton/ha). In contrast, coconut recorded the lowest yield (0.5 ton/ha).

**Use of Fertilizers**

Generally, there was limited use of fertilizer in crop production. In fact, none of it was used in Handeni. In other districts planted area without fertilizer application ranged from as high as 99.9% to as low as 99.2%, indicating that Lushoto district had the highest percent of area planted with fertilizer.

**Irrigation**

Tanga region had a total area of 33,553 ha planted with annual crops under irrigation indicating a decrease of 7,536 ha compared to 41,089 ha recorded in 2002/03 Agricultural census. For the 2007/08 agricultural year the irrigated area during the short rainy season was 14,138 ha, which accounted for 42 percent while during the long rainy season the area planted under irrigation was 19,514 ha accounting for 58 percent. The main source of irrigation water was river.

**Crop Storage**

A total of 286,663 agricultural households stored crops. Lushoto had the highest percent (28%) of households, which stored their crops followed by Korogwe (17%), Muheza and Handeni (16%)

each, Kilindi (11%), Pangani and Mkinga (4%) each while Tanga had the lowest percent of households, which reported storing crops (3%).

### **Crop Marketing**

A total of 311,860 households out of 330,779 accounting for 94% of all households sold their crops. However, there is great variation across districts in terms of number and percent of households that sold their crops. Lushoto was among the first three districts with the largest number of households, which sold crops. It had 108,942 (32%) households, followed by Korogwe and Handeni 48,632 (14%). On the other hand, Pangani 9,732 (3%) had the smallest number of households that sold crops.

### **Agricultural Credit**

The major sources of agricultural credit were bank (32.9%) and savings and credit societies (32.2%). Other sources of minor importance were NGO/Development project (10.6%), private individuals (9.3%), and family/friend/relative (5.6%). Generally, the importance of credit sources varied greatly across districts. For example, commercial banks were the sole source of credit in Pangani while family/friends were only used as sources of credit in Kilindi.

### **Crop Extension**

Out of a total 327,415 of crop growing households, 227,375 (69%) reported receiving extension advice while 100,040 (31%) did not. Clearly, crop growing households in some districts had more access to extension advice than others. Specifically, Lushoto had the highest percent households with access to extension advice (83%). Other districts with almost two thirds of households reporting access to extension service were Korogwe (71%), Muheza (71%), Tanga (67%), Pangani (67%), and Kilindi (66%). Mkinga District had the lowest recorded percent (50%) of households with access to extension followed by Handeni (53%).

### **Use of Improved Seeds**

A total of 56,900 households in the region used improved seeds. The first three leading districts based on the number of households, which used improved seeds were Lushoto (19,047) followed by Korogwe (14,049), and Muheza (6,808). On the other hand, Mkinga had the smallest number of households using improved seeds (2,565). However, in terms of percent of area planted using

improved seeds, Tanga had the highest percent (23%) closely followed by Pangani (20%), and Korogwe (17%). The other remaining districts had less than 11% of households using improved seeds with Kilindi having the lowest percent (4%).

### **Erosion Control Facilities**

A total of 27,417 (8%) had erosion control/water harvesting facilities on their farms while 303,362 (92%) did not. On the other hand, distribution of districts by erosion control/water harvesting facilities shows that Lushoto had the largest number and percent of households (21,138, 22%) with these facilities. Generally, other districts recorded low percentages of households with erosion control facilities ranging from 1% (Tanga, Pangani, and Handeni) to 6% (Muheza).

## **Livestock and Poultry Production**

### **Cattle**

A total of 732,130 cattle were kept in the region and were divided in 74,670 households. Most of these households (62,306) kept indigenous cattle (688,114), which accounted for 94% of the total cattle population. In addition, 1,222 households kept 2,377 improved beef, which accounted for only 0.3% of the cattle while 16,728 households were raising a total of 41,639 dairy cattle, which comprised 6% of the cattle population.

### **Goats**

There were 84350 households involved in keeping 718,625 goats. Indigenous breeds dominates goat husbandry in the region as they constituted 98.2% of the goat population while dairy goats constituted only 1.8%.

### **Sheep**

There was a total of 216,983 sheep in Tanga region majority (56.5%) of which were she sheep. Indigenous sheep production was carried out in all districts in the region. However, distribution varied greatly across districts. Kilindi (66,528, 30.7%), Lushoto (66,201, 30.5%), Mkinga (27,153, 12.5%), and Korogwe (26,131, 12%) were the first four districts with the largest population of sheep. The population in other districts ranged from 7,029 (Handeni) to 9,078 (Muheza).

**Pigs**

Tanga region had a total of 17,155 pigs, which were distributed by category as follows: boar (3,669), castrated male (316), sow/gilt (7,587), male piglet (1,578), and she piglet (4,004) indicating greater preference for sow/gilt.

**Chickens**

The total number of households that kept chicken was 211,636 of which 211,460 households kept a total of 2,092,981 indigenous chickens while 408 households raised 3,223 layers and the remaining 430 households raised a total of 3,378 broilers. Muheza had the largest population of chickens (471,123) followed by Handeni (384,382), Lushoto (336,116), Kilindi (238,007), and Korogwe (200,477). Other districts each had less than 200,000 chickens.

**Fish Farming**

Fish farming was not practised in most districts in Tanga region except in Muheza. A total of 41,779 agriculture households (825, 2%) practised fish farming using dug out pond system.

**Poverty Indicators****Types of Toilets**

Out of a total of 330779 households, 275,691 (83%) used traditional pit latrines to dispose off human waste while 31,316 (9. %) reported not having toilets and instead disposed of human waste in the bush. Of those households, 7% (19,269) and 1% (4,503) used improved pit latrines and flush toilets respectively.

**Roofing Materials**

Grass/leaves were used as roofing material by a total of 131,908 households in Tanga region. The largest number of these were found in Handeni (34,885), Korogwe came a distant second (18,545) closely followed by Mkinga (16,392), Kilindi (14,094), Lushoto (11,150), and Tanga (10,872). On the other hand, Pangani had the smallest number of households using grass/leaves as roofing materials (9,878). However, Pangani district had the highest percent of households with grass/leaves roofing (75%) followed by Mkinga (73%), Tanga (70%), Handeni (66%), Kilindi (41%), Muheza (39%), Korogwe (33%) while Lushoto had the lowest percent (12%)

**Main Source of Water in Dry Season**

Households relied on various sources of drinking water during the dry season. However, the main sources of drinking water during this season were piped water (24%) followed by unprotected wells (21%), surface water (20%), unprotected spring (17%) and protected well (10%) . Other sources of water were less significant.

**Number of Meals**

A large number of households (230,409, 69%) had eaten three meals per day. In contrast, 91,259 (28%) households had two meals per day while 9,110 (3%) ate only once. Specifically, Lushoto had the highest percent (above regional average) of 5% reporting to have eaten one meal while the rest recorded the number of meals below the regional average of households who had eaten one meal. Similarly, Mkinga had the highest percent (43%) of households who had had two meals followed by Tanga (39%), Lushoto (32%), Pangani (31%), and Kilindi (28%) while other districts had a lower percent than the regional average (28%). Only four out of 8 districts had households above the regional average (70%) who had three meals. These are Handeni (79%), Muheza (78%), Korogwe (76%), and Kilindi (71%).

**Food Security**

Lushoto had the highest percent of households that experienced food insecurity (23%) followed by Korogwe (13%), Handeni (12%), Muheza (9%), Kilindi (6%), Mkinga (5%), Tanga (4%) and Pangani (3%).

## **2.0 INTRODUCTION**

This section provides technical and operational description of the National Sample Census of Agriculture (NSCA), carried out in the rural areas of Tanzania Mainland and Tanzania Zanzibar during the 2007/08 agricultural year. It details the background and the rationale for carrying out the NSCA in 2002/03 agricultural year. It also explains the sampling procedures, designing and implementation of the data processing system.

This report (Volume Vn) is among the 21 regional reports for the Mainland. Other Census reports include the Technical Report (Volume I), Crop Sector Report at National level (Volume II), Livestock Report at National level (Volume III), Large Scale Farms Report (Volume IV), Regional Reports (Volume Vi series), Zanzibar Livestock Report (Volume VI) and Zanzibar Crop Sector Report (Volume VII). Unlike the 2002/03 Agricultural Sample Census, the 2007/08 Sample Census does not have a separate report for Smallholder Household Characteristics and Access to Natural Resources Report. Other thematic reports will be produced depending on the demand and availability of funds.

This report is divided into five main sections; Background Information, Introduction, Census Results, District Profiles and Appendices. The definitions relating to all aspects of this report can be found in the questionnaire.

### **2.1 The Rationale for Conducting the National Sample Census of Agriculture**

The Government of Tanzania has embarked on various plans geared to eradicate poverty by the year 2025 and Tanzania Zanzibar by the year 2020. In order to facilitate intervention and monitoring activities of the Poverty Monitoring Master Plan, the government has planned a series of censuses and surveys to assist in policy formulation, planning and to track changes in the wellbeing of the population of Tanzania. In this Master Plan, a series of Agricultural Censuses have been planned, the first one was undertaken in 2002/03 agricultural year and the second in 2007/08.

Demands for reliable and timely agricultural data have become significantly increasing for monitoring outcomes and progress of the poverty monitoring tools like the Agricultural Sector Development Programme (ASDP) and performance of the respective MDAs (ASLMs).

Following the decentralization of the Government's administration and planning functions, there has been a pressing need for agricultural and rural development data disaggregated at regional and district level. The provision of district level estimates will provide essential baseline information on the state of agriculture that supports decision making by the Local Government Authorities and in the design of District Agricultural Development and Investment Projects (DADIPS). The increase in investment is an essential element in the national strategy for growth and reduction of poverty.

## **2.2 Census Objectives**

The 2007/08 Agricultural Sample Census was designed to meet the data needs of a wide range of users down to the district level including policy makers at local, regional and national levels, rural development agencies, funding institutions, researchers, NGOs, farmers organizations, and the like. The dataset is both extensive in its sample and detailed in its scope and coverage to meet the user demand.

The census was carried out in order to:

- Identify structural changes, in the size of farm household holdings, crop and livestock production, farm inputs and implement use. It also seeks to determine if there are any improvements in the rural infrastructures and the level of agricultural household living conditions.
- Provide benchmark data on productivity, production and agricultural practices in relation to policies and interventions promoted by the Ministry of Agriculture and Food Security and other stakeholders.
- Establish baseline data for the measurement of the impact of high level objectives of the Agricultural Sector Development Programme (ASDP), National Strategy for Growth and Reduction of Poverty and other rural development programmes and projects.

### **2.2.1 Census Scope and Coverage.**

The 2007/08 Agricultural Sample Census was conducted for both large and small scale farms. The data was collected from a sample of 52,635 small scale agricultural households of which 48,880 were from the Mainland and 4,755 from Zanzibar. To meet National estimates, data was also

collected from 1,006 Large Scale Farms (968 on the Mainland and 38 in Zanzibar) on a complete enumeration basis.

Three different questionnaires were used to collect data on agriculture and related aspects. These were:

- Small scale farms questionnaire;
- Community questionnaire; and
- Large scale farm questionnaire.

The small scale farm questionnaire was the main census instrument which included questions related to crop and livestock production and practices; population demographics; access to services; resources and infrastructure; issues on poverty and gender. Main subjects covered during the study include:-

- Household demographics and activities of the household members;
- Land access/ownership/tenure and use;
- Crop and livestock production and productivity;
- Access to inputs and farming implements;
- Access and use of credits;
- Crop marketing, storage;
- Fish farming;
- Investment activities: Irrigation structures, water harvesting, erosion control;
- Off farm income;
- Household living conditions (housing, sanitary facilities, etc);
- Livelihood constraints; and
- Poverty Indicators.

The community level questionnaire was designed to collect village data such as access and use of common resources, community tree plantation and seasonal farm gate prices.

Large Scale Farm questionnaire was administered to all the large scale farms either privately or corporately managed. However, the analysis of Large Scale Farms is presented in a separate report (Volume IV).

## 2.3 Census Methodology

The main focus at all stages of the census execution was on data quality and this has been emphasized all the time. The main activities undertaken include:

- Census organization;
- Tabulation plan preparation;
- Sample design;
- Design of census questionnaire and other instruments;
- Pilot test;
- Training of trainers, supervisors and enumerators;
- Information Education and Communication (IEC) campaign;
- Data collection;
- Field supervision and consistency checks;
- Data processing:
  - Scanning,
  - Structure formatting application,
  - Batch validation application,
  - Manual data entry application,
  - Tabulation preparation using SPSS;
- Table formatting and charts using Excel, maps generation using Arc GIS and Excel, Report preparation using Ms Word and Excel.

### 2.3.1 Census Organization

The census was conducted by the National Bureau of Statistics (NBS) in collaboration with Ministries of Agriculture, Food Security and Cooperatives, Livestock and Fisheries Development; Water; Industry and Trade; and the Prime Minister's Office, Regional Administration and Local Government in Tanzania Mainland. The Office of the Chief Government Statistician, (OCGS), Ministries of Agriculture and Natural Resources, Livestock and Fisheries in Tanzania Zanzibar.

At the national level, the Census was headed by the Director General of the National Bureau of Statistics, Tanzania Mainland in collaboration with the Chief Government Statistician, Tanzania Zanzibar. The planning Group formed by the Director General of NBS and the Chief Government Statistician consisted of staff from the Department of Agriculture Statistics of NBS, Department of Economic Statistics of OCGS, Department of Policy and Planning of the Ministry of Agriculture,

Food Security and Cooperatives, Department of Policy and Planning of the Ministry of Livestock and Fisheries Development in the Mainland. Ministry of Livestock and Fisheries and the Ministry of Agriculture and Natural Resources in Zanzibar.

The Planning Group was responsible for all the census operations. Implementation of the census activities at the regional level was overseen by the Regional Statistical Managers of NBS and the Regional Agricultural Supervisors from the Prime Minister's Office, Regional Administration and Local Government. At the district level, the census activities were managed by two supervisors from the Prime Minister's Office, Regional Administration and Local Government (PMO-RALG). The supervisors managed the enumerators who also came from PMO-RALG. As for Zanzibar, implementation of the census activities at the regional level was overseen by the Regional Statistical Officers and Regional Agricultural Officers. At District level, implementation of the census activities were managed by District Agricultural Development Officers (DADOs). In addition, there was a national mobile team to supervise the census operations.

The Censuses and Surveys Technical Working Group (CSTWG) under MKUKUTA provided support in sourcing financing, approving budget allocation and monitoring progress of the census. A Technical committee for the census was established with members from key stakeholder organizations and its main function was to approve the proposed instruments and procedures developed by the Planning Group. It also approved the tabulation and analytical reports prepared from the census data.

### **2.3.2 Tabulation Plan Preparation**

The tabulation plan was developed considering the tabulations from previous censuses and surveys to allow trend analysis and comparisons as well as the needs of end users.

### **2.3.3 Sample Design**

The Mainland sample consisted of 3,192 villages. These villages were drawn from the National Master Sample (NMS) developed by the National Bureau of Statistics (NBS) to serve as national framework for the conduct of household based surveys in the country. The National Master Sample was developed from the 2002 Population and Housing Census. The total Mainland sample was 47,880 agricultural households. In Zanzibar, a total of 317 Enumeration Areas (EAs) were selected

and 4,755 agricultural households were covered. National wide, all regions and districts were sampled except four urban districts (three from Mainland and one from Zanzibar).

In both Mainland and Zanzibar, a two stage sample was used. The number of villages/Enumeration Areas (EAs) was selected for the first stage with a probability proportional to the number of villages/EAs in each district. In the second stage, 15 households were selected from a list of households in each village/EA using systematic random sampling. Table 1.1 gives the sample size of households, villages and districts for the Mainland and Zanzibar.

**Table 2.1: Census Sample**

Description	Mainland	Zanzibar	Total
Households	47,880	4,755	52,635
Villages/EAs	3,192	317	3,509
Districts	133	9	142
Regions	21	5	26

### 2.3.4 Questionnaire Design and Other Census Instruments

The questionnaire was designed following users meetings to ensure that the questions asked were

in line with the users data needs. Several features were incorporated into the design of the questionnaire to increase the accuracy of the data as follows:

- Where feasible, all variables were extensively coded to reduce post enumeration coding errors;
- The definitions for each section were printed on the opposite page so that the enumerator could easily refer to the instructions whilst interviewing the respondent;
- The responses to all the questions were placed in boxes printed on the questionnaire, with one box per character. This feature made it possible to use scanning and Intelligent Character Recognition (ICR) technologies for data capture;
- Skip patterns were used to reduce unnecessary and incorrect coding of sections which do not apply to the respondent; and
- Each section was clearly numbered, which facilitated the use of skip patterns and provide a reference for data type coding for the programming of CSPro and SPSS.

Three other instruments were used:

- Village Listing Forms were used for the listing of households in the village/EA and from this list, a systematic sample of 15 agricultural households were selected;
- A training manual which was used by the trainer for the cascade/pyramid training of supervisors and enumerators; and
- Enumerator's Instructions Manual was used as reference material.

### **2.3.5 Field Pilot-Testing of the Census Instruments**

The questionnaire was pilot-tested in four locations (Arusha, Dodoma, Unguja and Pemba). This was done to check the wording, flow and relevance of the questions and to finalize crop lists, questionnaire coding and manuals. In addition, several data collection methodologies had to be finalized, namely; livestock numbers in pastoral communities, mixed cropping, use of percentages in the questionnaire and finalizing skip patterns and documenting consistency checks.

### **2.3.6 Training of Trainers, Supervisors and Enumerators**

During the training, a cascade/pyramid training techniques were employed to maintain statistical standards. The top level of training was provided to 78 national and regional supervisors (65 from Mainland and 13 from Zanzibar). The trainers were members of the Planning Group from the National Bureau of Statistics, the sector Ministries of Agriculture and Office of the Chief Government Statistician, Zanzibar. In each region, three training sessions were conducted for the district supervisors and enumerators. The training concentrated on questionnaires, listing forms, field level census methodology and definitions. Emphasis was placed on consistency checking in the field. Tests were given to the enumerators and supervisors and the best 50 percent of the trainees were selected for the actual field work. The remaining 50% were assigned the work of listing the households in the villages they belong and they were later terminated. The best trained enumerators were assigned to list the remaining villages. Each enumerator was assigned to enumerate two villages.

### **2.3.7 Information, Education and Communication (IEC) Campaign**

Radios, televisions, newspapers, leaflets, t-shirts and caps were used to create awareness of the Agricultural Sample Census to the public. This strategy helped in sensitizing the public for the field level activities in order to increase the response rate. The t-shirts and caps were given to the field staff and the village chairpersons. The village chairpersons assisted to locate the selected households.

### **2.3.8 Data Collection**

Data collection activities for the 2007/08 Agricultural Sample Census lasted for three months from June to August 2009. The direct interview method was used to collect data during the enumeration. Data collection was monitored by a hierarchical system of supervisors which included the Mobile Response Team, Regional and District Supervisors. The Mobile Response Team headed by the Manager of Agriculture Statistics Department, provided the overall direction to the field operations and responded to queries arising outside the scope of the training exercise. Decisions made on the definitions and procedures were then communicated back to all the enumerators via the Regional and District Supervisors. On the Mainland, each region had 2 Regional Supervisors (total of 42) and 2 district supervisors per district, (Total 266).

District supervision and enumeration were performed by staff from the Prime Minister's Office, Regional Administration and Local Government and the sector Ministry of Agriculture (PMO-RALG). Regional and national supervision was provided by senior staff from the NBS and sector Ministries of Agriculture. In Zanzibar, the enumeration was conducted by staff from the Ministry of Agriculture and Natural Resources and Ministry of Livestock and Fisheries. Supervision was provided by senior officers of the same Ministries and the Office of the Chief Government Statistician.

During the household listing exercise, some 3,192 extension staff participated on the Mainland. A total of 177 enumerators participated during the listing exercise and enumeration using the small holder questionnaire in Zanzibar. A total of 1,596 enumerators were involved in data collection using the small holder questionnaire on the Mainland. Additional five percent of the enumerators were held as reserves in case of drop outs during the enumeration exercise.

### **2.3.9 Field Supervision and Consistency Checks**

Enumerators were trained to probe the respondents until they were satisfied with the responses before they recorded them in the questionnaire. The first check on the questionnaire was carried out by the enumerators in the field during enumeration, followed by District, Regional and National supervisors. Supervisory visits at all levels of supervision focused on checking the completeness of the questionnaires and consistency. Inconsistencies encountered were corrected, and where necessary, a call back to the respondent was made by the enumerator to obtain the correct information. Further quality control checks were made by the district supervisors.

### **2.3.10 Data Processing**

Data processing involved the following process:

- Data entry;
- Data structure formatting;
- Batch validation; and
- Tabulation.

#### **Data Entry**

Scanning and ICR data capture technology was used. This did not only increase the speed of data entry but also increased the accuracy due to reduction of keystroke errors. Interactive validation routines were incorporated into the ICR software to trap errors during the verification process.

Prior to scanning, all the questionnaires underwent a manual cleaning exercise by checking that the questionnaire had a full set of pages, correct identification and good hand-writing. A score was given to each questionnaire based on the legibility and the completeness of enumeration. This score was used to assess the quality of enumeration and supervision.

CSPPro was used for data entry of the questionnaires that were rejected by the ICR extraction application.

#### **Batch Validation**

A batch validation program was developed in CSPPro in order to identify inconsistencies within a questionnaire. This was in addition to the interactive validation during the ICR extraction process. The procedures varied from simple range checking within each variable to more complexes

checking between variables. After data cleaning, the tables were prepared based on a pre-designed tabulation plan.

### **Tabulation**

Statistical Package for Social Sciences (SPSS) was used to produce the census tables and Microsoft Excel was used to organize the tables and compute the additional indicators. Excel was also used to produce charts while Arc GIS was used for generating the maps.

### **Report Writing**

The report writing was outsourced to Sokoine University of Agriculture. It focused on the regional comparisons, time series and national estimates. Microsoft Excel was used to produce charts; Arc GIS and Excel were used to generate maps, whereas Microsoft Word was used in compiling and report writing.

### **Data Quality Control**

A great deal of emphasis was placed on data quality throughout the whole exercise, from planning; questionnaire design, training, supervision, data entry, validation and cleaning/editing. As a result of this, it is believed that the census is highly accurate and representative of what was experienced at the field level during the census year. With very few exceptions, the variables in the questionnaire are within the norms for Tanzania and they follow the expected time series trends when compared to historical data.

## **2.4 Funding Arrangements**

The 2007/08 Agricultural Sample Census was supported mainly by the Department for International Development (DFID) and the Japan International Cooperation Agency (JICA) which together, financed most of the operational activities. Other funds for the census activities were from the Government of Tanzania. In addition, technical assistance was provided by the Food and Agriculture Organisation (FAO).

### 3 Census Results

This part of the report presents results of the census data for Tanga region.

#### 3.1 Household Characteristics

##### 3.1.1 Type of households

A total of 330,779 agricultural households were covered in the census for Tanga region. The distribution of these households by district was as follows: Lushoto (94,075, 28%), Korogwe (56,898, 17%), Handeni (52,718, 16%), Muheza (41,779, 13%), Kilindi (33,977, 10%), Mkinga (22,581, 7%), Tanga (15,629, 5%) and Pangani (13,122, 4%). Of these (330,779) households majority 64.6% (213,940) were engaged in crop production only as the major agricultural activity compared to households engaged in mixed crop and livestock production (113,476 households, 34.3%), livestock only (3,131 households, 0.95%) and pastoralists (233 households, 0.1%) (Chart 3.1).

The first three districts with the largest number of households engaged in growing crop only were Lushoto (45,296) followed by Korogwe (40,882) and Handeni (36,317). The smallest number of households growing crop only was recorded in Pangani with 10,570 households. Districts with the largest number of households engaged in livestock only were Mkinga (725) followed by Tanga (589) and Muheza (516). Pastoralists were reported for only three districts - Korogwe, Mkinga, and Pangani.

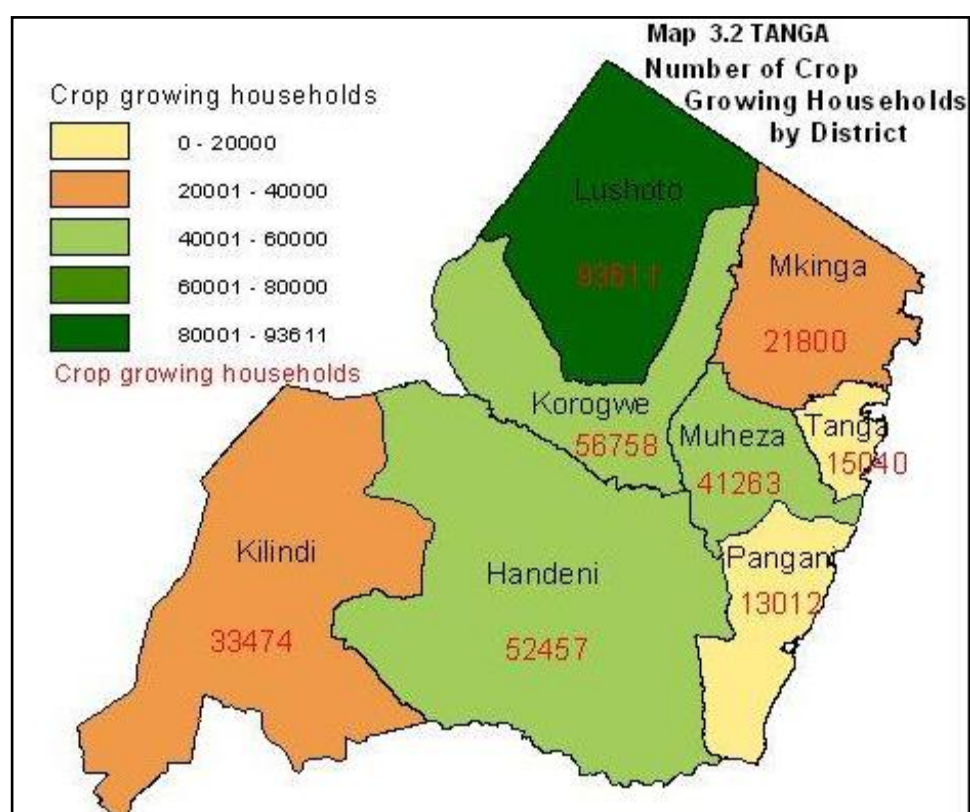

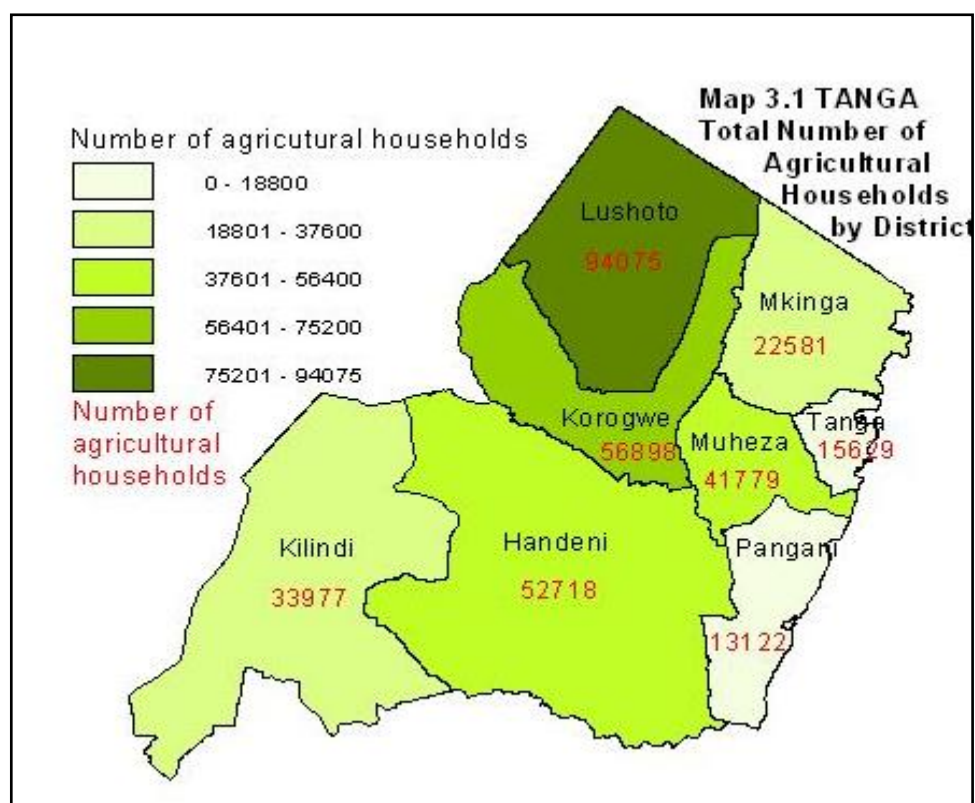

Chart 3.1: Agricultural Households by Type

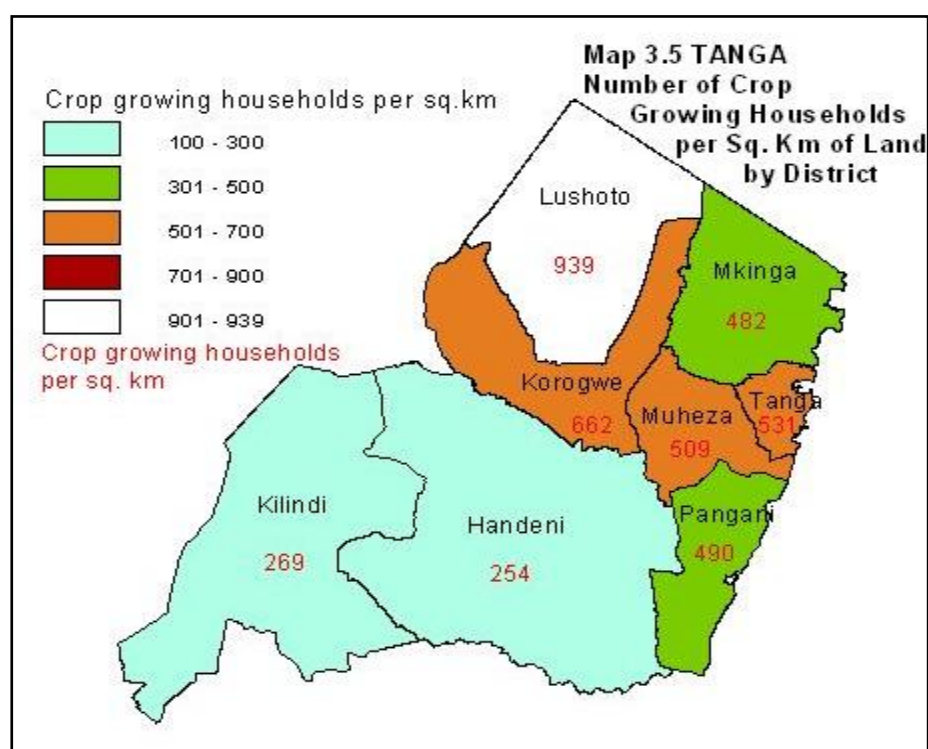

The largest number of households engaged in mixed crop and livestock production were found in Lushoto (48,315) followed by Handeni (16,141) and Korogwe (15,875). Other districts each had less than

15,000 households practicing crop and livestock production (Map 3.1).

The highest density of households per square km was recorded in Tanga district (130/km<sup>2</sup>) followed by Lushoto (69/km<sup>2</sup>). The density of households per square km in other remaining districts was less than 50/km<sup>2</sup>. In contrast, Kilindi had the lowest density of agricultural households in the region (15/km<sup>2</sup>) (Map 3.2). Besides, Lushoto had the largest number of crop growing households ((93,611) followed by Korogwe (56,758), Handeni (52,457), Muheza (41,263), and Kilindi (33,474) while Pangani had the smallest number of crop growing households 13,012 (Map 3.3). Regarding percent of crop growing households by district, Lushoto, Korogwe and Handeni recorded the highest percent (100%) indicating all households were growing crops while Tanga (96%) recorded the lowest percent of crop growing households (Map 3.4). The highest density of crop growing only households was recorded in Tanga (125/km<sup>2</sup>) followed by Lushoto (68/km<sup>2</sup>). Other districts recorded densities of less than 50/km<sup>2</sup> while Kilindi (15/km<sup>2</sup>) had the lowest density of crop growing only households (Map 3.5). Also all districts practiced both livestock and crop production (Map 3.6).

### 3.1.2 Livelihood Activities/Source of Income

Households carried out various livelihood activities (Table 3.1). In general, crop/seaweed farming provided the most important source of income (46%) followed by livestock keeping/herding. Other activities were not important sources of income. With reference to crop/seaweed farming, Lushoto District accounted for 51% of households engaged in crop farming closely followed by Kilindi (50%). Other districts registered less than 50% of households involved in crop farming.

**Table 3.1: Main Livelihood Activities**

District	Main Livelihood Activities									
	Crop/Seaweed Farming		Livestock Keeping / Herding		Livestock Pastoralist		Fishing		Fish Farming	
	Number	%	Number	%	Number	%	Number	%	Number	%
Lushoto	196,745	51	465	0	0	0	232	0	232	0
Korogwe	113,234	46	4,496	2	0	0	281	0	140	0
Muheza	77,265	45	2,166	1	103	0	413	0	0	0
Tanga	21,518	32	2,628	4	45	0	2,310	3	45	0
Pangani	18,808	36	1,349	3	73	0	1,422	3	36	0
Handeni	109,080	48	1,562	1	130	0	0	0	0	0
Kilindi	75,337	50	6,124	4	0	0	0	0	0	0
Mkinga	39,363	39	4,126	4	446	0	1,561	2	0	0
<b>Total</b>	<b>651,351</b>	<b>46</b>	<b>22,915</b>	<b>2</b>	<b>798</b>	<b>0</b>	<b>6,219</b>	<b>0</b>	<b>455</b>	<b>0</b>

### Households by Headship Type

Out of a total of 330,779 households, 76% (249,885) were male-headed while female-headed were only 24% (80,893). Specifically, majority of households in Lushoto, Korogwe, Handeni, Muheza, Kilindi and Mkinga were headed by males.

### 3.1.3 Population by Age and Sex

Out of a total of 1,615,867 household members, female household members accounted for 51% (824,679) while male household members were only 49% (791,188). The highest percentage (56%) of male household members was in two age categories, namely 55-59 and 75-79 years. On the other hand, the lowest percentage (39%) of male household members was in the age category of 25-29 years.

Regarding female household members, the lowest percentage of them were in the age categories of 55-59 and 75-79 while the highest percent was in 30-34 years age band (Chart 3.3).

### 3.1.4 Level of Education

#### Literacy

Level of literacy was determined based on one's ability to read and write Swahili, English or both and any other language. Tanga region had a literacy rate of 75% (1,053,084) while illiteracy rate (those who could not read and write) was 25% (351,729). It is also shown that 69.6% (978,415) were literate in Kiswahili, 73,858 (5.3%) were literate in both Kiswahili and English, and only 0.1% (810) were literate in other languages.

Districts which recorded a literacy rate above the regional average were Muheza (81.6%), Tanga (80.5%), Pangani (79.6%), Lushoto (78.4%), and Korogwe (77%) while Kilindi at 62.1 recorded the lowest literacy level in the region. On the other hand, the highest illiteracy level was recorded in Kilindi (37.9%) while the lowest illiteracy level was recorded in Muheza (18.4%).

Furthermore, Tanga recorded the highest literacy rate in Swahili (74.8%), while the lowest literacy rate was achieved in Kilindi (59.2%). When both Swahili and English are combined, the data show that Muheza had the highest percentage of literacy rate (7.1%) and the lowest literacy rate in this category was recorded in Kilindi (2.9%) (Table 3.2).

**Chart 3.4 Literacy Rates of Head of Household by sex and District- TANGA**

**Table 3.2 Household Demographics: Number of Household Members Who Can Read and Write languages by type of language and District**

District	Swahili		Swahili & English		Any Other Language		Don't Read / Write		Read and Write		Total
	Number	%	Number	%	Number	%	Number	%	Number	%	
Lushoto	281,994	73.0	20,441	5.3	232	0.06	83,623	21.6	302,667	78.4	386,290
Korogwe	174,768	71.2	14,189	5.8	140	0.06	56,336	23.0	189,098	77.0	245,434
Muheza	127,503	74.4	12,173	7.1	103	0.06	31,566	18.4	139,779	81.6	171,345
Tanga	50,919	74.8	3,851	5.7	0	0.00	13,273	19.5	54,770	80.5	68,044

### **3.2 Land Use**

Land area and planted area are two different types of area measurements. Land area is defined as the physical area of land and is the same regardless of the number of crops planted on the land in one year. Planted area is the total area of crops planted in a year and the area is summed if there were more than one crop on the same land per year. On the other hand, utilised land refers to the land that was used during the year.

#### **3.2.1 Area of Land Utilized**

Generally, in Tanga region utilization of land area was about 87%. In Muheza, Tanga and Lushoto land utilization was recorded as 95%, 93% and 92% respectively. These were followed by Pangani (88%), Korogwe (86%), Mkinga and Kilindi (85%) (Map 3.7).

#### **3.2.2 Types of Land Use**

The area of land under temporary monocrop was 264,887 hectares (38%) of the total land available to smallholders in Tanga, followed by area under temporary mixed crops (82,540 ha, 25%), uncultivable usable land (127,923 ha, 18%), area under fallow (66,870 ha, 10%), area under permanent mono crops (43,526 ha, 6%), permanent/annual mix (39,643 ha, 5.7%), and temporary mixed crops (30,045ha, 4.3%). Overall, other types of land use including unusable area, area rented to others, area planted with trees), area under natural bush and area under pasture ranged from 0 to 2 percent.

### **3.3 Annual Crop and Vegetable Production**

#### **3.3.1 Planted Area**

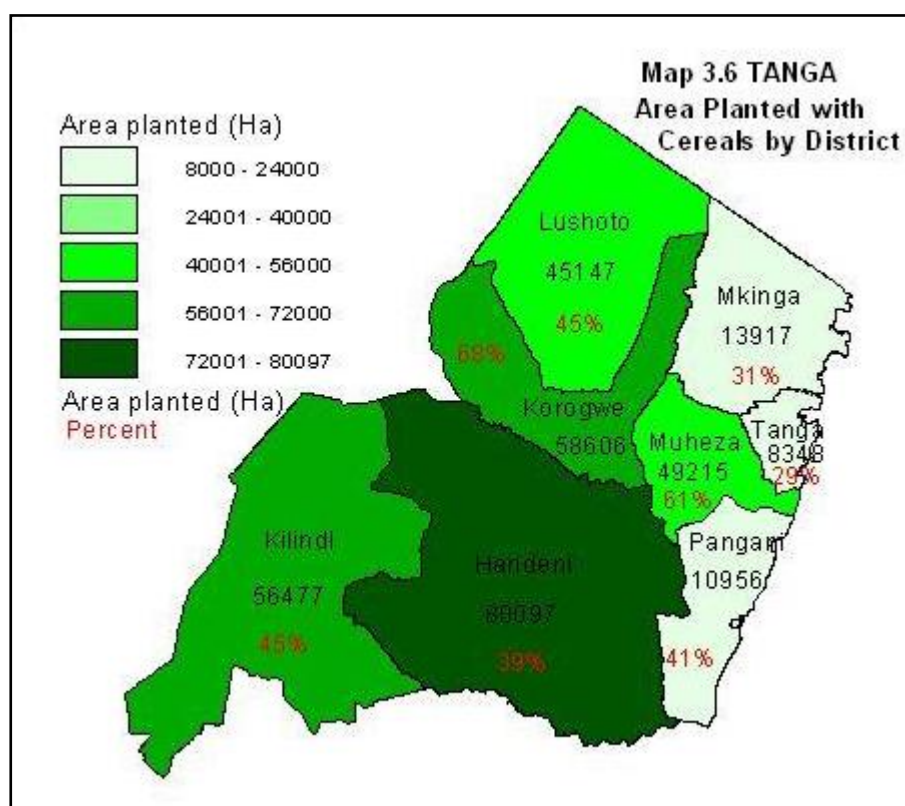

The total area planted with annual crops and vegetables was 436,725 ha. Out of this area Lushoto had the largest planted area (96,426 ha) followed by Handeni (96,339 ha) while Tanga recorded the smallest planted area (9,251 ha). Other districts recorded the following planted area: Kilindi (79,064), Korogwe (69,812), Muheza (55,842) Mkinga (17,288), Pangani (12,703) and Tanga (9,251) (Map 3.8).

Out of the total planted area, 40.88% was planted during the dry season with Lushoto accounting for the highest percent area (71%) followed by Mkinga (64%). In other districts percent area

planted during the dry season ranged from 19% to 41%. In fact, Korogwe recorded the lowest percent area planted during the dry season (Map 3.9).

### 3.3.2 Cereal Crop Production

Of the total area planted with cereals (322,763 ha), Handeni recorded the largest area (80,097 ha) followed by Korogwe (58,606 ha), and Kilindi (56,477 ha). In other remaining districts areas planted with cereals were less than 50,000 ha. Of all the districts, Tanga had the smallest area planted with cereals (8,348 ha). In terms of percent area planted with cereals, the three leading districts were Tanga (90%), Muheza (88%), Pangani (86%), Korogwe (84%), Mkinga (81), Kilindi (71%) and Lushoto (47%), indicating that Lushoto had the lowest percent area planted with cereals (Map 3.6).

### 3.3.3.1 Maize

Maize was grown in all districts in Tanga. In all, a total area of 315,882 ha was planted with maize. Handeni had the largest area planted with maize (79,794 ha) followed by Kilindi (55,896 ha), and Korogwe (54,273 ha). Other districts had less than 50,000 ha planted with maize. Also, Tanga had the smallest area planted with maize (7,896 ha). The area planted per maize growing households showed that the largest area was recorded in Kilindi (1.33 ha) followed by Handeni (1.18). On the other hand, Lushoto had the smallest area of maize per household growing area (0.46 ha).

Of all districts, the highest yield of maize (2.8 ton/ha) was recorded in Muheza followed by Tanga (1.4 ton/ha), Pangani and Kilindi with each recording 1.3 ton/ha. On the other hand, Lushoto recorded the lowest yield (0.8 ton/ha) (Map 3.11).

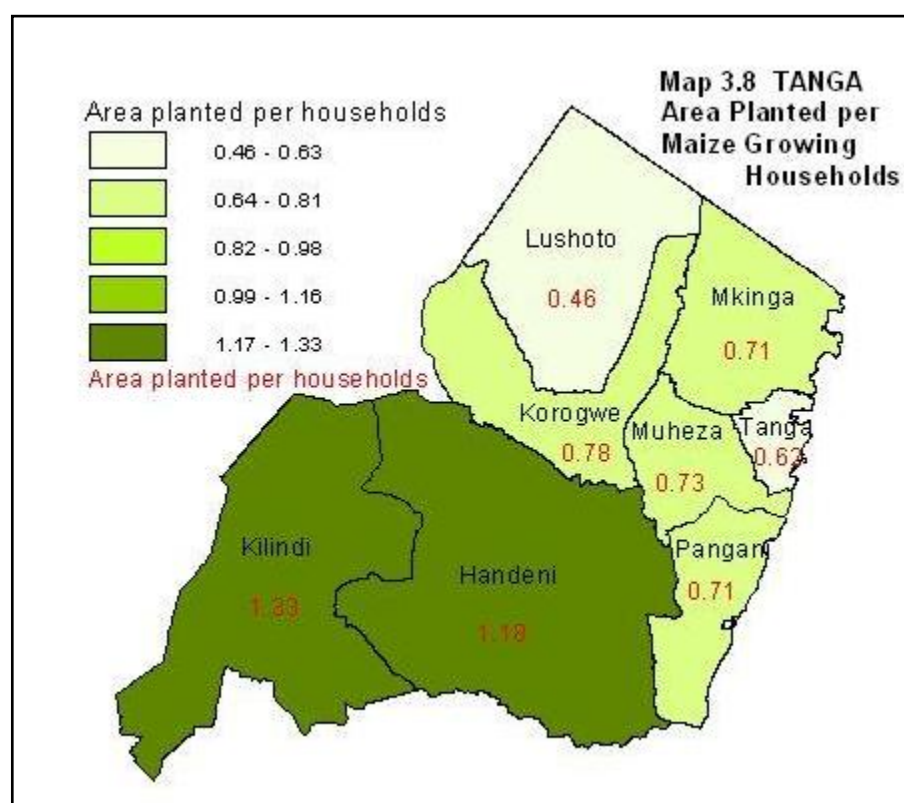

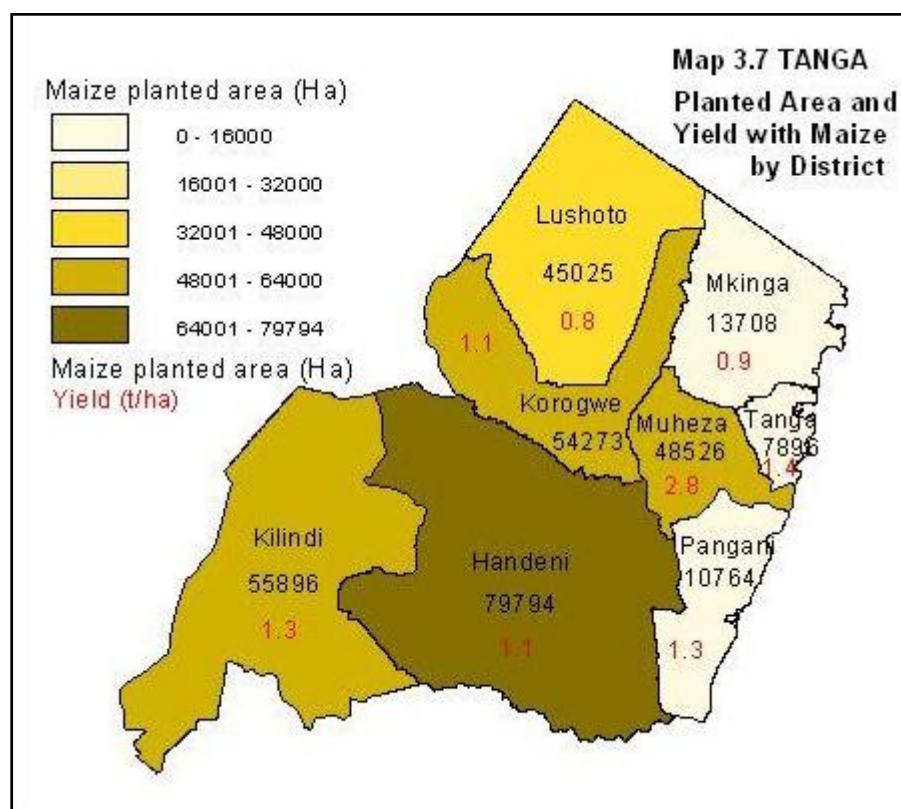

### 3.3.3.2 Paddy

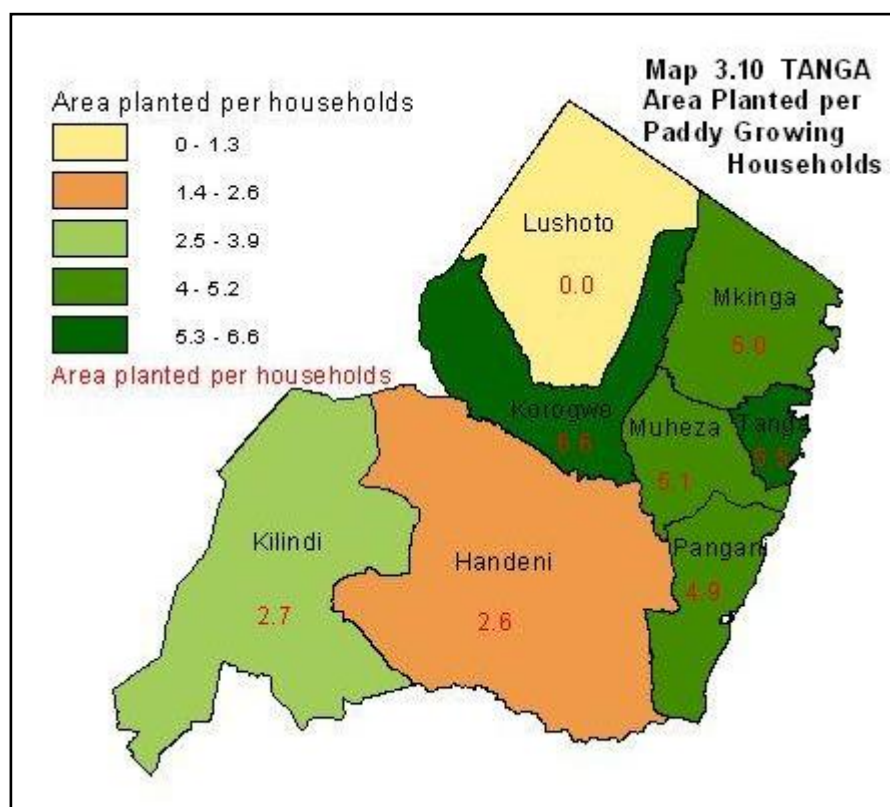

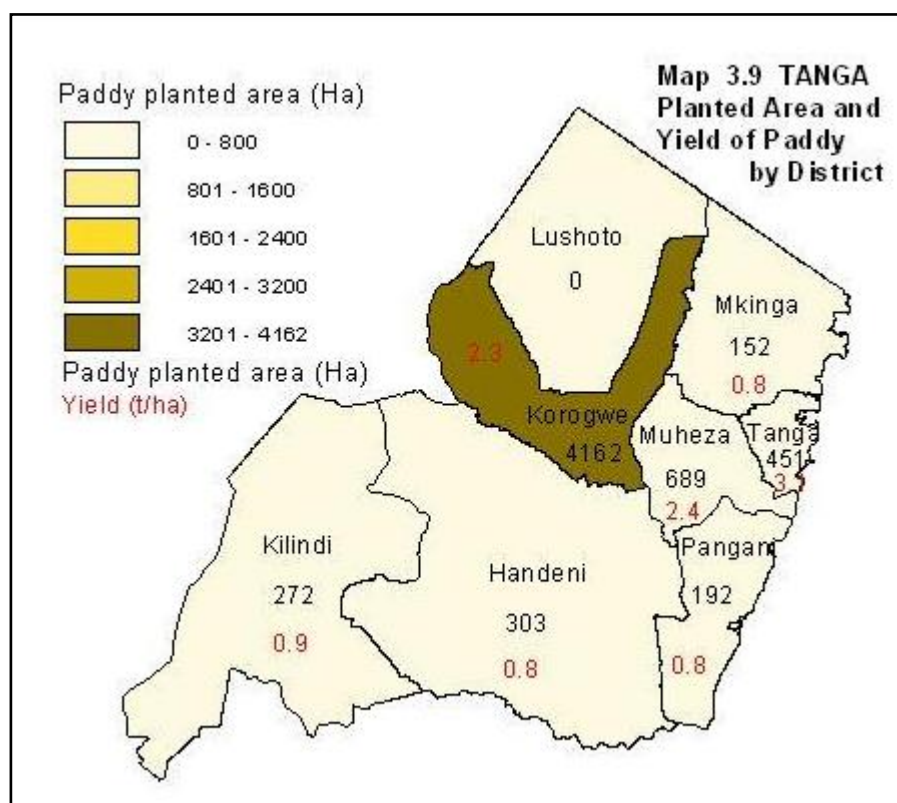

Except for Lushoto paddy was grown in all districts in Tanga region with Korogwe recording the largest area planted with paddy (4,162 ha) followed by Muheza (689 ha), Handeni (303 ha). Other districts recorded much smaller areas planted with paddy. Regarding yield the records for were as follows: Muheza (2.4 ton/ha), Korogwe (2.3 ton/ha) and in other districts yield ranged from 0.8 - 0.9 ton/ha. Area planted per paddy growing households varied across districts from as large as 6.6 ha (Korogwe) to as small as 2.6 ha (Handeni) (Map 3.12).

### 3.3.4 Cassava

Muheza recorded the largest area planted with cassava (9,035 ha) followed by Tanga (7,658 ha), Mkinga (6,259 ha), Lushoto (5,282 ha), Korogwe (3,646 ha), Pangani (2,185 ha), Handeni (1,833 ha), and Kilindi (1,056). The highest crop yield was reported for Korogwe (2.8 ton/ha) followed by Handeni (2.7 ton/ha) and Pangani (2.5 ton/ha). In other districts, yields ranged from 1.5 ton/ha to 2.0 ton/ha. The largest planted area per cassava growing households was recorded in Tanga (0.9 ha) followed by Muheza (0.7), Pangani and Mkinga (0.6 ha), Handeni and Kilindi (0.5 ha) Lushoto (0.4 ha) and Korogwe (0.3 ha) (Map 3.13).

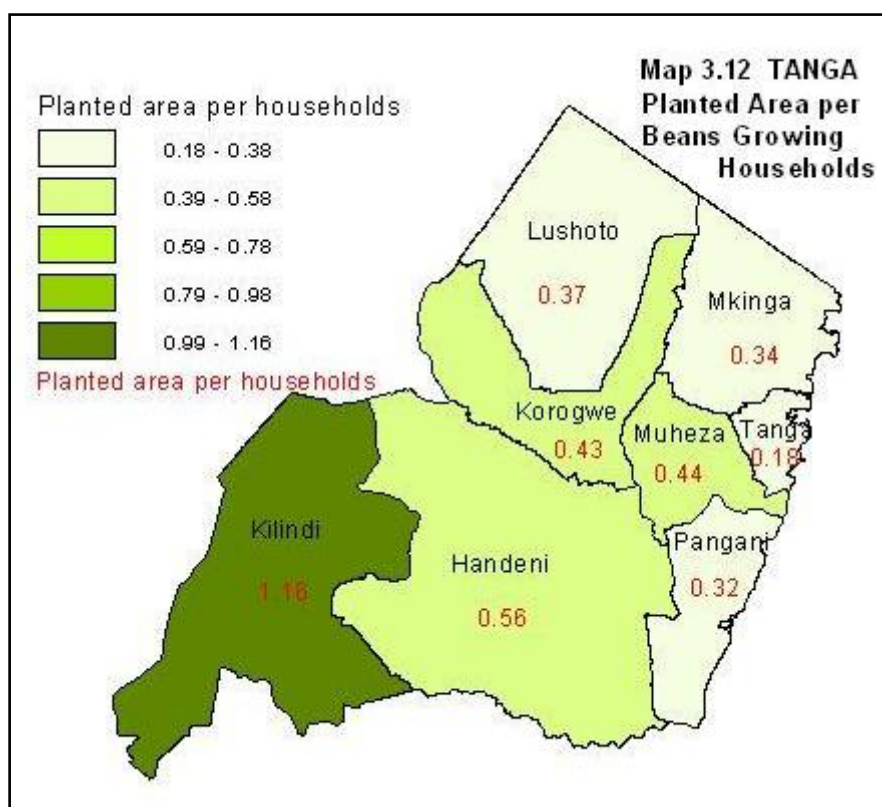

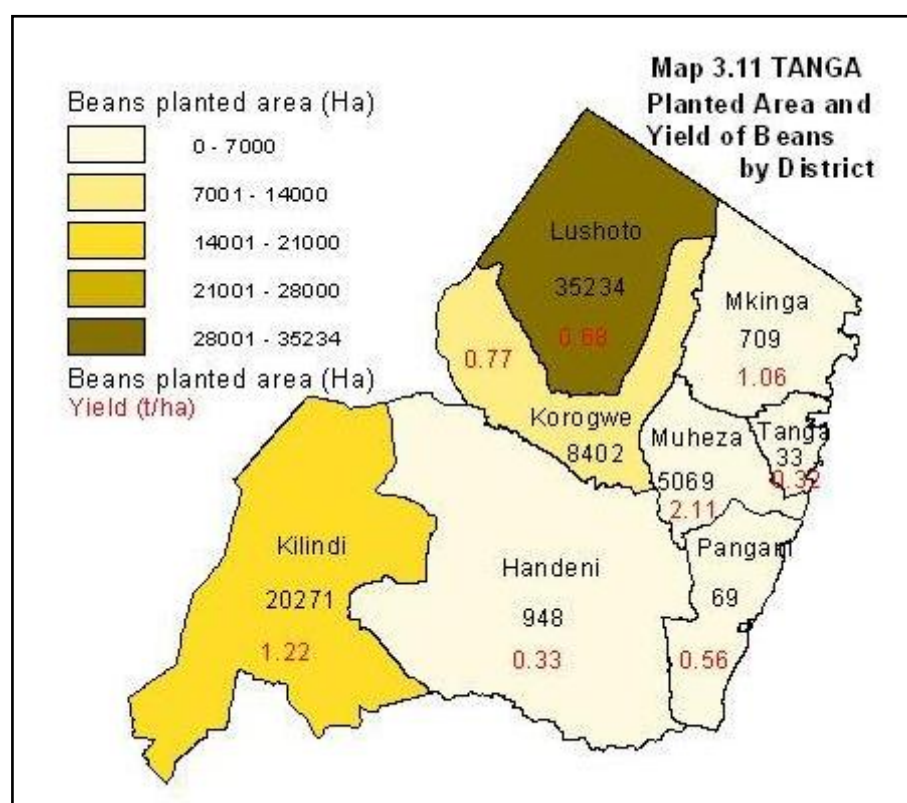

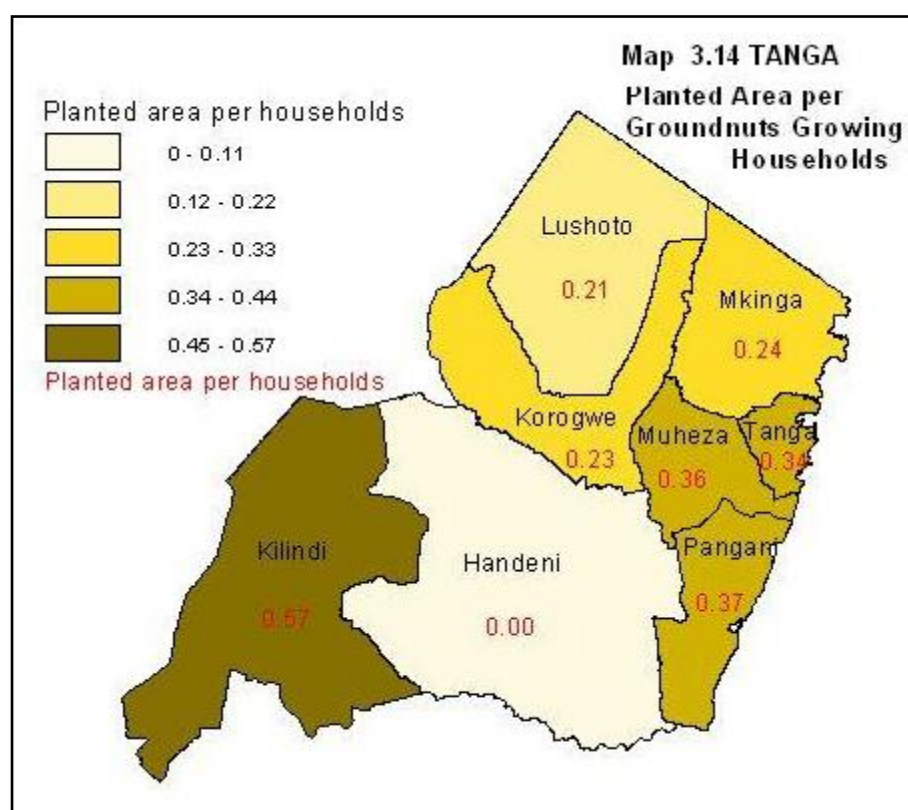

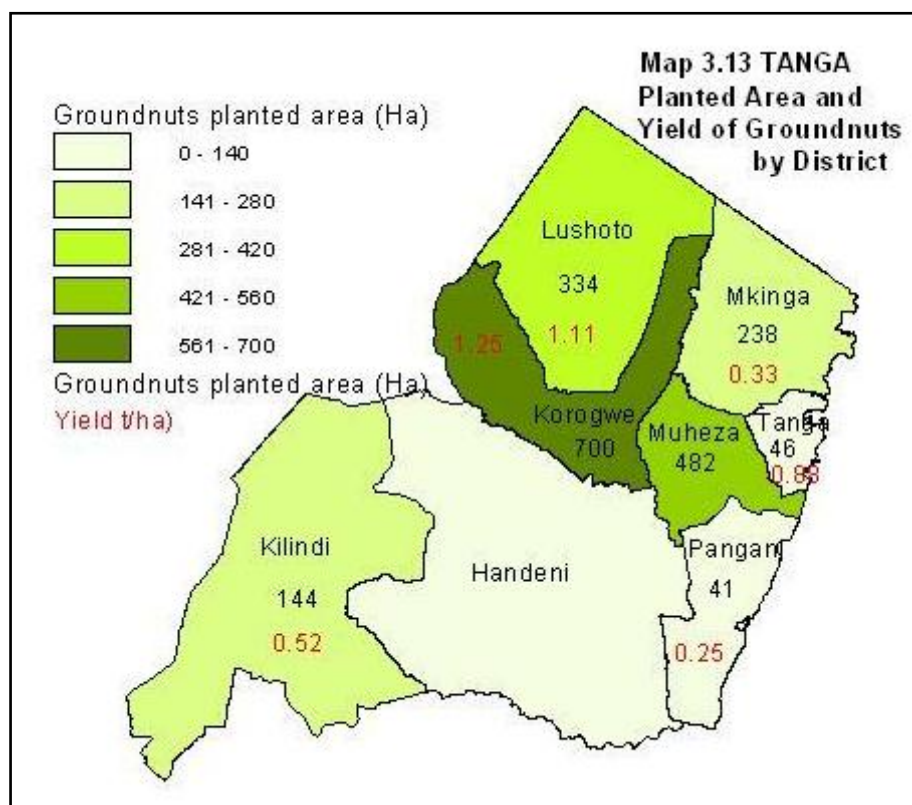

### 3.3.5 Beans

A total of 70,735 ha were planted with beans with the largest area recorded in Lushoto (35,234 ha) while Tanga had the smallest area (33 ha). Other districts with significant areas planted with beans were Kilindi (20,271 ha) followed by Korogwe (8,402) and Muheza (5,069 ha). Yields of beans varied across districts. Muheza recorded the highest yield (2.11 ton/ha) followed by Kilindi (1.22 ton/ha) and Mkinga (1.06 ton/ha) while the lowest yield was recorded in Tanga (0.32 ton/ha) (Map 3.14). In terms of planted area per beans growing households, Handeni recorded the largest area (0.56 ha) followed by Muheza (0.44 ha), Korogwe (0.43 ha) while Kilindi recorded the smallest area (1.16 ha) (Map 3.15).

### 3.3.6 Groundnuts

With the exception of Handeni groundnuts were grown in all districts in Tanga region and the total area planted with the crop was 1,985 ha. Korogwe had the largest area planted with groundnuts (700 ha) followed by Muheza (482 ha), Lushoto (334 ha) while other districts had much smaller areas planted with the crop. Yield records show that the highest yield was obtained in Korogwe (1.25 ton/ha) followed by Lushoto (1.11 ton/ha) and the lowest yield was recorded in Pangani (0.25 ton/ha) (Map 3.16). The largest area planted per groundnut growing households was recorded in Kilindi (0.57 ha) while Lushoto had the smallest area planted with groundnuts (0.21 ha) (Map 3.17).

### **3.3.7 Fruit and Vegetable Production**

#### **3.3.7.1 Tomatoes**

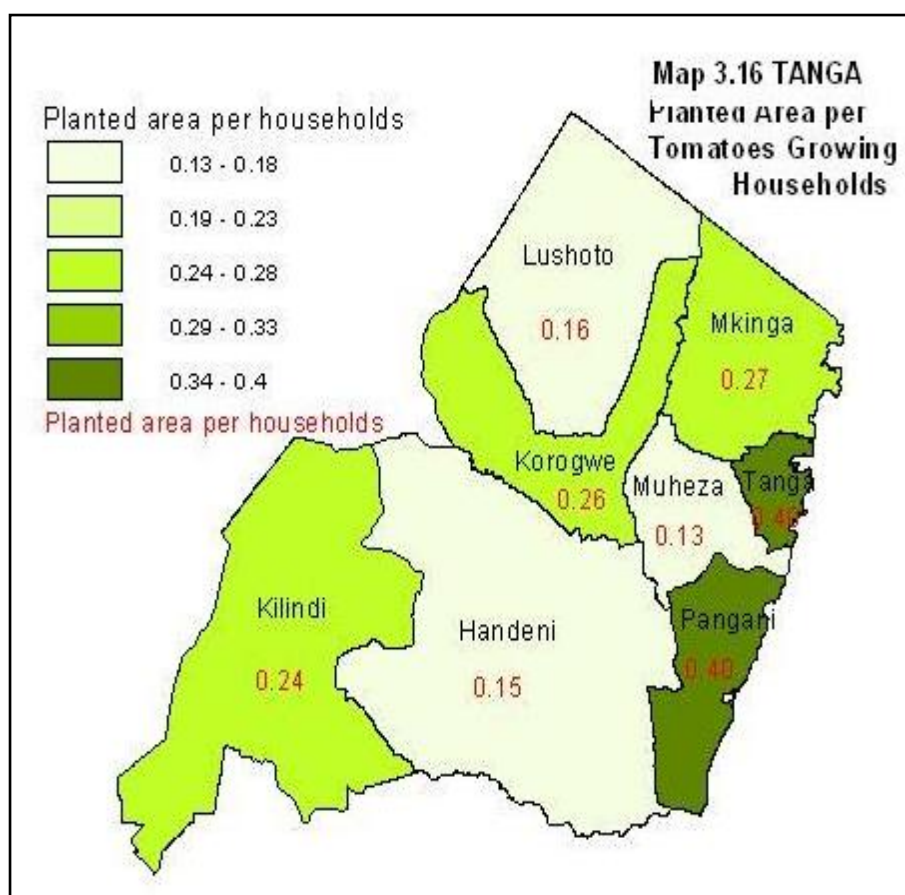

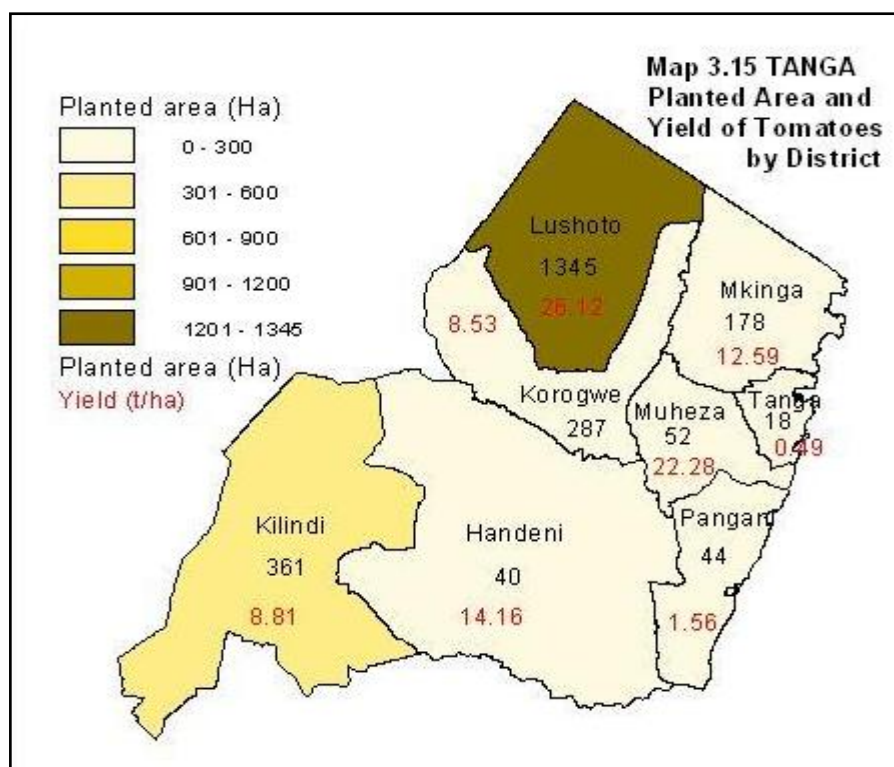

Lushoto district had the largest planted area with tomatoes (1345 ha) representing 58% of the total area planted with tomatoes (2,325 ha) in the region followed by Korogwe (287 ha) while other districts had much smaller areas planted with the crop. On the other hand, the highest yield of tomatoes was obtained in Lushoto (26 ton/ha) followed by Muheza (22.3 ton/ha), Handeni (14.2 ton/ha) and Mkinga (12.6 ton/ha). Yields of tomatoes in other districts were much lower with the lowest recorded in Tanga (0.49 ton/ha) (Map 3.18). Planted area per tomatoes growing households varied across districts with Tanga and Pangani (0.40) having the largest area while Muheza had the smallest (0.13 ha) (Map 3.19)

#### **3.3.7.2 Cabbage**

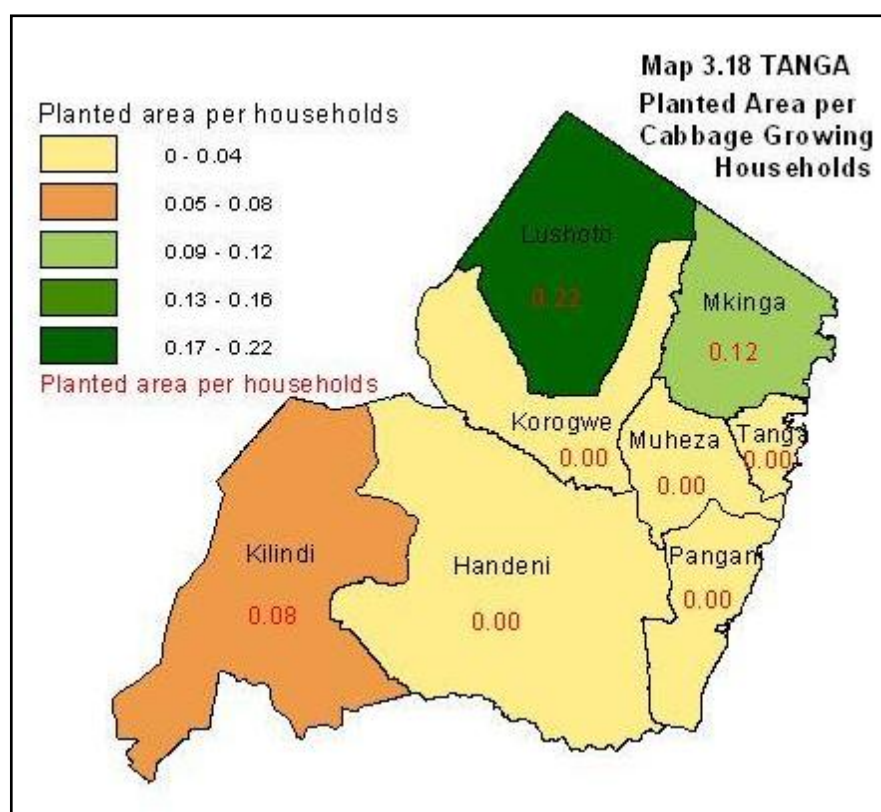

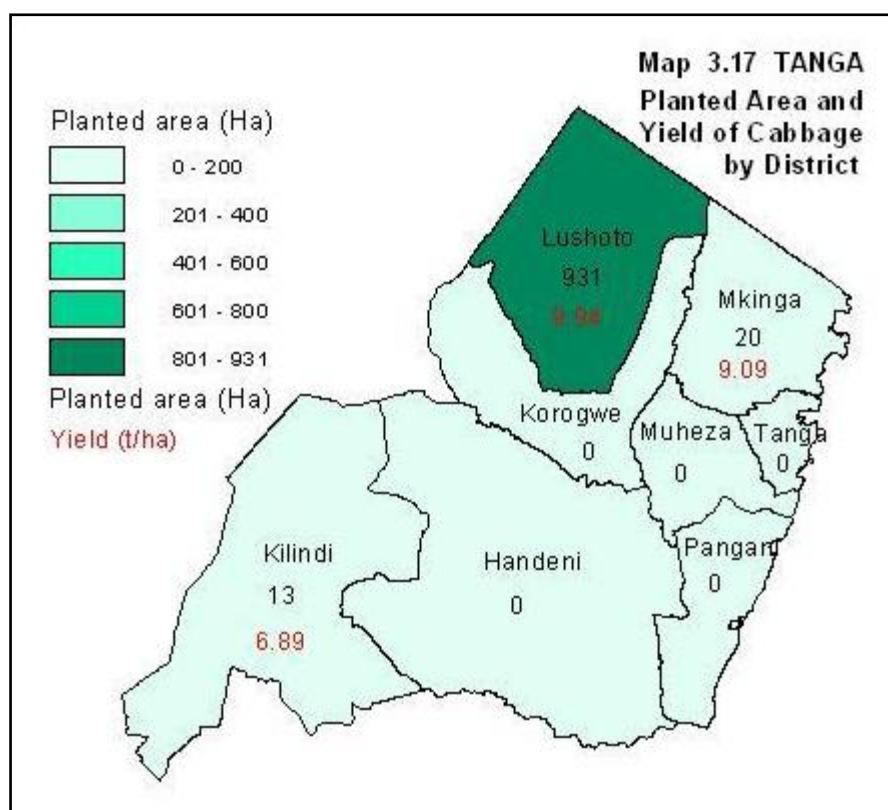

Lushoto district had the largest area planted with cabbage (931 ha) accounting for 96.6% of the total area planted with cabbage in the region while Mkinga (20 ha) and Kilindi (13 ha) had small areas planted with cabbage. Regarding yield, Lushoto had the highest yield (9.94 ton/ha) followed by Mkinga (9.09 ton/ha) while the lowest yield was recorded in Kilindi (6.89 ton/ha) (Map 2. 20). On the other hand, Lushoto had the largest planted area per cabbage growing households (0.22 ha) closely followed by Mkinga (0.12 ha) and Kilindi (0.08 ha) (Map 3.21).

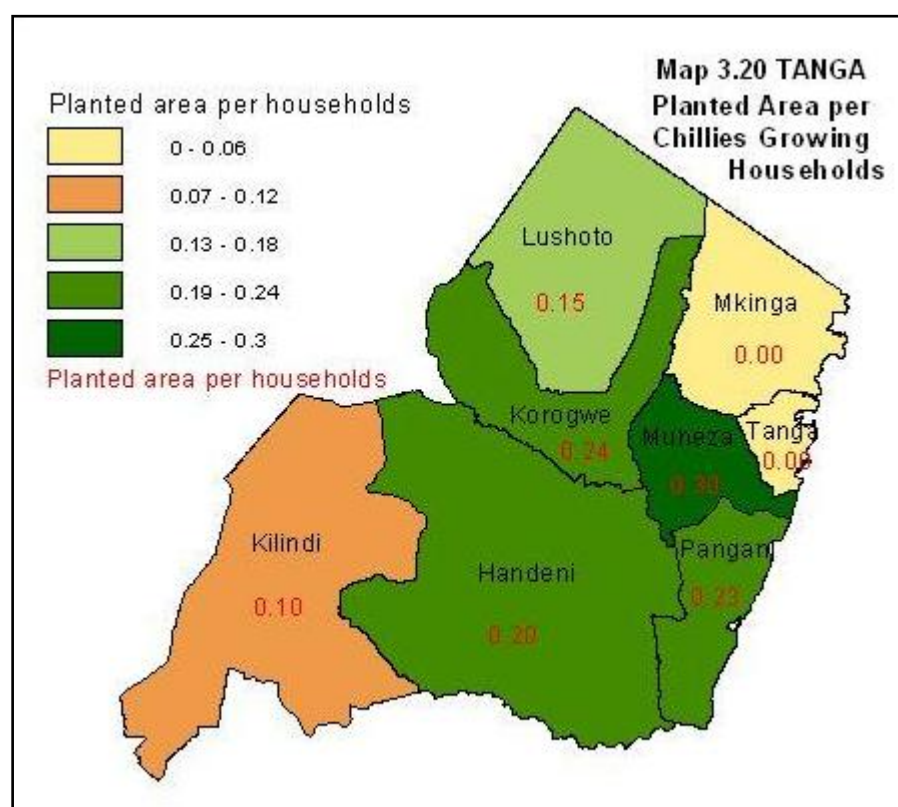

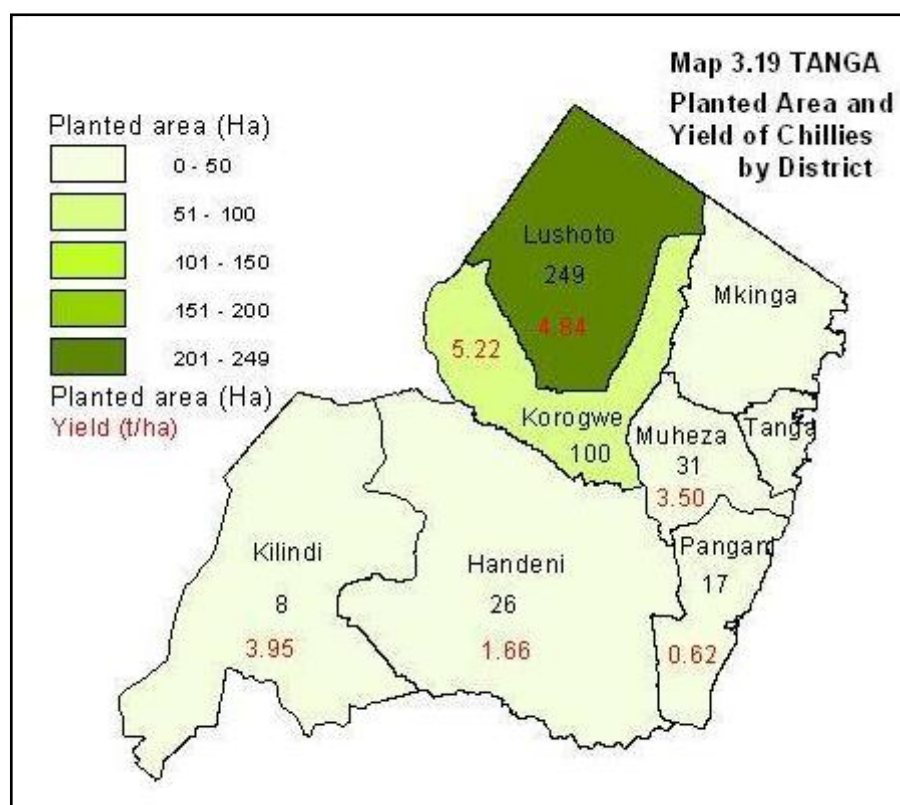

#### **3.3.7.3 Chillies**

Lushoto district had the largest planted area with chillies (249 ha), which accounted for 57.8% of the total planted area with chillies followed by Korogwe (100 ha, 23.2%). In other districts areas planted with chillies were quite small. In terms of yield, Korogwe recorded the highest yield (5.22 ton/ha) while the smallest yield was obtained in Pangani (.062 ton/ha) (Map 3.22). Furthermore, the largest planted area per chillies growing households was recorded in Muheza (0.30 ha) and Kilindi had the smallest area (0.10 ha) (Map 3.23).

### **3.3.8 Other Crops**

Other crops including cotton and tobacco were produced mainly for cash.

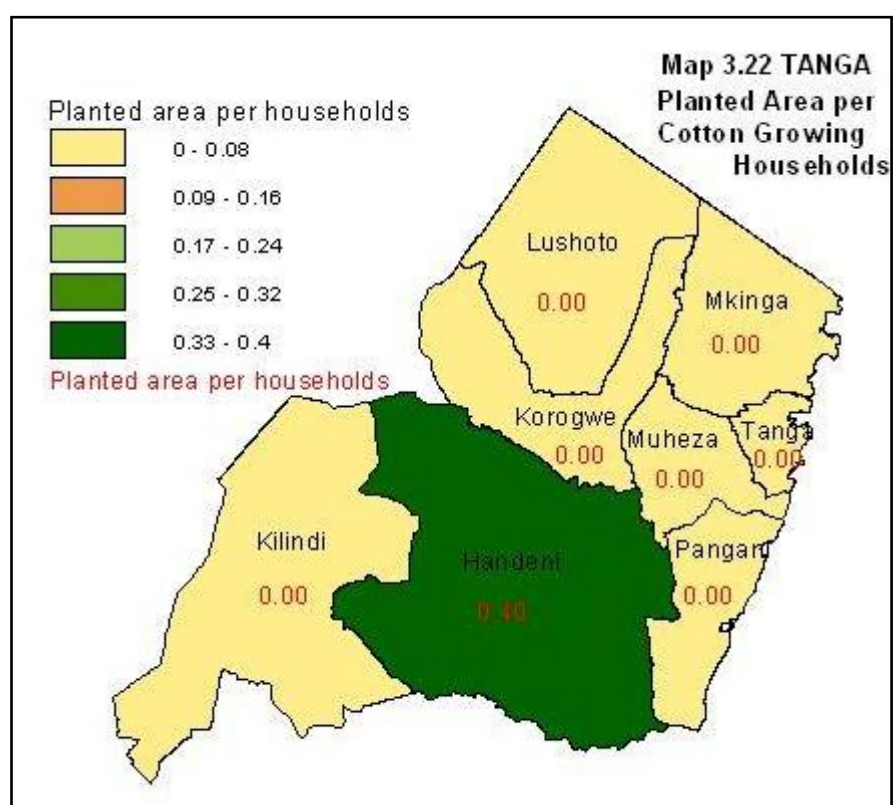

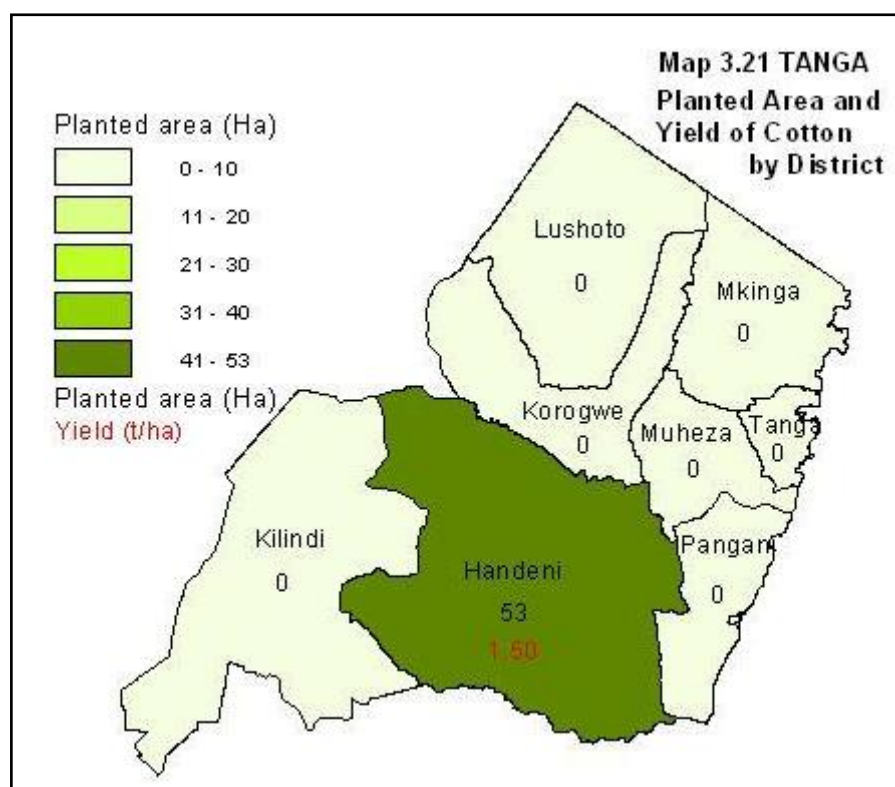

#### **3.3.8.1 Cotton**

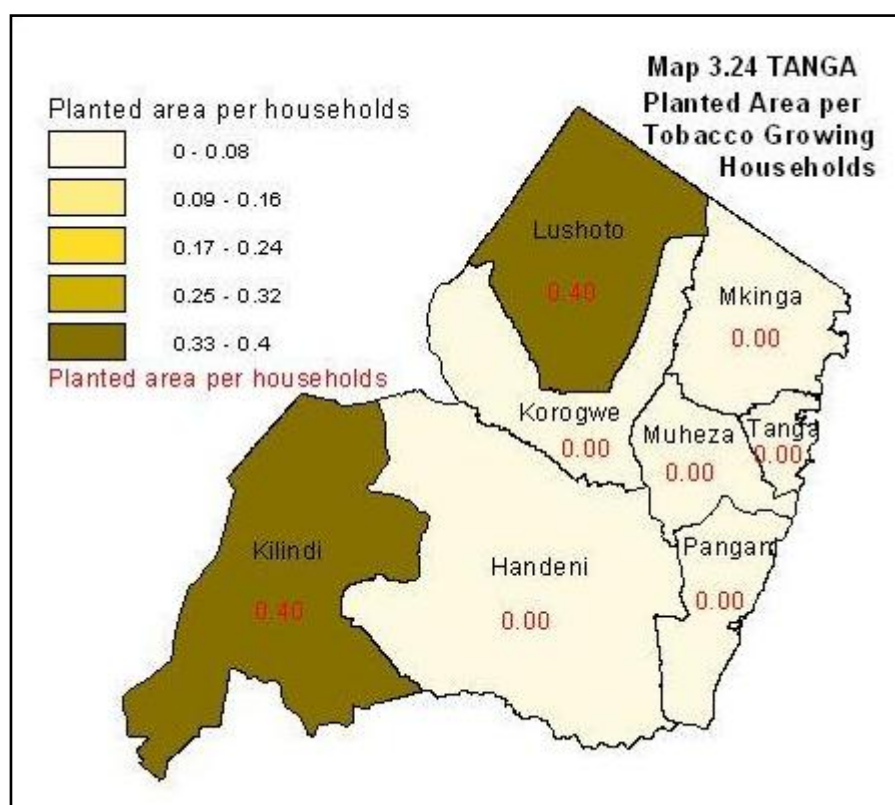

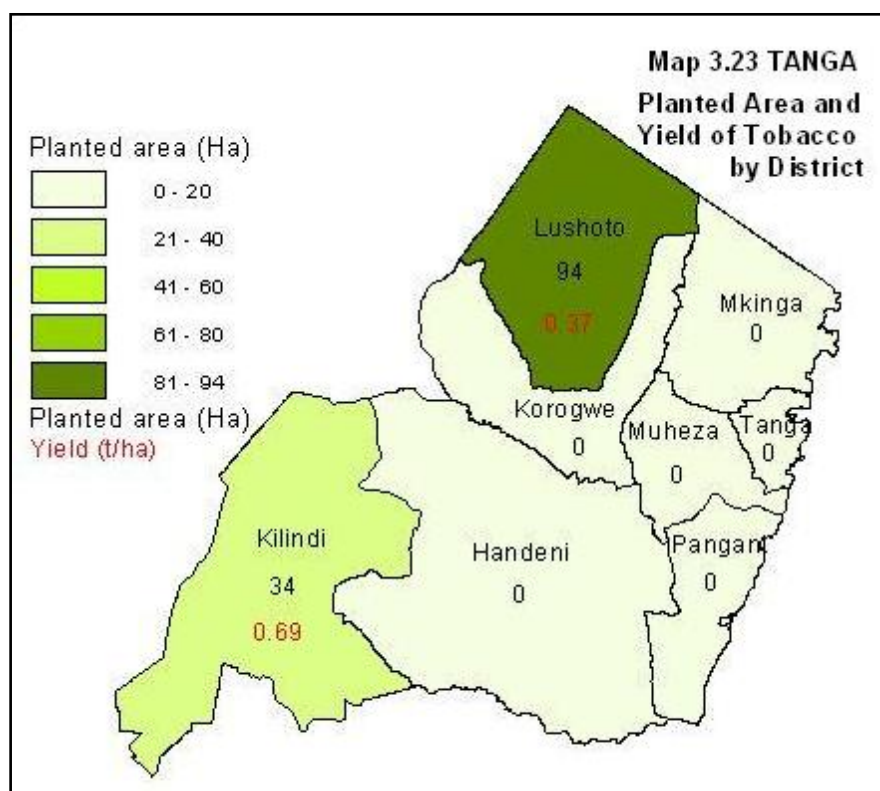

Cotton production is mainly carried out in Handeni District where a total of 53 ha were planted with the crop. Recorded yield of cotton was 1.5 ton/ha (Map 3.24) while the area planted per cotton growing households was 0.40 ha (Map 3.25).

#### **3.3.8.2 Tobacco**

Tobacco production is mainly concentrated in Lushoto and Kilindi. A total of 128 ha of tobacco were grown to tobacco with the area in Lushoto accounting for 74.3% of the total area grown to the crop. Also, Kilindi recorded higher yield (0.69 ton/ha) than Lushoto (0.37 ton/ha) (Map 3.26). Moreover, planted area per tobacco growing households was 0.40 ha in both districts (Map 3.27).

### 3.4 Permanent Crops

Permanent crops are also referred to as perennial crops. These are called permanent because they take over a year to mature and once they mature can be harvested for several years. A total of 252,534 households were growing perennial crops in Tanga region in an area of 180,570 ha. The largest number of households grew other crops (96,746) followed by banana (41,464), orange (31,771), coconut (28,085), cashew nut (17,577), and mango (16,851) - while other crops like sugar cane, tea, cloves coffee, pigeon pea were grown by households ranging from 2,348 and 7,093. Also, the highest percent of the area was planted with other crops (8.9%) oranges (5.8%), cashew nut (5.3%) - coconut (4.6%), and banana (1.9%). Other crops were planted in percentages ranging from 0% to 1.3%. Regarding yield, the first three crops that recorded the highest yields were sugar cane (10.92 ton/ha) followed by tea (5.92 ton/ha), mango and banana (4.49 ton/ha). In contrast, cloves (0.30 ton/ha) and (0.56 ton/ha) recorded the lowest yields (Table 3.3, Chart 3.5).

Chart 3.5: Area Planted with Main Perennial Crops

A total of 252,534 households planted perennial crops in an area of 180,570 ha. Muheza accounted for the highest percent of total area planted with perennial crops (29.6%) followed by Mkinga (24.2%), Tanga (14.1%), and Lushoto (9.4%). The lowest percent of total planted area was recorded in Kilindi (4.6%). In terms of planted area per household growing perennial crops Mkinga recorded the largest area with 1.03 ha followed by Tanga (0.98 ha), Pangani and Muheza (0.79 ha) each. In contrast, the smallest area was found in Korogwe (0.3 ha).

#### 3.4.1 Mango

Mango was grown all over the region. A total of 8,169 ha were planted with mango by 16,851 households. Muheza had the highest percent of area planted with mangoes (30.3%) followed by Kilindi (25.9%). These two districts accounted for almost over half of the area planted with mangoes in the region. Moreover, Pangani had the lowest percent area under mangoes (1.3%). Based on area planted per mango growing households, the highest area was recorded in Muheza (1.41 ha) followed by Kilindi (0.57 ha) and Tanga (0.39 ha) (Table 3.4).

### 3.4.2 Coconuts

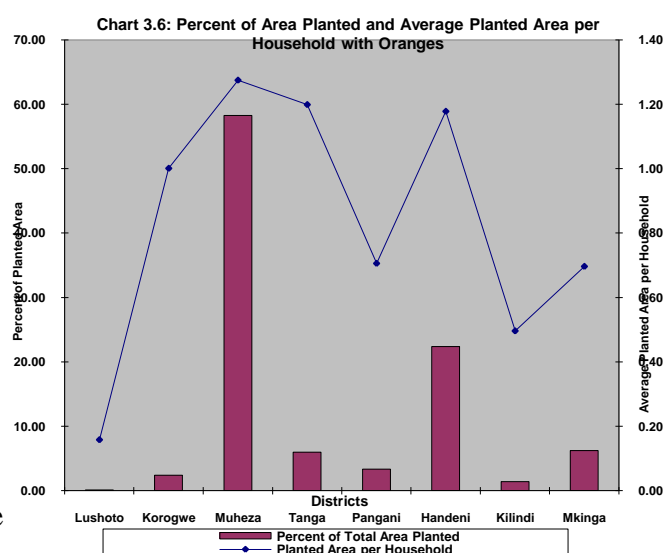

A total of 28,118 ha were planted with coconuts in seven out of the eight districts in Tanga region. Most coconut production was concentrated along the coast with Mkinga having the largest area planted with coconut (10,979 ha, 33.35%). The other districts with significant area grown to coconuts were Muheza (4,462 ha, 23.14%), Tanga (7,324 ha, 20.65%) and Pangani (4,115 ha, 12.72%). Besides Lushoto where no coconut production was undertaken, Kilindi had the smallest area planted with coconut (195 ha), which accounted for about 1% of the total area planted with coconut in the entire region. Yields of coconut varied widely across districts. However, Tanga obtained the highest yield (2.97ton/ha) while the lowest yield was recorded in Handeni (0.48 ton/ha) (Map 3.28). On the other hand, Tanga had the largest planted area per coconut growing households (1.26 ha). Other districts with relatively larger areas were Mkinga (1.17 ha), and Pangani (1.15 ha). In contrast, Korogwe and Handeni recorded the smallest area (0.40 ha) (Map 3.29).

**Table 3.4: Percent of Area Planted and Average Planted Area with Mango**

District	Number of household	Area Planted	Percent of Total Area Planted	Planted Area per Household
Lushoto	929	109	1.34	0.12
Korogwe	2,248	535	6.55	0.24
Muheza	1,754	2,471	30.25	1.41
Tanga	2,492	977	11.97	0.39
Pangani	328	106	1.30	0.32
Handeni	1,953	403	4.93	0.21
Kilindi	3,691	2,117	25.92	0.57
Mkinga	3,457	1,449	17.74	0.42
Total	16,851	8,169	100.00	0.48

### 3.4.3 Oranges

Muheza recorded the highest percent of area planted with oranges (58.29%) followed by Handeni (22.37) while Lushoto recorded the lowest percent (0.1%). On the other hand, Muheza (1.3 ha), Tanga (1.2 ha) and Handeni (1.18 ha) were the three districts with the largest average area planted with orange per household. With only about 0.2 ha Lushoto recorded the smallest average area per household planted with the crop. Yields of oranges varied from as high as 3.87 ton/ha in Korogwe to as low as (1.19 ton/ha) in Mkinga (Chart 3.6 and Maps 3.30 and 3.31).

### 3.4.4 Banana

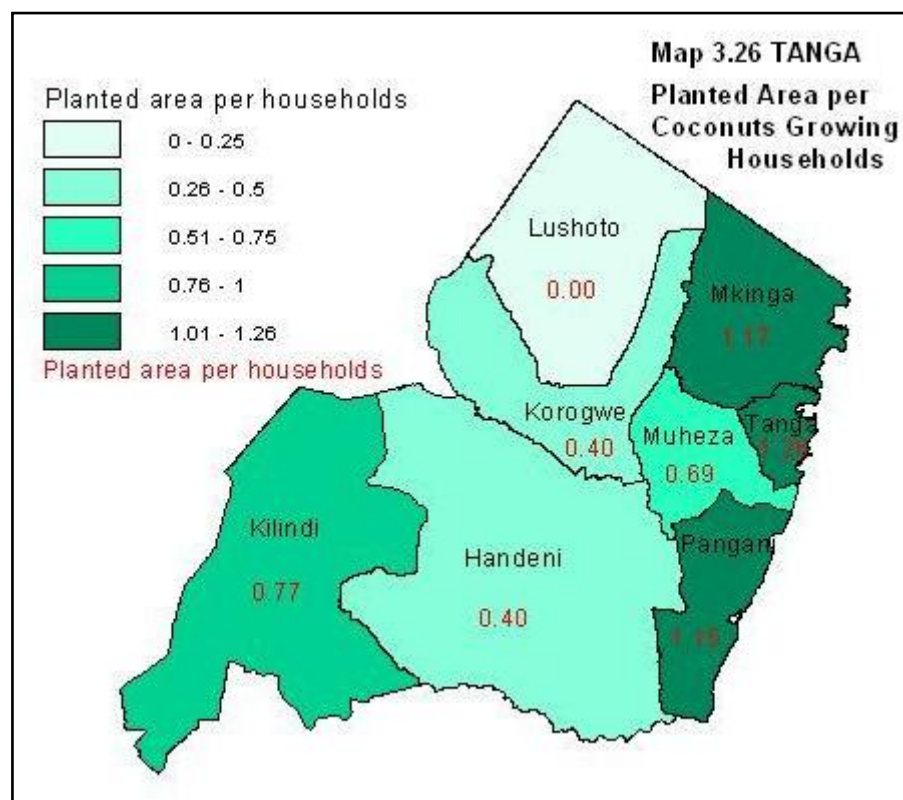

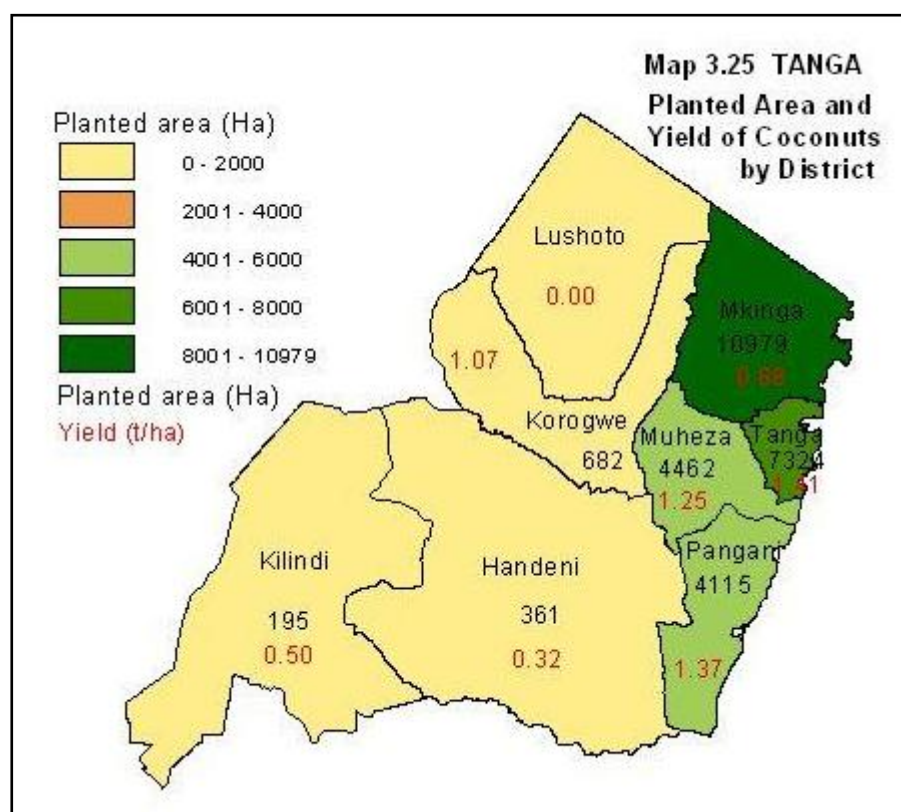

Banana was grown in all districts by a total of 41,464 households and the total area amounted to 11,412 ha. However, the districts with the first three highest percent of area planted with banana were Lushoto (27%) followed by Muheza (23.3%), and Kilindi (20.6%). Besides, the largest average area planted with banana per household was recorded in Kilindi (0.8 ha) and Tanga (0.28 ha), which was closely followed by Pangani (0.27 ha). In contrast, Handeni had the lowest (0.16 ha) average area planted per household with banana. In terms of yield, highest was obtained in Mkinga (9.19 ton/ha). Other districts with relatively higher yields include Muheza (7.44 ton/ha) Korogwe (6.96 ton/ha) and Pangani (4.62 ton/ha) (Chart 3.7, Maps 3.32 and 3.33).

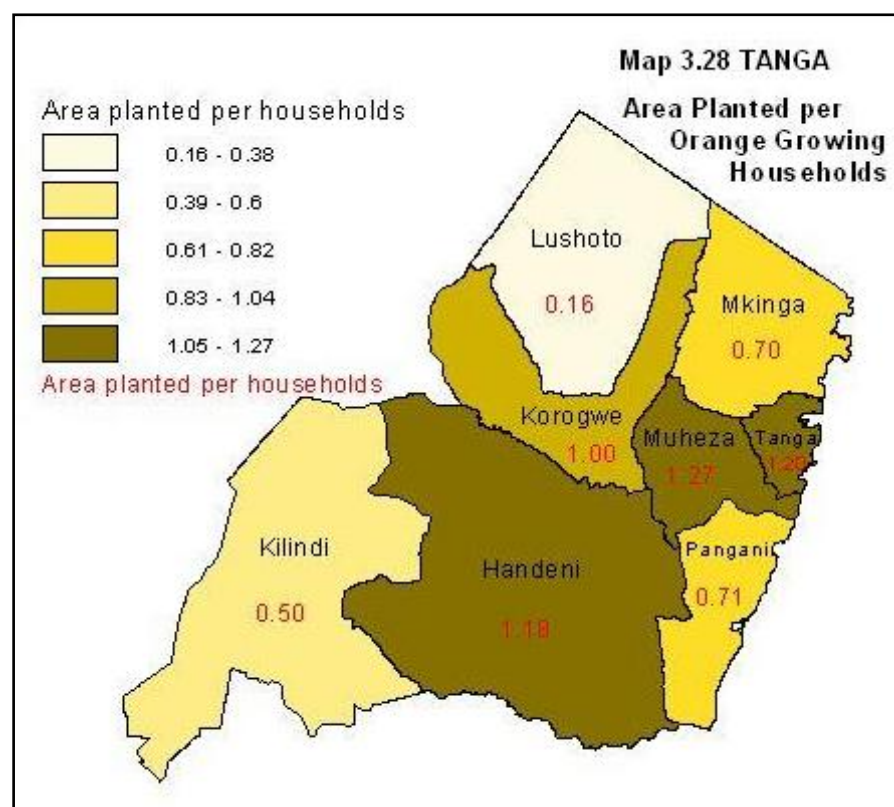

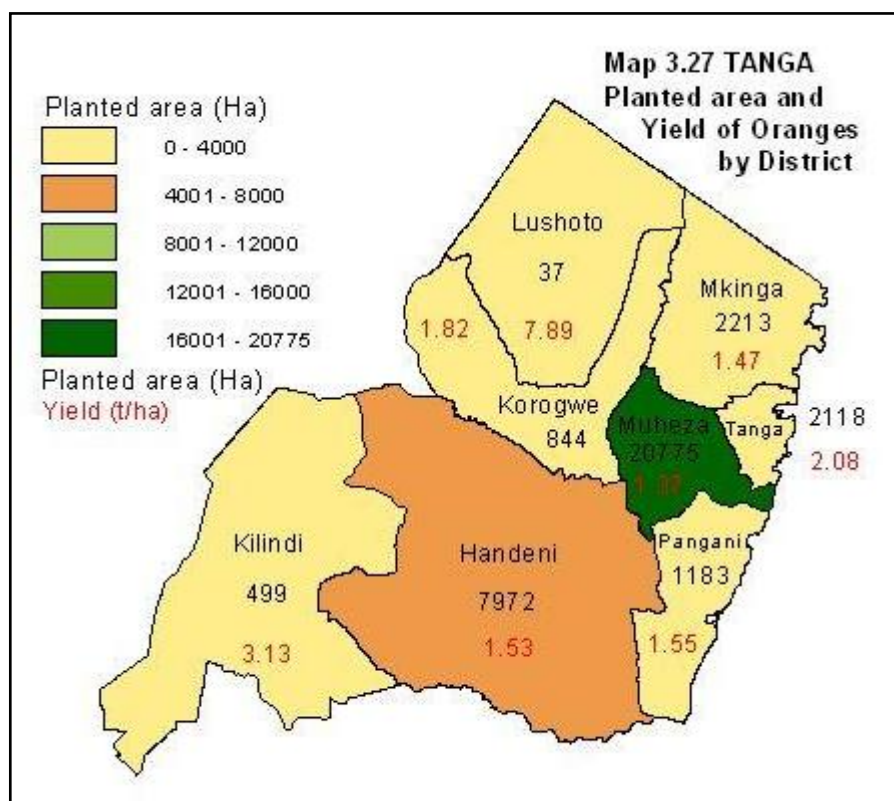

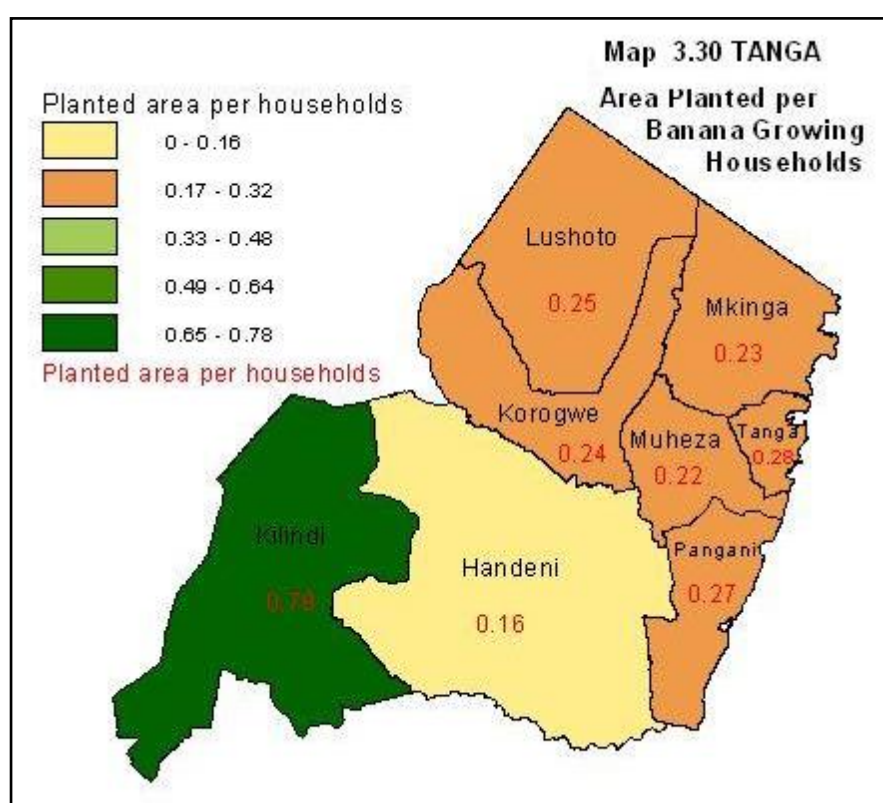

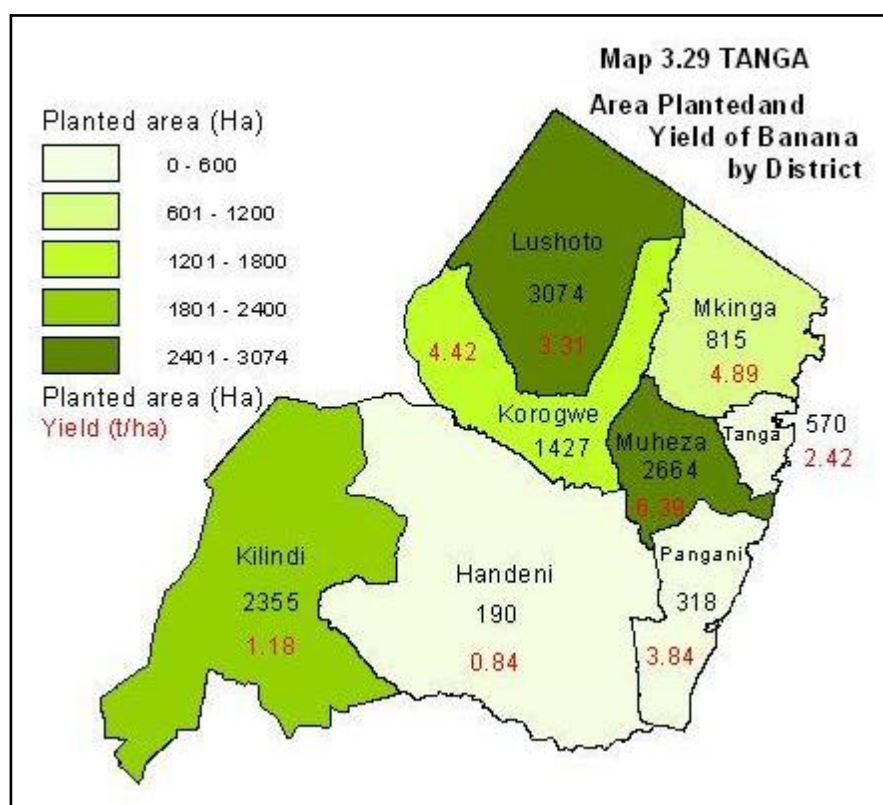

### 3.4.5 Cashew nuts

The total area planted with cashewnuts is 32,268 ha. Mkinga district had the largest area planted with cashewnuts (20,148.04 ha), which accounted for about 62% of the total area planted with the crop in the region followed by Tanga (6,511.57 ha, 20.2%), Pangani (2,797.76 ha, 8.7%) and Muheza (2,180.59 ha, 6.8%) In contrast, other districts had relatively smaller areas planted with cashewnuts with Kilindi and Handeni having the smallest area planted with the crop (56.06 and 69.42 ha). On the other hand, the highest yield was still recorded in Mkinga (2.62 ton/ha) while Tanga and Korogwe obtained the lowest yield (0.1 ton/ha) (Map 3.34). Regarding area planted per cashewnuts growing households, Mkinga had the largest area (2.19 ha), followed by Tanga (1.89 ha), Muheza (1.76 ha), and Pangani (1.18 ha). The other remaining districts had areas less than 1 ha per cashewnuts growing households with Handeni having the smallest area (0.27 ha) (Map 3.35).

### 3.5 Input Use

#### 3.5.1 Fertilizer Use

The total planted area in Tanga was (436,725 ha). Lushoto had the largest planted area 7,993 ha using fertilizer followed by Korogwe (3,650 ha), and Muheza (2,734 ha). Each of the other remaining districts had planted areas less than 1,000 ha with Pangani having the smallest planted area (273 ha) while Handeni did not use any fertilizer at all (Map 3.36).

#### 3.5.2 Use of Organic Fertilizer

A total of 24,094 (7%) households in Tanga region used organic fertilizer. In contrast, 306,685 (93%) households did not use organic fertilizer. Overall, the percentage of area planted using organic fertilizer in the region accounted for only 3.6% of the total planted area. In general, the number of households using organic fertilizer and the area applied with it varied greatly across districts (Table 3.5). Lushoto had the largest number of households (14,169 with 5,416 ha) followed by Muheza (4,436 households 2,588 ha), Korogwe (2,669 households, 3,650 ha), Tanga (1,540 households, 750 ha), and Mkinga (558 households, 249 ha). Besides, virtually no households in Handeni used organic fertilizer. Furthermore, at regional level, 207,455 households planted during the short rainy season (Vuli) and the total area planted was 178,527 ha). In all, Lushoto had the largest number of households (84,087), which planted during Vuli as well as the area planted (68,278 ha) (Table 3.5). However, this was not evident in other districts except for Tanga (3,851 households, 2,620 ha) and Pangani (6,306 households, 4,813 ha), which had both the smallest number of households using organic fertilizer as well as area planted with it.

**Table 3.5: Annual Crop and Vegetable Production: Number of Households and Planted Area by Organic Fertilizer Use and District - Short Rainy Season**

District	Organic Fertilizer Use						% of Planted area using Organic Fertilizer
	Number of Households using Organic Fertilizer	Planted Area Applied with Organic Fertilizer	Number of Households NOT using Organic Fertilizer	Planted Area NOT Applied with Organic Fertilizer	Total Number of Households Planting in VULI	Total Planted Area in VULI	
Lushoto	10,685	4,250	73,402	64,027	84,087	68,278	6.2
Korogwe	983	341	20,511	13,125	21,495	13,466	2.5
Muheza	2,373	1,341	27,234	21,465	29,606	22,805	5.9
Tanga	362	199	3,488	2,421	3,851	2,620	7.6
Pangani	73	106	6,233	4,706	6,306	4,813	2.2
Handeni	0	.	26,554	26,475	26,554	26,475	-
Kilindi	84	34	21,812	28,951	21,896	28,984	0.1
Mkinga	335	187	13,325	10,898	13,660	11,086	1.7
<b>Total</b>	<b>14,895</b>	<b>6,459</b>	<b>192,560</b>	<b>172,069</b>	<b>207,455</b>	<b>178,527</b>	<b>3.6</b>

Use of organic fertilizer during the long rainy season for annual crop and vegetable production is presented in Table 3.6. Although the total number of households using organic fertilizer during Masika was much smaller (9,199) compared to those during Vuli (14,895), both the number of households not using organic fertilizer and the area planted without organic fertilizer was much bigger during Masika than in Vuli. Similarly, the number of households as well as the area planted in Masika was much bigger than the number of households and area planted during Vuli. In addition, the percentage of planted area using organic fertilizer during Masika was much lower (1.8%) than under Vuli (3.6%), almost twice less (Table 3.6).

**Table 3.6: Annual Crop and Vegetable Production: Number of Households and Planted Area by Organic Fertilizer Use and District - Long Rainy Season**

District	Organic Fertilizer Use						% of Planted area using Organic Fertilizer
	Number of Households using Organic Fertilizer	Planted Area Applied with Organic Fertilizer	Number of Households NOT using Organic Fertilizer	Planted Area NOT Applied with Organic Fertilizer	Total Number of Households Planting in MASIKA	Total Planted Area in MASIKA	
Lushoto	3,484	1,166	36,933	26,983	40,418	28,149	4.1
Korogwe	1,686	1,190	52,964	55,155	54,650	56,346	2.1
Muheza	2,063	1,248	36,827	31,789	38,891	33,037	3.8
Tanga	1,178	523	9,287	6,107	10,465	6,631	7.9
Pangani	146	167	9,586	7,723	9,732	7,890	2.1
Handeni	0	.	49,463	69,864	49,463	69,864	-
Kilindi	419	323	27,265	49,757	27,685	50,080	0.6
Mkinga	223	62	6,635	6,141	6,858	6,203	1.0
<b>Total</b>	<b>9,199</b>	<b>4,679</b>	<b>228,962</b>	<b>253,519</b>	<b>238,161</b>	<b>258,198</b>	<b>1.8</b>

Areas planted with organic fertilizer varied greatly across districts (Chart 3.8). While no amount of organic fertilizer was recorded for Handeni, it is clearly shown that Lushoto by far had the largest area planted with organic fertilizer (5,416 ha). Muheza (2,588 ha), and Korogwe (1,532 ha) came a distant second and third respectively. Other districts recorded smaller areas planted with organic fertilizer.

### 3.5.3 Use of Pesticides

#### 3.5.3.1 Insecticide Use

There were 11,576 households using insecticides representing only 3.5% of the crop growing households. Except for Tanga where none of the crop growing households used insecticides, the largest number of households using insecticides was recorded in Lushoto (8,595) representing about 74% of households using insecticides in the region. Muheza had the second largest number of households using insecticides (1,032) followed by Korogwe (702), Pangani (401), Mkinga (335), Handeni (260) while Kilindi (252) had the smallest number of households (Table 3.7).

The area planted with insecticides was 3,464 ha representing about only 1% of the total planted area with annual crops and vegetables. Lushoto had the largest area (1,867 ha) accounting for 54% of the total area planted with insecticides. While no insecticides were used for annual crop and vegetable production in Tanga District, the area planted with insecticides in other districts ranged from 132 in Handeni to 407 ha in Pangani (Table 3.7).

**Table 3.7: Total Number of Agricultural Households and Planted Area by Insecticide Use and District for the 2007/08 Agriculture Year – Short and Long Rainy Seasons**

District	Number of Households using Insecticide	Planted Area with Insecticide	Number of Households NOT using Insecticide	Planted Area with no Insecticide	Total Number of Households	Total Planted Area (ha)
Lushoto	8,595	1,867	115,910	94,560	124,505	96,426
Korogwe	702	228	75,443	69,585	76,145	69,812
Muheza	1,032	340	67,465	55,503	68,497	55,842
Tanga	0	.	14,315	9,251	14,315	9,251
Pangani	401	407	15,637	12,296	16,038	12,703
Handeni	260	132	75,757	96,207	76,017	96,339
Kilindi	252	272	49,330	78,792	49,581	79,064
Mkinga	335	220	20,183	17,068	20,518	17,288
Total	11,576	3,464	434,040	433,261	445,616	436,725

#### 3.5.3.2 Herbicide Use.

A total of 4,203 households used herbicide during both the short and long seasons for annual and vegetable production accounting for about only 1% of the total number of households (445,616) in Tanga. Lushoto had the largest number of households using herbicides (1,626). This accounted for about 39% of all households that used herbicide during both the short and long rainy seasons

followed by Kilindi (1,258, 30%). Other districts had less than 1000 households using herbicides including Korogwe (702), Muheza (413), Mkinga (167), and Pangani (36). On the other hand, there were no households using herbicides in Tanga and Handeni (Table 3.8).

A total of 1,605 ha were planted with herbicides. This accounted for only 0.4%) of the total planted area (436,725 ha). Kilindi had the largest area planted with herbicides (577 ha) followed by Korogwe (390 ha), Lushoto (379 ha). Much smaller areas were planted with herbicides in Muheza (166 ha), Mkinga (86 ha) while Pangani had the smallest area (7 ha) (Table 3.8).

**Table 3.8: Total Number of Agricultural Households and Planted Area by Herbicide Use and District for the 2007/08 Agriculture Year- Short and Long Rainy Seasons**

District	Number of Households using Herbicide	Planted Area with Herbicide	Number of Households NOT using Herbicide	Planted Area with no Herbicide	Total Number of Households	Total Planted Area (ha)
Lushoto	1,626	379	122,879	96,047	124,505	96,426
Korogwe	702	390	75,443	69,423	76,145	69,812
Muheza	413	166	68,084	55,676	68,497	55,842
Tanga	0	.	14,315	9,251	14,315	9,251
Pangani	36	7	16,001	12,696	16,038	12,703
Handeni	0	.	76,017	96,339	76,017	96,339
Kilindi	1,258	577	48,323	78,487	49,581	79,064
Mkinga	167	86	20,351	17,203	20,518	17,288
Total	4,203	1,605	441,413	435,120	445,616	436,725

### 3.5.3.3 Fungicide Use

Fungicides were used in all districts for annual crops and vegetable production. However, there was variation across districts both in terms of number households using herbicides and area planted with it. In all, a total of 12,359 households used fungicides accounting for only about 3% of the total number of crop growing households (445,616) (Table 3.9). Lushoto with 9,524 households accounted for about 77% of all households using fungicides. Kilindi came second with 1,091 households. Other districts had less than 1000 households using fungicides while Pangani had the smallest number of households using fungicides (36).

Of the total planted area (436,725 ha) in the region, the area planted with fungicides accounted for only 1% (3,076 ha). Lushoto had a total area of 1,988 ha planted with fungicides accounting for

65% of the total area planted with fungicides. In other remaining districts the area planted with fungicides ranged from as small as 15 ha in Pangani to as large as 348 ha in Kilindi (Table 3.9).

**Table 3.9: Total Number of Agricultural Households and Planted Area by Fungicide Use and District for the 2007/08 agriculture – Short and Long Rainy Seasons**

District	Number of Households using Fungicide	Planted Area with Fungicide	Number of Households NOT using Fungicide	Planted Area with no Fungicide	Total Number of Households	Total Planted Area (ha)
Lushoto	9,524	1,988	114,981	94,439	124,505	96,426
Korogwe	702	205	75,443	69,607	76,145	69,812
Muheza	309	99	68,187	55,743	68,497	55,842
Tanga	45	18	14,270	9,232	14,315	9,251
Pangani	36	15	16,001	12,688	16,038	12,703
Handeni	260	237	75,757	96,102	76,017	96,339
Kilindi	1,091	348	48,491	78,716	49,581	79,064
Mkinga	390	166	20,128	17,122	20,518	17,288
Total	12,359	3,076	433,258	433,649	445,616	436,725

### 3.6 Irrigation

Tanga region had a total area of 9,439 ha planted with annual crops under irrigation. The average planted area under irrigation per district stood at 1,180 ha. Lushoto had the largest area under irrigation (4,177 ha) followed by Korogwe (3,799 ha). In fact the area under irrigation in these two districts accounted for about 85% of the total area under irrigation in the region. While in Handeni District no crops were planted under irrigation in the other remaining districts the area under irrigation was relatively smaller ranging from 30 ha in Pangani to 291 ha in Muheza (Map 3.37).

In terms of percent of total area planted with irrigation by district, Korogwe had the highest percent of the area (5.5%) followed by Lushoto (4.6%), Kilindi (0.9%), Mkinga (0.8%), Muheza (0.4%) and Pangani (0.2%) while Handeni recorded 0% (Map 3.37).

### 3.7 Crop Storage and Marketing

#### 3.7.1 Crop Storage

A total of 286,663 (86%) households reported storing crops. Korogwe had the highest percent (21%) of households which stored their crops followed by Lushoto (17%), Handeni (15%), Muheza (13%), Kilindi (11%), Pangani (3%), and Tanga (3%) while Mkinga (2%) had the lowest percent of households which reported storing crops (Table 3.10, Map 3.38).

**Table 3.10: Number of households storing crops by District**

District	Number of households storing crops	Percent of households storing crops
Lushoto	54,586.94	17
Korogwe	68,699.10	21
Muheza	44,151.62	13
Tanga	10,872.48	3
Pangani	10,205.75	3
Handeni	48,291.89	15
Kilindi	35,067.62	11
Mkinga	6,133.07	2

### Methods of Storage

Out of a total of 330,779 households, 48,687 (15%) of them did not store crops in both seasons (short and long). The largest number of households (157,020, 35%) stored their crops using traditional storage structures followed by sacks/open drum (100,050, 23%). Other households used improved locally made structures (14,543, 3%), unprotected piles (6,786 2%), air tight drum (5,250 2%), modern store (1,14, 0.3%), and other methods (1,887, 1%), (Chart 3.9).

The importance of storage methods varied across districts. However, in general, traditional storage structures were the most important storage methods in Lushoto (129,847 households), Korogwe (18,815 households), Tanga (45,760 households), Pangani (3,949 households), and Kilindi (58,303). The importance of other storage methods varied from one district to another (Chart 3.10)

### 3.7.2 Main Crop Marketing Problems

Although about 7% of households interviewed indicated that they faced no marketing problem, other households indicated to have encountered various marketing problems. Of the various problems mentioned by households, the most important one is that, they saw open market prices to be too low ((161,030, 36%). Other problems mentioned include no transport (12,405, 3%), crop market too far (9,464, 2%), transport cost too high (8,655, 2%) and lack of market information (4,342 1, 0.4%) (Chart 3.11).

**Chart 3.11: Number and Percent of Households Reporting Marketing Problems**

### Households Selling Crops

A total of 311,860 households out of 445,616 accounting for 70% of all households sold their crops. However, there is great variation across districts in terms of number and percent of households that sold their crops. Lushoto was among the first three districts with the largest number of households, which sold crops. It had 108,942 households, followed by Korogwe (53,105), and Handeni (48,682). In contrast, Tanga (5,527) had the smallest number of households that sold crops. In terms of percent, Lushoto had the highest percent of crop selling households (35%) followed by Korogwe (17%), Handeni (16%), Muheza had (13%) and Kilindi (11%). In contrast Tanga had the lowest percent of crop selling households (2%) (Chart 3.12, Map 3.39).

Chart 3.12 Number of Crop Growing Households Selling Crops by District

### 3.7.3 Access to Agricultural Credit

#### 3.7.4 Source of Agricultural Credit

The major sources of agricultural credit were bank (32.9%) and savings and credit societies (32.2%). Other sources of minor importance were NGO/Development project (10.6%), Trader/trade store (9.4), private individuals (9.3%), and family/friend/relative (5.6%) (Chart 3.13). Generally, the importance of credit sources varied greatly across districts. For example, commercial banks were the sole source of credit in Pangani while family/friends were only used as sources of credit in Kilindi (Chart 3.14).

#### 3.7.5 Crop Extension

Out of a total of crop growing households, 227,375 (69%) reported receiving extension advice while 100,039 (31%) did not (Chart 3.15). Clearly, in some districts crop growing households had more access to extension advice than others. Specifically, Lushoto had the highest percent households with access to extension advice (83%). Other districts with almost two thirds of households having access to crop extension advice were Korogwe (71%), Muheza (71%), Tanga (67%), Pangani (67%), and Kilindi (66%). On the other hand Mkinga district had the lowest percent of households with access to extension advice (50%) (Chart 3.16, Map 3.40).

### 3.7.6 Use of Improved Seeds

A total of 56,900 in the region used improved seeds. The first three leading districts based on the number of households, which used improved seeds were Korogwe (14,049), Lushoto (19,047), and Muheza (6,808). On the other hand, Mkinga had the smallest number of households using improved seeds (2,565). However, in terms of percent of area planted with improved seeds, Tanga had the highest percent (23%) closely followed by Pangani (20%) then Korogwe (17%), and Mkinga (11%). The other remaining districts had low percentage ranging between 8 and 4 of area planted using improved seeds (Map 3.41).

### 3.8 Erosion Control Facilities

A total of 27,417 (8%) households had erosion control/water harvesting facilities on their farms while 303,362 (92%) did not (Chart 3.17). On the other hand, distribution of districts by erosion control/water harvesting facilities shows that Lushoto had the largest number and percent of households (21,138, 22%) with these facilities. Generally, other districts recorded low percentages of households with erosion control facilities ranging from 1% (Tanga, Pangani, and Handeni) to 6% (Muheza) (Chart 3.18).

In terms of numbers, erosion control facilities in large number were terraces (118,089) followed by Vetiver grass (76,218), tree belts (52,858), and erosion control bunds (23,343). Other facilities were only in small numbers (Chart 3.19).

The number of erosion control structures varied greatly across districts. For example, there was no any erosion control/water harvesting facilities in Tanga. Pangani and Handeni while in the other districts only a limited number of facilities were reported (Table 3.11)

**Table 3.11: Number of Erosion Control/Water Harvesting Structures by Type and District**

District	Terraces	Erosion Control Bunds	Gabions / Sandbag	Vetiver Grass	Tree Belts	Water Harvesting Bunds	Drainage Ditches	Others
Lushoto	109,638	14,634	0	50,174	4,413	1,394	9,756	4,878
Korogwe	3,934	1,124	562	562	36,527	0	0	421
Muheza	825	4,539	413	8,253	11,657	0	619	103
Tanga	0	0	0	0	0	0	0	0
Pangani	0	656	0	0	0	0	0	0
Handeni	0	521	0	0	260	0	0	0
Kilindi	3,691	419	1,007	503	0	0	587	336
Mkinga	0	1,450	0	16,727	0	892	56	0
<b>Total</b>	<b>118,089</b>	<b>23,343</b>	<b>1,981</b>	<b>76,218</b>	<b>52,858</b>	<b>2,286</b>	<b>11,018</b>	<b>5,738</b>

Out of households with erosion control facilities, the highest percent was recorded in Lushoto (22%) while in other districts the proportion was small. Regarding percent of households that did not have erosion control facilities, these ranged from 99% (Tanga, Pangani, and Handeni) to 78% (Lushoto) (Table 3.12).

**Table 3.12: Number of Households with Erosion Control/Water Harvesting Facilities on their Land by District**

District	Presence of Erosion Control/Water Harvesting Facilities					
	Have any erosion control/water harvesting facilities		Do not have any erosion control/water harvesting facilities		Total	
	Number	%	Number	%	Number	%
Lushoto	21,138	22	72,937	78	94,075	100
Korogwe	1,405	2	55,493	98	56,898	100
Muheza	2,476	6	39,303	94	41,779	100
Tanga	91	1	15,539	99	15,629	100
Pangani	73	1	13,049	99	13,122	100
Handeni	391	1	52,327	99	52,718	100
Kilindi	1,342	4	32,635	96	33,977	100

<b>Total</b>	<b>27,417</b>	<b>8</b>	<b>303,362</b>	<b>92</b>	<b>330,779</b>	<b>100</b>

### 3.9 Livestock Results

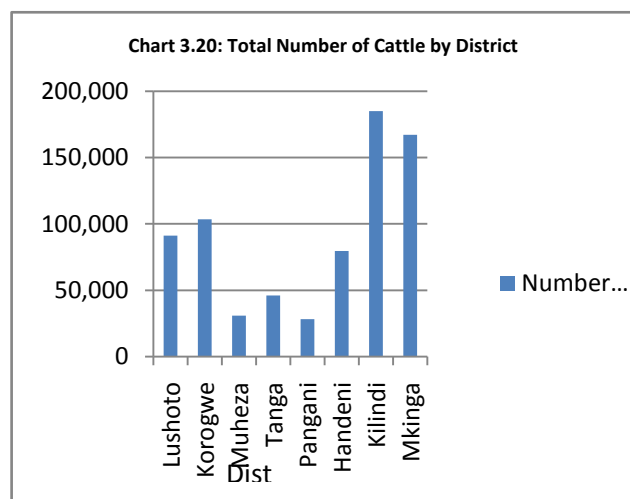

#### 3.9.1 Cattle Production

A total of 732,130 cattle were kept in the region and were divided in 74,670 households. Most of these households (62,306) kept indigenous cattle (688,114), which accounted for 94% of the total cattle population. In addition, 1,222 households kept 2,377 improved beef, which accounted for only 0.3% of the cattle while 16,728 households had 41,639 dairy cattle, which comprised 6% of the cattle population (Table 3.13).

**Table 3.13: Cattle Production: Number of Cattle by Type and District as of 1st October 2008**

Districts	Indigenous			Improved Beef			Improved Dairy			Total		
	Number of households	Number of Cattle	%	Number of households	Number of Cattle	%	Number of households	Number of Cattle	%	Number of households	Number of Cattle	%
Lushoto	33,449	70,847	78	232	465	0.5	9,524	19,976	22	40,882	91,288	100
Korogwe	10,396	100,450	97	281	421	0.4	1,264	2,669	3	11,380	103,540	100
Muheza	3,507	20,528	66	413	825	2.7	3,095	9,594	31	5,674	30,947	100
Tanga	1,314	39,685	86	45	136	0.3	1,586	6,252	14	2,356	46,072	100
Pangani	474	27,628	98	0	0	0.0	255	656	2	693	28,285	100
Handeni	5,597	79,011	99	0	0	0.0	391	651	1	5,727	79,662	100
Kilindi	4,446	184,818	100	84	84	0.0	168	168	0	4,446	185,070	100
Mkinga	3,122	165,147	99	167	446	0.3	446	1,673	1	3,513	167,266	100
<b>Total</b>	<b>62,306</b>	<b>688,114</b>	<b>94</b>	<b>1,222</b>	<b>2,377</b>	<b>0.3</b>	<b>16,728</b>	<b>41,639</b>	<b>6</b>	<b>74,670</b>	<b>732,130</b>	<b>100</b>

The district with the largest number of cattle is Kilindi with 185,070 (25.3%) followed by Mkinga (167,266, 22.8%), Korogwe (103,540, 14.1%). Other districts each had a cattle population of less than 100,000 with Pangani district having the smallest number of cattle (28,285, 0.04%) (Chart 3.20, Map 3.42). Although Kilindi had the largest number of cattle in the region, most (99.8%) of them were indigenous. Generally, the number of improved beef was insignificant and Lushoto had the largest number of dairy cattle (19,976, 22%) in the region (Chart 3.21). However, Tanga District had the highest density of cattle (92 head per km<sup>2</sup>) (Map 3.43).

### 3.9.2 Goat Production

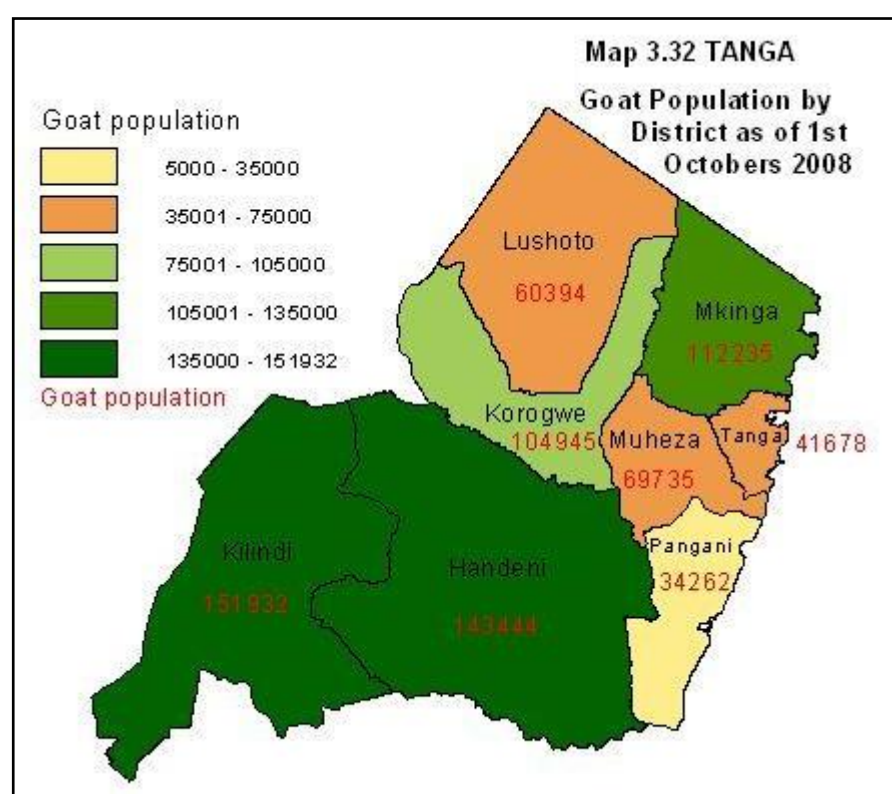

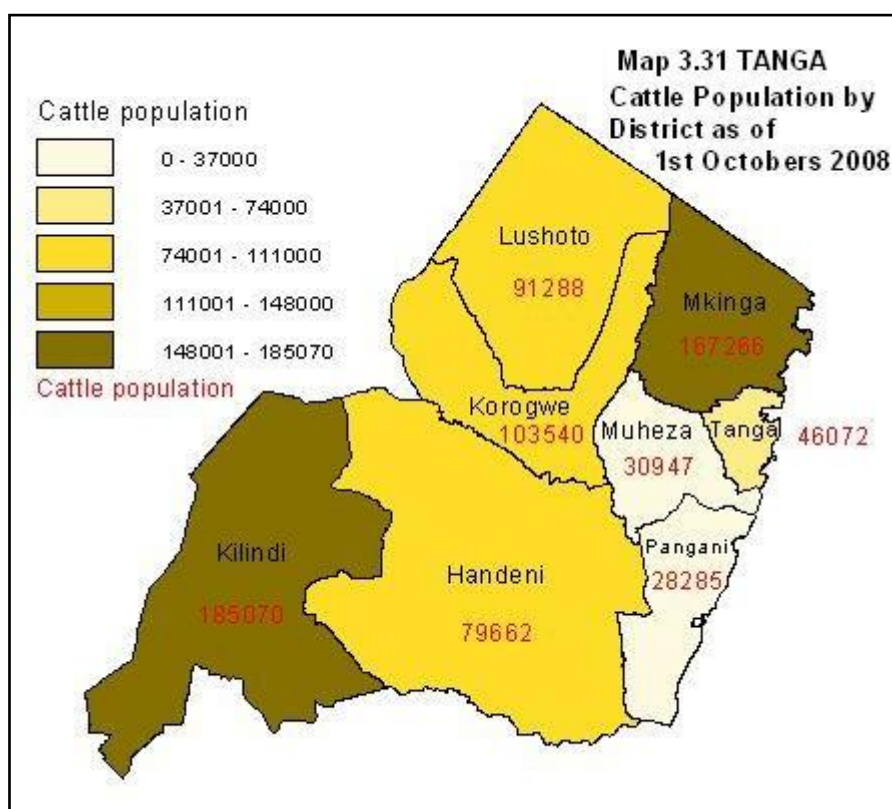

There were 9,648 households keeping 718,625 goats. Indigenous breeds dominates goat husbandry in the region as they constituted 98.2% of the goat population while dairy goats constituted only 1.8% (Table 3.14).

**Table 3.14: GOAT PRODUCTION: Number of Goats by Type and District as of 1st October 2008**

Indigenous			Improved for Meat			Improved Dairy			Total	
Number of households	Number of Goats	%	Number of households	Number of Goats	%	Number of households	Number of Goats	%	Number of households	Number of Goats
20,906	60,394	100.0	0	0	0.0	0	0	0.0	20,906	60,394
14,751	100,590	95.9	0	0	0.0	281	4,355	4.1	15,032	104,945
8,253	62,514	89.6	0	0	0.0	103	7,221	10.4	8,356	69,735
4,213	41,633	99.9	0	0	0.0	45	45	0.1	4,258	41,678
2,697	33,132	96.7	0	0	0.0	146	1,130	3.3	2,843	34,262
17,312	143,444	100.0	0	0	0.0	0	0	0.0	17,312	143,444
9,564	151,764	99.9	0	0	0.0	84	168	0.1	9,648	151,932
6300	112,235	100	0	0	0	0	0	0	9648	112,235
<b>83996</b>	<b>705706</b>	<b>100</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>659</b>	<b>12919</b>	<b>0</b>	<b>9648</b>	<b>718625</b>

Kilindi had the largest number of goats (151,932) followed by Handeni (143,444), Mkinga (112,235), and Korogwe (104,945). Other districts each had less than 100,000 goats (Chart 3.22, Map 3.44). However, in terms of density the district which had the highest density of goats is Mkinga (2,483) while the lowest density of goats was recorded in Lushoto (605) (Map 3.45).

### 3.9.3 Sheep Production

Sheep production was carried out in all districts in Tanga region. The total number of sheep was

216,983 with majority (56.5%) being she sheep. However, distribution varied greatly across districts. Kilindi (66,528, 30.7%), Lushoto (66,201, 30.5%), Mkinga (27,153, 12.5%), and Korogwe (26,131, 12%) were the first four

districts with the largest population of sheep. The population of sheep in other districts ranged from 7,029 (Handeni) to 9,078 (Muheza) (Chart 3.23, Map 3.46). Kilindi and Lushoto accounted for almost two-third of the sheep population in Tanga. Also there is variation of distribution of sheep by category. Except for castrated sheep, Kilindi had the largest number of almost all categories of sheep. Regarding density of sheep by district, Lushoto had the highest density (664), followed by Mkinga (601), and Kilindi (534). Other districts each had a density of sheep of less than 500 with Handeni having the lowest density (34) (Map 3.47).

### 3.9.4 Pig Production

Tanga region had a total of 17,155 pigs, which were distributed by category as follows: boar (3,669), castrated male (316), sow/gilt (7,587), male piglet (1,578), and she piglet (4,004) suggesting greater preference for sow/gilt. Distribution of pig population by district show that Muheza had the largest population

(6,086) followed by Handeni (3,515), Korogwe (2,950), and Tanga (2,718). Other districts had a small population of pigs (Chart 3.24, Map 3.48). Tanga District had the highest density of pigs (96)

followed by Muheza (75), Korogwe (34), Mkinga (21), Handeni (17), Lushoto (7), and Pangani (3) while Kilindi had the lowest density (1) (Map 3.49).

### 3.9.5 Chicken Production

The total number of households keeping chicken was 211,636 out of which 211,460 kept 2,092,981 indigenous chickens while 408 households raised 3,223 layers and the remaining 430 households raised 3,378 broilers. Muheza had the largest population of chickens with 471,123 chickens followed by Handeni (384,382), Lushoto with 336,116, Kilindi (238,007), and Korogwe (200,477). Other

districts each had less than 200,000 chickens (Chart 3.25, Map 3.50). The highest population density of chicken was recorded in Mkinga (31) followed by Tanga (21) Pangani (18), Muheza (14), and Lushoto while Handeni, Kilindi and Korogwe had a population density of less than 10 (Map 3.51).

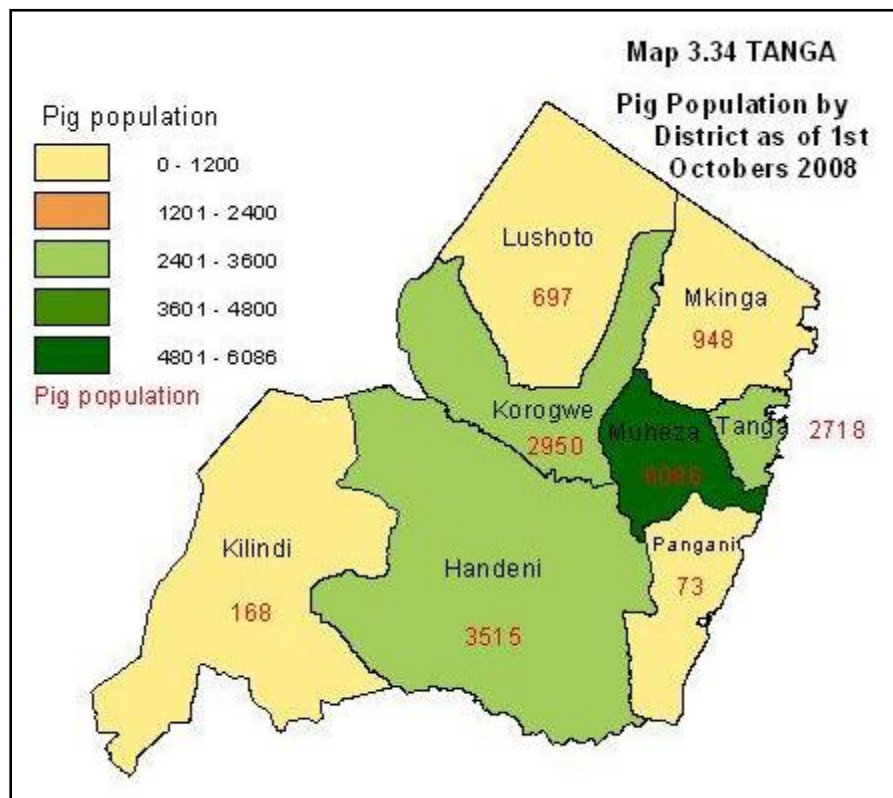

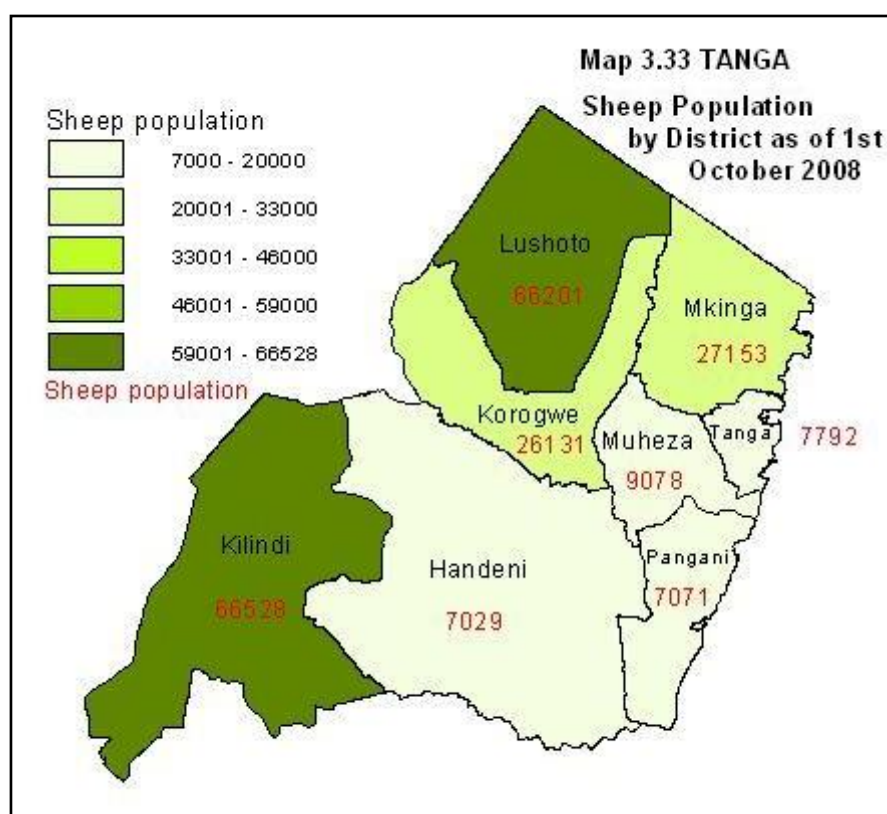

Majority of households (92%) kept indigenous chickens and Lushoto had the highest percent (95%) of indigenous chickens. Also Lushoto led in numbers of layers with 1,394 while Muheza had the largest number of broilers (2,373). Generally, in all districts there was greater preference for indigenous chickens over layers and broilers.

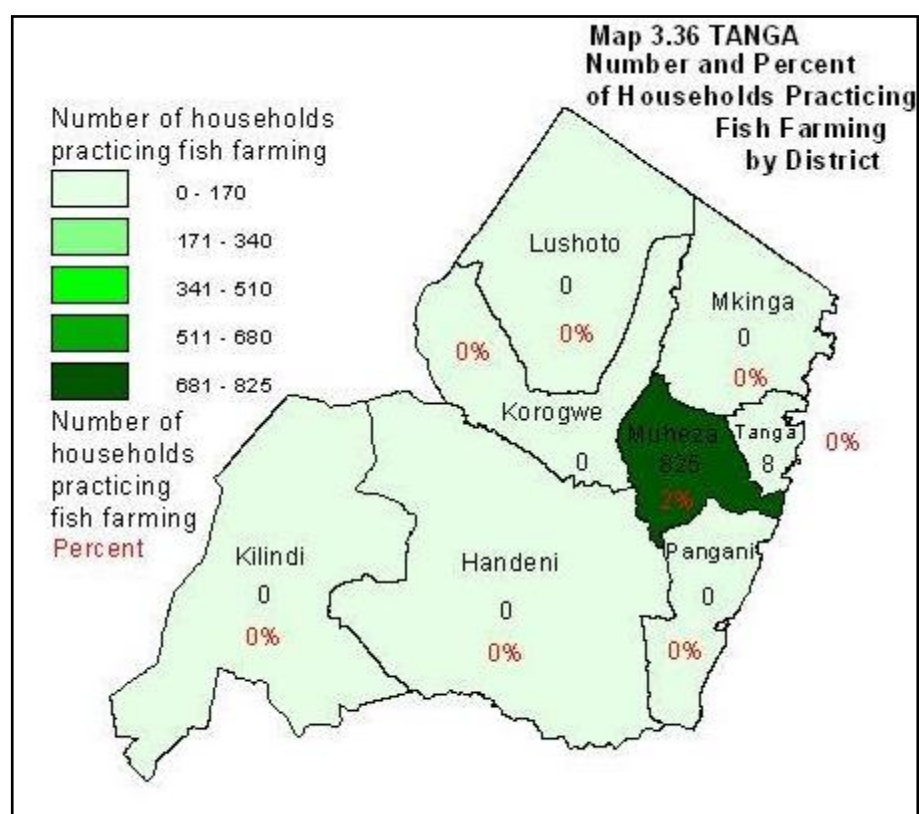

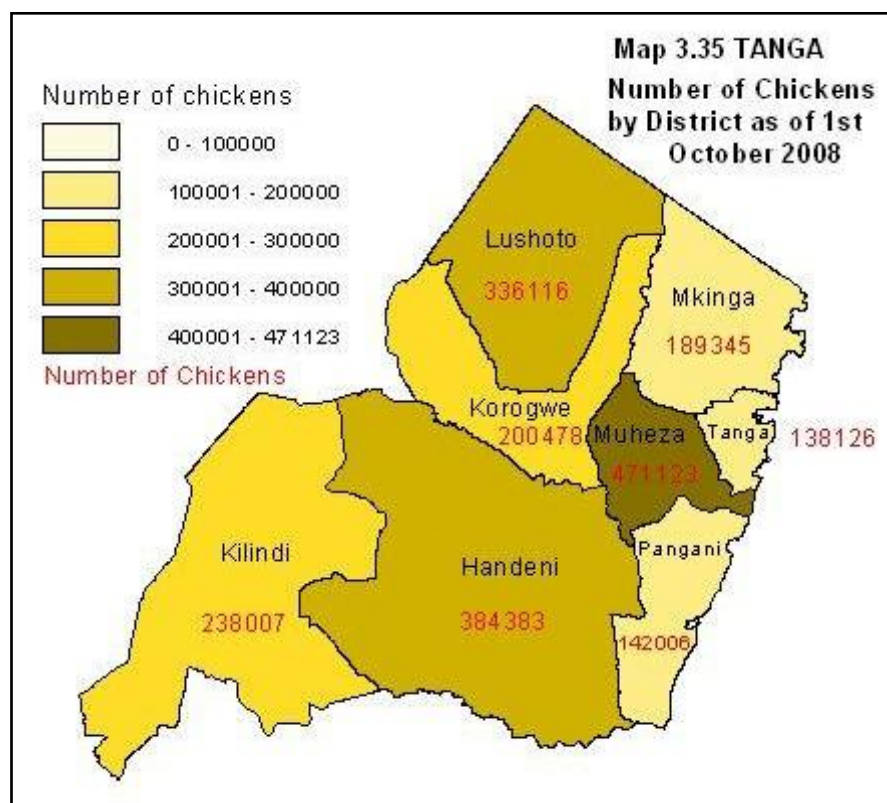

### Improved chicken

Distribution of improved chickens by district shows that Muheza had the largest number of broilers - while Lushoto had the largest number of layers. Also, Kilindi and Mkinga had households raising both broilers and layers though in small numbers while there were no records on both categories of improved chickens for Tanga, Korogwe and Handeni districts (Chart 3.26).

### 3.9.6 Fish Farming

Fish farming was not practised in the region except in Muheza district (Map 3.52) where dug out pond system was used by only 825 households. Besides, 186,819 (32,495 kg) fish were harvested while 516 households sold fishes to neighbor and 309 household did not sell their fish.

## 3.10 Poverty Indicators

### 3.10.1 Types of Toilets

Out of a total of 330,779 households, 275,691 (83%) used traditional pit latrines to dispose off human waste and 19,269 (6%) households reported using improved pit latrines while 31,316 (9%) reported not having toilets and instead disposed of human waste in the bush. Moreover, households with flush toilets accounted for only 1% (4,503) (Chart 3.27, Map 3.53).

### 3.10.2 Roofing Materials

Grass/leaves were used as roofing material by a total of 131,908 households in Tanga region. The largest number of these were found in Handeni (34,885), Korogwe came a distant second (18,545) closely followed by Mkinga (16,392), Muheza (16,093), Kilindi (14,094), Lushoto (11,150), and Tanga (10,872). Furthermore, Pangani had the smallest number of households using grass/leaves as roofing materials (9,878).

However, Pangani district had the highest percentage of households with grass/leaves roofing (75%) followed by Mkinga (73%), Tanga (70%), Handeni (66%), Kilindi (41%), Muheza (39%), and Korogwe (33%) while Lushoto recorded the lowest percentage (12%) (Map 3.54).

### 3.10.3 Access to Drinking Water

#### Main Source of Water in Dry Season

Households relied on various sources of drinking water during the dry season. However, the main sources of drinking water during this season were piped water (24%) followed by unprotected wells (21%) and surface water (20%). Other sources of water were less significant (Chart 3.28).

#### Distance to the Main Source of Water in Dry and Wet Seasons

Even though the distance to the main source of water varied by season, the difference in distances between dry and wet seasons did not seem to be quite significant. In fact, the highest percent (32%) of households indicated that the distance to the main source water during the wet season was 500-999m. Similarly, the highest percent (28%) of households mentioned that during the dry season

the main source of water was located 500-999m. Generally, the distance to the main source of water tended to increase during the dry season (Chart 3.29).

### 3.10.4 Food Consumption Pattern

#### 3.10.4.1 Number of Meals

A large number of households (230,409, 69%) had three meals per day. In contrast, 91,259 (28%) households had two meals per day while 9,110 (3%) ate only once. Specifically, Lushoto had the highest percent (above regional average) of 5% reporting to have eaten one meal while the rest recorded the number of meals below the regional average of

households who had eaten one meal. Similarly, Mkinga had the highest percent (43%) of households who had had two meals followed by Tanga (39%) and Lushoto (32%) while other districts had a lower percent than the regional average (28%). Only four out of eight (8) districts had households above the regional average (70%) that had three meals. These are Handeni (79%), Muheza (78%), Korogwe (76%), and Kilindi (71%) (Chart 3.30, Map 3.55).

### 3.10.4.2 Frequency of Consumption of Meat and Fish

A larger number of households did not eat meat (104,499) than those who had not eaten fish (46,241). Moreover, the largest number of households (140,361) had eaten meat once followed by 62,360 who ate meat twice and thrice (15,949) (Map 3.56). In the case of fish consumption, the largest number of households (82,725) reported to have eaten fish followed

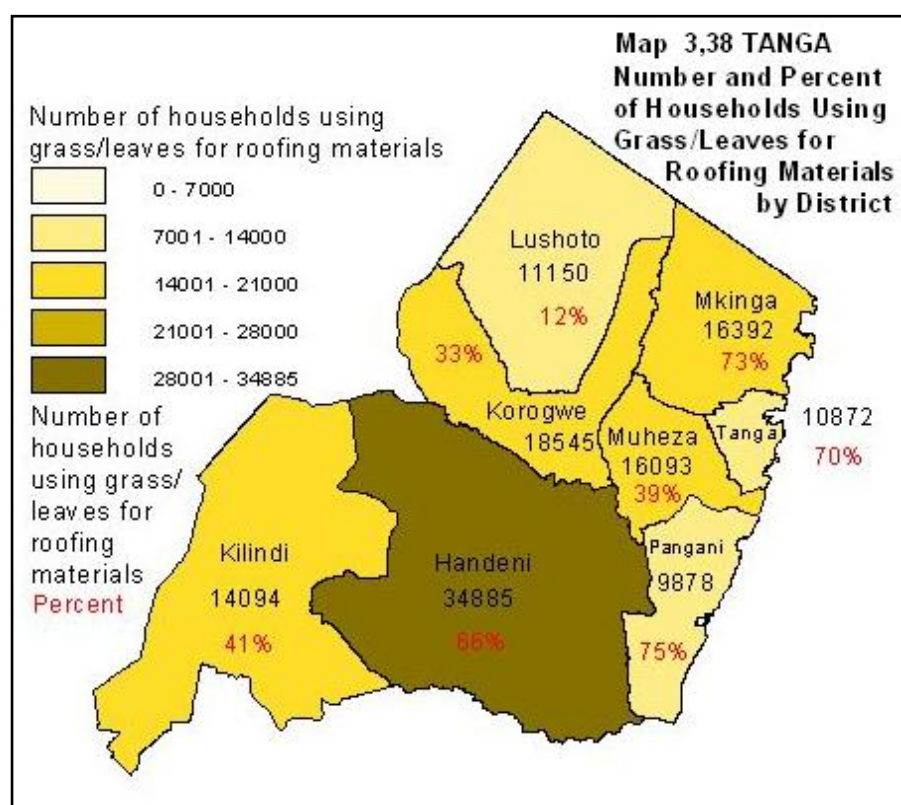

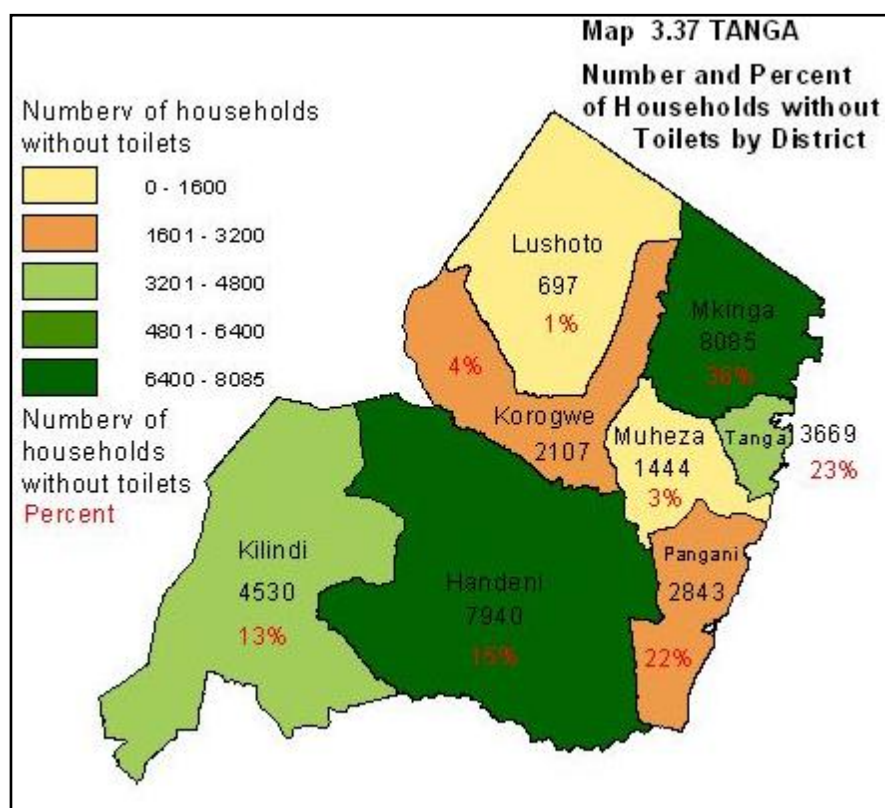

by those who said they had eaten fish twice (70,240) and those that ate fish thrice (51,129) (Chart 3.31, Map 3.57).

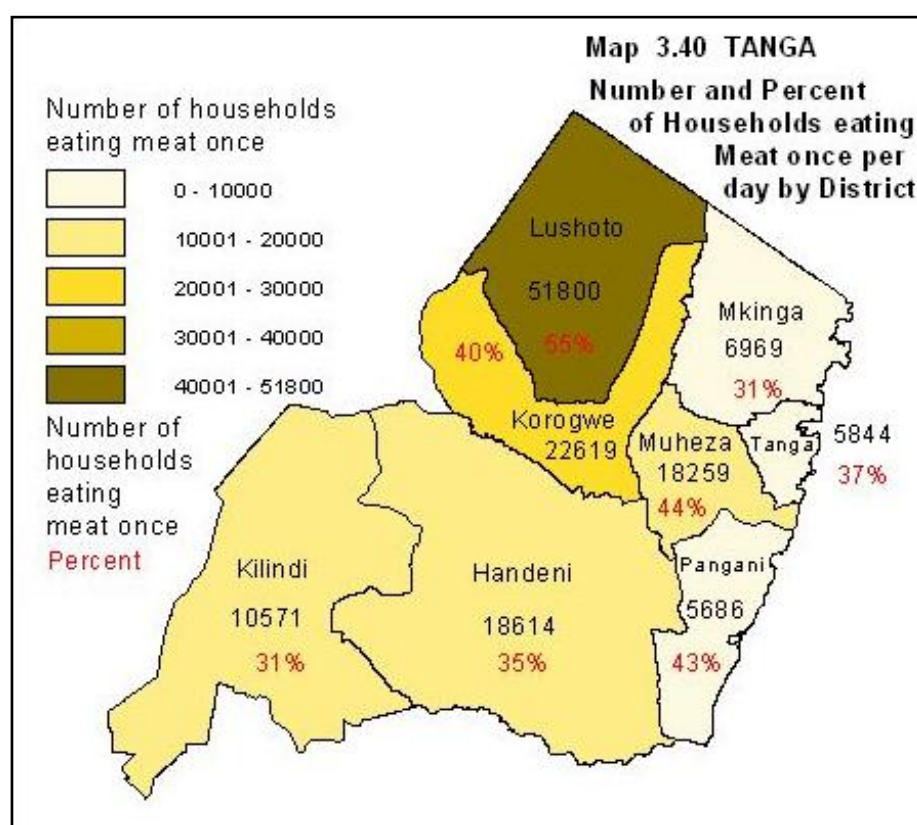

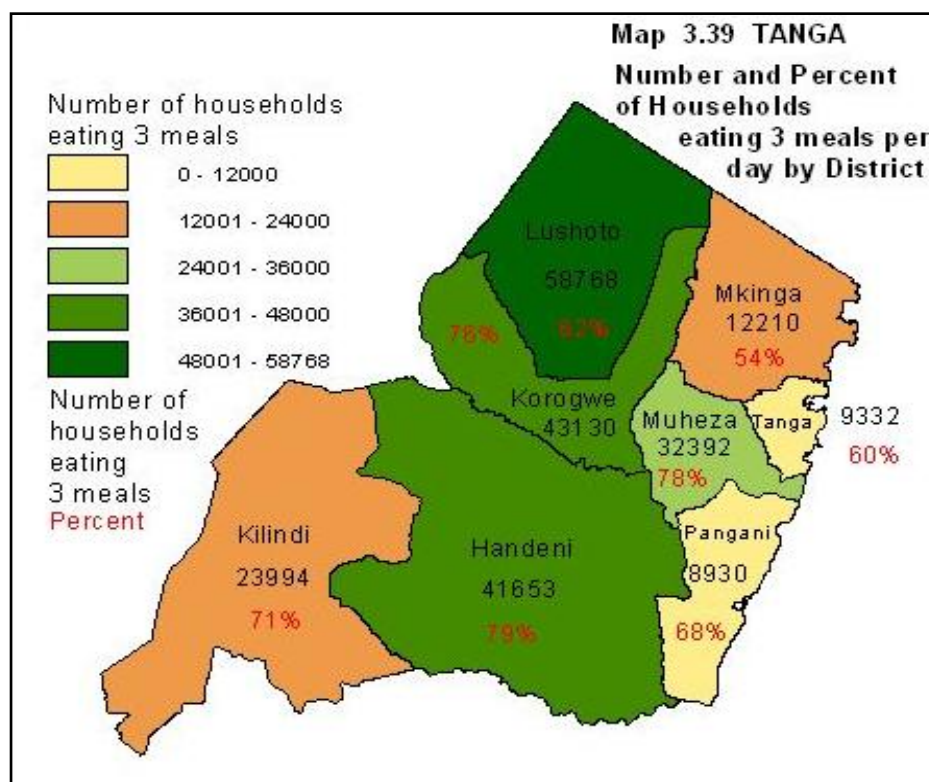

### 3.10.4.3 Food Security

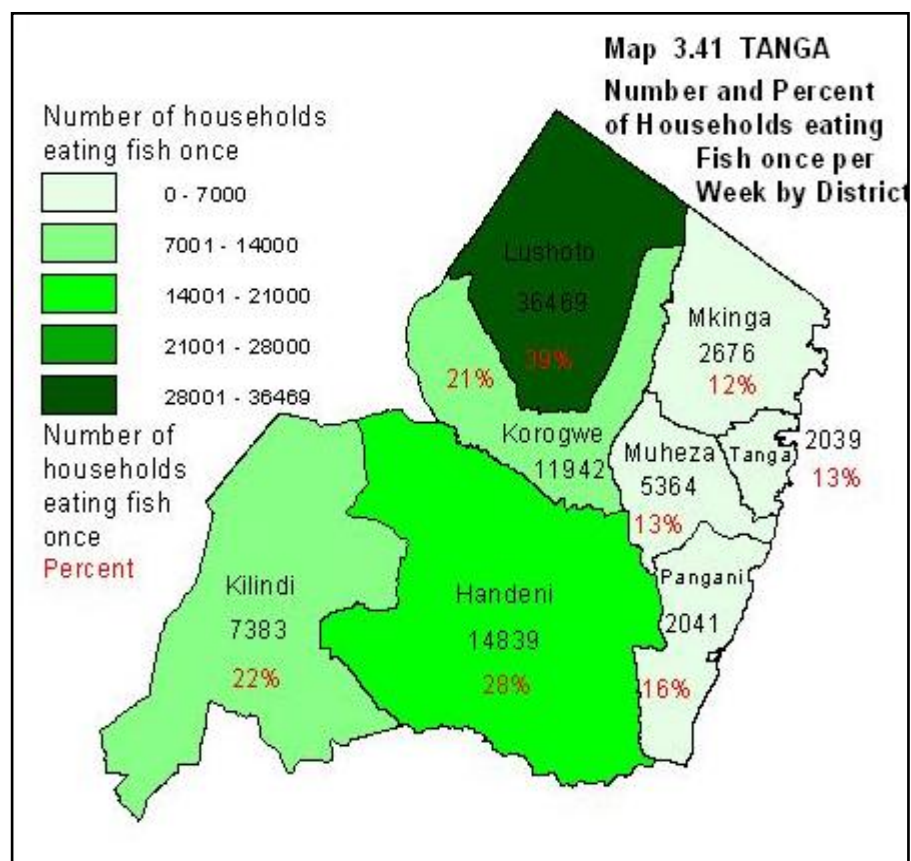

A total of 244,860 households experienced food insecurity. Of these Lushoto had the largest number (75,957) followed by Handeni (40,612), Korogwe (42,709), Muheza (28,472), Kilindi (19,044), Mkinga (16,336), Tanga (77,597), and Pangani (10,133).

Also, Lushoto had the highest percent of households that experienced food insecurity (23) followed by Korogwe (13%), Handeni (12%), Muheza (9%), Kilindi (6%), Mkinga (5%) Tanga (4%) and Pangani 3%) (Map 3.58).

## 4 TANGA PROFILES

This section presents the status of crops and livestock production, access to natural resources and services, demography and poverty for both the region as a whole and for each district.

### 4.1 Tanga Region Profile

The region profile describes the status of the Agriculture sector in the region and compares it with other regions in the country.

Tanga region has a land area of around 610,519 hectares under crop production and it has a relatively large number of crop growing households compared to other regions. It has the fifth largest number of crop growing households per square kilometer. The available land area per household is low (2.1 ha/household) with a utilized land area of 18 ha per crop growing households. Whilst most of the region is under annual crop production, it has significant areas of permanent crops mainly planted as a mixture with annual crops. It has the eighth largest planted area of cereals with Irish potatoes, tomatoes, maize, beans, cabbage, paddy, onion and chillies having the third largest planted area in the country. Production of watermelon, egg plant, carrot, and yams is low.

Tanga Region had the first largest area planted with oranges. Small quantities of durian, rambutan, guava, are produced.

Compared to other regions, Tanga has a decline in area planted with irrigation and the number of households practicing irrigation has remained more or less unchanged over the period of 15 years prior to the census. The source of irrigation water is equally split between rivers and canals. Gravity is the most common method of obtaining irrigation water closely followed by buckets/watering cans. Application of irrigation is equally split between buckets/watering cans and flood.

The method of cultivation in Tanga is almost entirely by hand. A very small quantity of fertilizer is used while pesticides are more or less used in the region. Compared to other regions, smallholder households in Tanga store moderate quantities of maize. Most of the storage is mostly in locally made traditional cribs while small amounts are stored in sacks or open drums.

A relatively high number of households sell crops compared to other regions. The large majority of households process their crops using their neighbour's machines and very few households sell their processed produce.

Tanga has an increase of 1.3% of livestock population in the country compared to 2002/03 agricultural census. Most of the cattle kept are indigenous, however there are more dairy cattle kept than in most other regions. Milk production is moderate and the farm gate price of milk is average. Furthermore, there is an increase of 204,005 goats between the two Agricultural Censuses (2002/03 and 2007/07) while a high increase of the population of sheep and pigs has also been observed. On the other hand, Tanga has a high population of chickens, almost entirely made up of indigenous types.

## ***4.2 District Profile***

The following district profiles highlight the characteristics of each district based on population, main crops, livestock, access to services and some poverty indicators.

### **4.2.1 Lushoto**

Like in other districts in Tanga region, Lushoto had the highest percent of male-headed households (74%) than female headed households (26%).

Lushoto had the fourth highest percent (78%) of literacy rate in the region after Muheza (82%), Pangani (80%) and Tanga (80%).

Lushoto had the highest percent (92%) of land utilization in the region. Besides, the district accounted for the high percent (38%) of the area planted during the dry season. Besides, the district had 46% the area grown to maize and the highest (50%) percent of the area planted with fertilizer in the region.

Lushoto had the largest area under irrigation (4,177 ha) followed by Korogwe (3,799 ha). In fact the area under irrigation in the two districts accounted for about 86% of the total area under irrigation in the region. Also it ranked second (4.6%) after Korogwe which had 5.5% of percent of the area planted with irrigation.

Lushoto had the second highest percent (16.5%) of households which stored their crops after Korogwe (21%) followed by Handeni (15%) and Muheza (13%) and was among the first three districts with the largest number of households which sold crops. Specifically, Lushoto had, 108,942 (81%) households, followed by Korogwe (53,105 39%), and Handeni ( 48,682 36%).

Lushoto had the highest percent households with access to extension advice (83%, 78,048) and had the first largest number of households, which used improved seeds (19,047) followed by Korogwe (14,049).

Lushoto had the second largest number of sheep (66,201, 30.5%) after Kilindi (66,528, 30.7); the third largest population of chicken (336,116).

Regarding poverty indicators, the district had the fifth largest number of households, which used grass/leaves (11,150); the highest percent (above regional average of 5%) of households reporting to have eaten one meal and third highest percent (32%) of households who ate two meals. On the other hand, it recorded the third highest percent (74%) of households that experienced food insecurity.

#### **4.2.2 Korogwe**

Korogwe recorded the highest density of agricultural households in the region (664/km<sup>2</sup>). As in most other districts, majority of households in Korogwe were male-headed. Korogwe (77%) together with Muheza (81.6%), Tanga (80.5%), Pangani (79.6%), and Lushoto (78.4%) recorded a literacy rate above the regional average.

In Korogwe as in Muheza, Tanga and Pangani had a land utilization of 86%, 95% and 94% respectively. Out of the land planted during the dry season, Korogwe recorded the lowest percent. The district had the third largest area planted with maize (54,273 ha) after Handeni (79,794 ha) and Kilindi (55,896 ha). And recorded the first largest area planted with paddy (4,162 ha).

Korogwe had the second largest area planted with irrigation (3,799 ha) after Lushoto (4,177 ha). In fact, the area under irrigation in the two districts accounted for about 86% of the total area under

irrigation in the region. Korogwe District had the second largest number of households that sold crops (53,105, 39%) after Lushoto (108,942, 80.6%) households

Korogwe had the second highest percent (71%) of household having access to crop extension advices after Lushoto (83%). Furthermore, it had the first largest number of households, which used improved seeds and the second highest percent (25%) after Tanga (26%) of households using improved seeds.

The district had the fourth largest population of sheep (26,131, 12%) after Kilindi (66,528, 30.7%), Lushoto (66,201, 30.5%), and Mkinga (27,153, 12.5%) and also it had the fourth largest population of chicken (200,477).

The total number of households using grass/leaves as roofing material in Lushoto was 18,545 making the district rank second in the region after Handeni (34,885). Also it had the third highest percent (76%) of households that had three meals in the region and together with Muheza district had the fifth highest percent (56%) of households reporting food insecurity.

#### **4.2.3 Muheza**

Muheza District had the third highest density of agricultural households (515/km<sup>2</sup>). As in Korogwe, Muheza, Tanga, Handeni, Kilindi and Mkinga majority of households were headed by males.

Muheza District recorded the highest literacy rate (81.6%) followed by Tanga (80.5%), Pangani (79.6%), Lushoto (78.4%), and Korogwe (77%) and it had the lowest illiteracy level (18.4%). Furthermore, when both Swahili and English are combined, Muheza had the highest percent of literacy rate (7.1%).

In Muheza land utilization was 95%. More specifically, it had the largest recorded planted with maize (48,526.25 ha). Also it had the second largest area planted with paddy (689 ha) after Korogwe (4,162 ha).

The district had the third largest area planted with irrigation (179 ha) and fifth highest percent (0.4%) of area under irrigation.

Muheza had 13% of households which stored crops and with Korogwe had the third highest percent of households with access to extension advice (71%) after Lushoto (83%) as well as the third largest number of households using improved seeds (6,808) but ranked poorly in terms of percent of households using improved seeds.

Muheza had the first largest population of chickens (471,123) followed by Handeni (384,382), Lushoto (336,116), Kilindi (238,007), and Korogwe (200,477). It had the second highest percent (78%) after Handeni (79%) of households reporting eating three meals. On the other hand, with Korogwe it recorded the fifth highest percent of households reporting food insecurity (56%).

#### **4.2.4 Tanga**

Tanga District had the second highest density of households (553/km<sup>2</sup>) after Korogwe (664/km<sup>2</sup>).

Tanga had the second highest literacy rate (80.5%) after Muheza (81.6%) and recorded the highest literacy rate in Swahili (74.8%).

Tanga recorded a land utilization of 93 % and had the smallest area planted with maize (7,896 ha).

The District had the fifth highest percent of households storing crops (3%) and had the lowest percent of households selling crops (4.1%).

It had the fourth highest percent of crop growing households reporting access to extension advice (67%) after Lushoto (83%), Korogwe (71%) and Muheza (71%). In addition, it had the highest percent (26%) of households using improved seeds and had the lowest percent of households with erosion control facilities (1%).

Tanga District had the third largest percent (70%) of households using grass/leaves as roofing material after Mkinga (73%), and (75%) of Pangani. It had the second highest percent of households that ate two meals (39%) after Mkinga (43%) while recording below the regional average (60%) of households eating three meals. Moreover, it had the sixth highest percent of households experiencing food insecurity (50%).

#### **4.2.5 Pangani**

In Pangani District majority of households were headed by females. The District had the third highest literacy rate (79.6%).

Pangani had 88.6% of land utilization and recorded the smallest planted area (12,703 ha).

It had the third largest planted area with cassava (30 ha) after Kilindi (102 ha) and Lushoto (89 ha). However, it had the third largest planted area per cassava growing households (0.40 ha) after Kilindi (0.61 ha).

Pangani and Handeni are the only two districts where no irrigation was done.

The district had the lowest percent (3%) of households storing crops. The other districts were Tanga (3%) and Mkinga (4%). Also, commercial banks were the sole source of credit in the district.

Besides, the district had the fifth highest percent of crop growing households reporting access to extension advice (67%) and had the third highest percent of households using improved seeds (24%).

It terms of poverty indicators, Pangani had the highest percent of households using grass/leaves as roofing materials (75%) and the lowest percent of households experiencing household food insecurity (47%).

#### **4.2.6 Handeni**

Handeni had the lowest density of agricultural households in the region (255/km<sup>2</sup>). Majority of households in the district were male-headed. This was also the case for all other districts in the region. It also recorded a literacy rate below the regional average (68%).

Handeni recorded the lowest land utilization (83.5%) but had the second largest planted area (96,339 ha) after Lushoto (96,426 ha), followed by Kilindi (79,064 ha), Korogwe (68,812), Muheza (55,842), Mkinga (17,288), Pangani (12,703) and Tanga (9,251),

Handeni had the largest area planted with maize (79,794 ha) followed by Kilindi (55,896 ha), and Korogwe (54,273 ha) and the second largest planted area per maize growing households (1.18) after Kilindi (1.33 ha). It had the smallest area per paddy growing households (0.4 ha).

Handeni had the highest percent of planted area without fertilizer (100%) and with no crops planted with irrigation. However, the district had the fourth highest percent of crop growing households, which stored crops (15%) and the third largest number of crop selling households (48,682, 36%).

Handeni recorded the lowest percent of households with access to extension advice (53%) and the lowest percent of households using improved seeds (8%).

The District had the second largest population of chickens (384,382) after Muheza (471,123).

Handeni had the highest percent (66%) of households using grass/leaves as roofing material and the second highest percent of households reporting food insecurity (76%).

#### **4.2.7 Kilindi**

Kilindi District recorded the lowest literacy level in the region (62%); the highest rate of illiteracy level (40%). Also, it had the lowest percent of literacy when both Swahili and English are combined (3%).

Kilindi and Mkinga recorded the lowest utilized land (85%) each. However, the district recorded the second largest planted area (79,064 ha) after Handeni (96,339 ha).

Kilindi had the second largest area planted with maize (55,896 ha) after Handeni (79,794 ha) and recorded the first largest planted area per crop growing households (1.33 ha) followed by Handeni (1.18). Furthermore, it had the largest planted area with cassava (102 ha) followed by Lushoto (89 ha) and the largest planted area per cassava growing households (0.61 ha).

Kilindi had the second highest percent of area planted without fertilizer (Kilindi) but had the third highest percent of area planted with irrigation (0.9%) after Korogwe (5.5%) and Lushoto (4.6%).

Kilindi had the fifth highest percent of crop selling households (26%) and was also the only district where family/friends were only used as sources of credit. It had the sixth highest percent of crop growing households reporting access to extension advice (66%) and was among districts with less than 20% of households using improved seeds.

The district had the first largest population of sheep (66,528, 30.7%) and the fourth largest population of chickens (238,007).

Kilindi had the fourth largest number of households using grass/leaves as roofing material.

Kilindi is one of the four districts which recorded households having three meals per day higher than the regional average (71%) and had the fourth highest percent of households experiencing food insecurity (61%).

#### **4.2.8 Mkinga**

Mkinga had the sixth lowest percent of land utilization (86%) and had the second highest percent of the area planted during the dry season (64%) after Lushoto (71%)

It had the fourth highest percent of land area planted with irrigation (0.8%) and had the lowest percent of households, which reported storing crops (2%).

It is one of the districts with the lowest recorded percent of households with access to crop extension advice (50%) followed by Handeni (53%).

The District had the smallest number of households using improved seeds (2,565). Also, it is one of the districts with low percent of households having erosion control facilities

The District had the third largest population of sheep (27,153, 12.5%).

Mkinga had the third largest number of households using grass/leaves for roofing material (16,392). However, it had the highest percent (43%) of households reporting having two meals followed by Tanga (39%). Moreover, it had the highest percent of households experiencing food insecurity (80%).

## 5. APPENDICES

Appendix I Tabulation List.....	71
Appendix II Tables.....	88
Appendix III Questionnaires.....	318

**APPENDIX I TABULATION LIST**

2.1.1	TYPE OF AGRICULTURE HOUSEHOLD: Number of Households by type of Household and District during 2007/08 Agriculture year .....	88
2.1.2	TYPE OF AGRICULTURE HH: Number of Agriculture Households by type of Holding by District during 2007/08 Agriculture year .....	88
2.2 T	YPE OF AGRICULTURE HOUSEHOLD: Number of Agriculture Households By Type and Size of Holding and District , 2007/08 Agricultural Year - TANGA.....	89
2.3 T	YPE OF AGRICULTURE HOUSEHOLD: Number of Agriculture Households By Type and Size of Holding and District , 2007/08 Agricultural Year - TANGA.....	89
HOUSEHOLD DEMOGRAPH.....		90
3 .2:	Number of Household Members classified by District and Sex .....	91
3.1	Number of Heads of Agricultural Households by sex of head and District, 2007/08 Agricultural Year.....	91
3.1	HOUSEHOLDS DEMOGRAPHYS: Number of Agricultural Household Members By Sex and Age Group, 2007/08 Agricultural Year, Tanzania.....	92
3.6	Number of Heads of Agricultural Households by Marital Status, sex of head and District, 2007/08 Agricultural Year .....	93
3.7	Number of Heads of Agricultural Households by Survival of Female Parent, sex of head and District, 2007/08 Agricultural Year.....	94
3.8	Number of Heads of Agricultural Households by Survival of Male Parent, sex of head and District, 2007/08 Agricultural Year.....	95
3 .9	HOUSEHOLD DEMOGRAPHYS: Number of Household Members Who Can Read and Write languages by type of language and District .....	95
3.10	Number of Heads of Agricultural Households By Status of writing and reading Languages, sex of head and District, 2007/08 Agricultural Year.....	96
3.11	Number of Agricultural Household Members reporting Literacy levels by Sex of Member and District, 2007/08 Agricultural Year .....	97
3.12	Number of heads of Agricultural households reporting Literacy levels by Sex of Member and District, 2007/08 Agricultural Year .....	97
3 .13	HOUSEHOLD DEMOGRAPHYS: Number of Household Members by Education Status and District .....	98

3.14	Number of Heads of Agricultural Households by Education Status, sex of head and District,, 2007/08 Agricultural Year.....	98
3.14	Number of Heads of Agricultural Households by Education Status, sex of head and District,, 2007/08 Agricultural Year.....	98
3.15	HOUSEHOLDS DEMOGRAPHYS: Number of Agricultural Household Members By Level of Formal Education Completion and District, 2007/08 Agricultural Year.....	99
3.16	HOUSEHOLDS DEMOGRAPHYS: Number of Agricultural Household Members By Level of involvement in Farming Activivty and District, 007/08 Agricultural Year.....	100
3.17	HOUSEHOLDS DEMOGRAPHYS: Number of Agricultural Household Members By Main Activity and District, 2007/08 Agricultural Year.....	100
LAND OWNERSHIP AND LAND USE.....		102
4.1	LAND ACCESS/OWNERSHIP: Number of Farming households by type of land Ownership/Tenure and District for the 2007/08 agriculture year .....	103
4.2	LAND ACCESS/OWNERSHIP: Area of land (ha) by Ownership/Tenure and District for the 2007/08 agriculture year.....	103
4.3	LAND SUFFICIENCY: Number of Agriculture Households by Whether All Land Available to the Household Was Used during 2007/08 agriculture year and District.....	104
4.4	LAND SUFFICIENCY: Number of Agriculture Households by Whether they Consider Having Sufficient Land for the Household and Districtn during 2007/08 agriculture year .....	104
4.5	LAND ACCESS/OWNERSHIP/TENURE: Number of Agriculture Households By Whether Female Members of the Household Own or Have Cusomary Right to Land By District during 2007/08 Agriculture year.....	104
4.6	LAND USE: Number of Agriculture Households by Type of Land Use and District for the 2007/08 agriculture year .....	105
4.7	LAND USE: Area of Land (ha) by land use and District for the 2007/08 agriculture year .....	105
CROP OWNERSHIP.....		106
5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Lushoto .....	107
5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Korogwe.....	108
5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Muheza.....	109

5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Tanga .....	110
5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Pangani.....	111
5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Handeni.....	112
5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Kilindi .....	113
5.1.1	Planted Area by Crop and Sex of Household members owning most of the crop for the agriculture year 2007/08 Short and Long Season- Mkinga.....	114
5.1.1	Number of Household members owning most of the crop by Sex of the Main Owner and District for the agriculture year 2007/08 Long Season -TANGA REGION.....	115
5.1.1	Planted Area - TANGA REGION and Sex of Household members owning most of the crop for the agriculture year 2007/08 Long Season-TANGA REGION .....	115
CROP PRODUCTION BY REGION .....		116
5.6	ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agricultural Households, Area Planted (ha) and Quantity Harvested (tonnes) during Short Rainy SEASON Agricultural Year 2007/08.....	117
5.7	ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households, Area Planted (ha) and Quantity Harvested (tonnes) during Long Rainy SEASON Agricultural Year 2007/08.....	121
5.7	ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households, Area Planted (ha) and Quantity Harvested (tonnes) during Short and Long Rainy SEASON Agricultural Year 2007/08 .....	125
CROP PRODUCTION –GENERAL .....		130
5.9	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Crop Growing Households and Area Planted (ha) by Season and District .....	131
5.10	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of crop growing Households Planting Crops by Season and District.....	131
5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Lushoto.....	132
5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Korogwe.....	133

5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Muheza.....	134
5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Tanga.....	135
5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Pangani.....	136
5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Handeni .....	137
5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Kilindi .....	138
5.11	TOTAL ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Agriculture Households by Area Planted (ha) and crop for the agriculture year 2007/08 Short and Long Season - Mkinga .....	139

5.27:	ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Households and Planted Area by Inorganic Fertiliser Use and District - LONG RAINY SEASON.....	186
5.28:	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Fungicide Use and District - Short Rainy Season.....	186
5.29:	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Fungicide Use and District - Long Rainy Season .....	186
5.30 :	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Herbicide Use and District - Short Rainy Season .....	187
5.31:	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Herbicide Use and District - Long Rainy Season .....	187
5.32:	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Improved Seed Use and District - Short Rainy Season.....	187
5.33:	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Improved Seed Use and District - Long Rainy Season .....	188
5.34	ANNUAL CROP AND VEGETABLE PRODUCTION: Number of crop Growing Households and Planted Area (hectare) by Local Seed Use and District; 2007/08 Agriculture Year - SHORT Rainy Season .....	188
5.36:	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Insecticides Use by District - SHORT RAINY SEASON .....	189
5.37:	ANNUAL CROP & VEGETABLE PRODUCTION: Number of Households and Planted Area by Fungicide Use and District - Long Rainy Season .....	189

5.38:	ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Households and Planted Area by Irrigation Use and District -SHORT RAINY SEASON .....	190
5.39:	ANNUAL CROP AND VEGETABLE PRODUCTION: Number of Households and Planted Area by Irrigation Use and District -LONG RAINY SEASON .....	190
MARKETING .....		191
5.40	MARKETING: Number of Crop Producing households reporting Selling agricultural produce during 2007/08 by District and Season .....	192
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - LUSHOTO, SHORT RAINY SEASON .....	193
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - LUSHOTO, LONG RAINY SEASON .....	195
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - KOROGWE, SHORT RAINY SEASON .....	197
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - KOROGWE, LONG RAINY SEASON .....	199
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - MUHEZA, SHORT RAINY SEASON .....	201
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - MUHEZA, LONG RAINY SEASON .....	203
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - TANGA, SHORT RAINY SEASON.....	205
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - TANGA, LONG RAINY SEASON .....	207
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - PANGANI, SHORT RAINY SEASON .....	209
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - PANGANI, LONG RAINY SEASON .....	211

---

5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - HANDENI, SHORT RAINY SEASON .....	213
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - HANDENI, LONG RAINY SEASON .....	215
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - KILINDI, SHORT RAINY SEASON .....	217
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - KILINDI, LONG RAINY SEASON .....	218
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - MKINGA, SHORT RAINY SEASON .....	220
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - MKINGA, LONG RAINY SEASON .....	222
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - TANGA REGION, SHORT RAINY SEASON .....	224
5.41	MARKETING PROBLEMS: Number of Households Reporting Marketing Problems for agricultural products by Crop - TANGA REGION, LONG RAINY SEASON .....	226
	PERMANENT CROPS .....	228
5.3.1	PERMANENT CROPS: Number of Households Planting Permanent Crops by District , 2007/08 Agriculture Year - TANGA .....	229
5.3.2:	PERMANENT CROPS: Planted Area and Area Harvested by Type of Planting and District.....	229
5.3.3	PERMANENT CROPS: Area Planted, Area harvested, Quantity Harvested and Yield by Type of Permanent Crop-Lushoto .....	229
5.3.3	PERMANENT CROPS: Area Planted, Area harvested, Quantity Harvested and Yield by Type of Permanent Crop-Korogwe .....	230
5.3.3	PERMANENT CROPS: Area Planted, Area harvested, Quantity Harvested and Yield by Type of Permanent Crop-Muheza .....	230
5.3.3	PERMANENT CROPS: Area Planted, Area harvested, Quantity Harvested and Yield by Type of Permanent Crop-Handeni.....	231

---

5.3.3	PERMANENT CROPS: Area Planted, Area harvested, Quantity Harvested and Yield by Type of Permanent Crop-Kilindi .....	231
5.3.3	PERMANENT CROPS: Area Planted, Area harvested, Quantity Harvested and Yield by Type of Permanent Crop-Mkinga .....	231
5.3.5:	PERMANENT CROPS: Mono and Mixed Crops by Area Planted, Area Harvested and Quantity Harvested, Type of Planting Crops and District - TANGA .....	233
ACCESS TO EQUIPMENTS.....		236
6.1.1	ACCESS TO EQUIPMENT: Number of Agriculture Households that used Agricultural Equipment/Asset by type and District for 2007/08 agriculture year .....	237
6.1.2	ACCESS TO EQUIPMENT: Number of Agricultural Equipment/ Asset owned by type and District for 2007/08 agriculture year .....	238
6.2.1	ACCESS TO EQUIPMENT: Number of Agricultural Households that Used Tractors/Draft animals to cultivate Land By Type and District for 2007/08 agriculture year .....	239
6.2.2	ACCESS TO EQUIPMENT: Number of Tractors/Draft animals Owned by Type and District for 2007/08 agriculture year.....	239
IRRIGATION .....		240
6.5.1:	IRRIGATION: Number of Agriculture Households reporting use of Irrigation during 2007/08 agricultural Year by District .....	241
6.5.2:	IRRIGATION: Number of Agriculture Households using irrigation by Source of Irrigation Water by region during the 2007/08 agricultural Year .....	241
6.5.3	IRRIGATION: Number of Agriculture Households by method of used to obtain water and District during 2007/08 agriculture year .....	241
EROSION CONTROL .....		242
6.6.1	EROSION CONTROL: Number of Households with Soil Erosion Problem on their Land By District .....	243
6.6.2	EROSION CONTROL: Number of Households with Erosion Control/Water Harvesting Facilities on their Land By District.....	243
6.6.3	EROSION CONTROL: Number of Erosion Control/Water Harvesting Structures by Type and District as of 2007/08agriculture year .....	243
AGRICULTURE CREDIT.....		244
7.1	AGRICULTURE CREDIT: Number of Agriculture Households receiving Credit by District During the 2007/08 Agriculture Year.....	245
7b	AGRICULTURE CREDIT: Number of Credits by sex of the household Member receiving credit During the 2007/08 Agriculture Year - TANGA REGION....	245

7d	AGRICULTURE CREDIT: Number of Households Reporting the Main reasons for Not Using Credit - TANGA REGION During the 2007/08 Agriculture Year - TANGA REGION.....	245
7.5	AGRICULTURE CREDIT: Number of Households receiving Credits by Main Source of credit B and region During the 2007/08 Agriculture Year .....	246
7.5	AGRICULTURE CREDIT: Number of Households receiving Credits by Main Source of credit C and region During the 2007/08 Agriculture Year .....	246
7.7:	Provision of credit A by sex and District During the 2007/08 Agriculture Year .....	246
7.9 :	Provision of credit C by sex and District During the 2007/08 Agriculture Year .....	247
	CROP EXTENSION .....	248
8.1 :	CROP EXTENSION: Number of Agriculture Households that received Crop Advice During the 2007/08 Agriculture Year .....	249
8.2 :	CROP EXTENSION: Number of Agriculture Households Participated in Out Grower Agreement During the 2007/08 Agriculture Year.....	249
8.3 :	CROP EXTENSION: Number of Agriculture Households Participated in Contract Production Agreement During the 2007/08.....	249
8.4 :	EXTENSION MESSAGES: Number of Agriculture Households By Source of Extension Messages By District During the 2007/08 Agriculture Year .....	250
8.5	CROP EXTENSION: Number of households receiving extension advice on Spacing by District during the 2007/08 agriculture year .....	250
8.6	CROP EXTENSION: Number of households receiving extension advice on Use of Agrochemicals by District during the 2007/08 agriculture year .....	251
8.7	CROP EXTENSION: Number of households receiving extension advice on Erosion Control by District during the 2007/08 agriculture year .....	251
8.8	CROP EXTENSION: Number of households receiving extension advice on Organic Fertilizer use by District during the 2007/08 agriculture year.....	252
8.9	CROP EXTENSION: Number of households receiving extension advice on use of Inorganic Fertilizer by District during the 2007/08 agriculture year .....	252
8.10	CROP EXTENSION: Number of households receiving extension advice on Use of Improved Seeds by District during the 2007/08 agriculture year .....	253
8.11	CROP EXTENSION: Number of households receiving extension advice on Mechanization and Labor Saving Technologies by District during the 2007/08 agriculture year .....	253
8.12	CROP EXTENSION: Number of households receiving extension advice on Irrigation Technologies by District during the 2007/08 agriculture year .....	254

8.13	CROP EXTENSION: Number of households receiving extension advice on Crop Storage by District during the 2007/08 agriculture year .....	254
8.14	CROP EXTENSION: Number of households receiving extension advice on Vermin Control by District during the 2007/08 agriculture year.....	255
AGRICULTURE CONSRAINTS .....		256
9.11.1	AGRICULTURE CONSTRAINTS: Number of Agricultural Households Reporting the FIRST most important Constraint by District, 2007/08 Agricultural Year .....	257
9.11.2	AGRICULTURE CONSTRAINTS: Number of Agricultural Households Reporting the SECOND most important Constraint by District, 2007/08 Agricultural Year .....	258
9.11.3	AGRICULTURE CONSTRAINTS: Number of Agricultural Households Reporting the THIRD most important Constraint by District, 2007/08 Agricultural Year .....	260
9.11.4	AGRICULTURE CONSTRAINTS: Number of Agricultural Households Reporting the FOURTH most important Constraint by District, 2007/08 Agricultural Year .....	261
9.11.5	AGRICULTURE CONSTRAINTS: Number of Agricultural Households Reporting the FIFTH most important Constraint by District, 2007/08 Agricultural Year .....	263
CATTLE PRODUCTION .....		265
9.1.1	CATTLE PRODUCTION: Total Number of Households Rearing Cattle by District during 2007/08 Agriculture Year .....	266
9.1.2	CATTLE PRODUCTION: Number of Cattle by Type and District as of 1st October 2008 .....	266
9.1.6	CATTLE PRODUCTION: Number of Households rearing cattle, Head of Cattle and Average Head per Household by Herd size During the 2007/08 Agricultural Year .....	267
9.1.7	CATTLE PRODUCTION: Total Number of Cattle by Type and District, 2007/08 Agricultural Year .....	267
9.1.8	CATTLE PRODUCTION: Total Number of Cattle by Type and District, 2007/08 Agricultural Year - .....	267
9.1.11	CATTLE PRODUCTION: Total Number of Improved Dairy Cattle by Category of cattle and District During the 2007/08 Agricultural Year .....	268
9.1.12	CATTLE PRODUCTION: Total Number Households rearing Cattle and Method of Cattle Identification by District during, 2007/08 Agricultural Year .....	268

---

GOAT PRODUCTION .....	269
9.3.1 GOAT PRODUCTION: Number of Agriculture Households Rearing Goats by District during the 2007/08 Agricultural Year .....	270
9.3.6 GOAT PRODUCTION: Total Number of Goats by Category and Type of Goat as of 1st October 2008 - TANGA.....	270
9.3.2 GOAT PRODUCTION: Number of Goats by Type and District as of 1st October 2008.....	271
9.3.9 GOAT PRODUCTION: Total Number of Indigenous Goat by Category and District as of 1st October 2008 .....	271
9.3.10 GOAT PRODUCTION: Number of Improved Goats for Meat by Category and District as of 1st october 2008 .....	272
9.3.10 GOAT PRODUCTION: Number of Improved Goats for Meat by Category and District as of 1st october 2008 .....	272
9.3.11 GOAT PRODUCTION: Number of Improved Dairy Goats by Category and District as of 1st October 2008 .....	273
9.3.12 GOAT PRODUCTION:Milk Production from Goat By Season and District, During the 2007/08 Agricultural Year.....	273
CATTLE MILK .....	274
9.2.1 CATTLE PRODUCTION: Number of Milked Cow by Category of Cattle, Season type and Region, During the 2007/08 Agricultural Year .....	275
9.2.2 CATTLE PRODUCTION: Average milk production per cow per day, by Category of Cow, Season and District, During the 2007/08 Agricultural Year .....	275
9.2.3 CATTLE PRODUCTION: Average number of days for cows on milked, by category of Cattle, Season and District, During the 2007/08 Agricultural Year .....	275
9.2.4 CATTLE PRODUCTION: Average Cattle Milk price (Tshs/litre) per season by category of cow and District, During the 2007/08 Agricultural Year .....	276
9.2.5 CATTLE PRODUCTION: Average Cattle Milk price (Tshs/litre) per season by category of cow and District, During the 2007/08 Agricultural Year .....	276
9.2.5 CATTLE PRODUCTION: Average Cattle Milk price (Tshs/litre) per season by category of cow and District, During the 2007/08 Agricultural Year .....	276
GOAT PRODUCTION .....	277
9.3.1 GOAT PRODUCTION: Number of Agriculture Households Rearing Goats by District during the 2007/08 Agricultural Year .....	278
9.3.2 GOAT PRODUCTION: Number of Goats by Type and District as of 1st October 2008 .....	278

---

9.3.6	GOAT PRODUCTION: Total Number of Goats by Category and Type of Goat as of 1st October 2008 - TANGA.....	278
9.3.9	GOAT PRODUCTION: Total Number of Indigenous Goat by Category and District as of 1st October 2008 .....	279
9.3.10	GOAT PRODUCTION: Number of Improved Goats for Meat by Category and District as of 1st october 2008 .....	279
9.3.10	GOAT PRODUCTION: Number of Improved Goats for Meat by Category and District as of 1st october 2008 .....	279
9.3.11	GOAT PRODUCTION: Number of Improved Dairy Goats by Category and District as of 1st October 2008 .....	280
9.3.12	GOAT PRODUCTION:Milk Production from Goat By Season and District, During the 2007/08 Agricultural Year.....	280
	SHEEP PRODUCTION .....	281
9.4.1	SHEEP PRODUCTION: Number of Households Rearing Sheep by District during the 2007/08 Agriculture Year.....	282
9.4.2	SHEEP PRODUCTION: Number of Sheep by Type and District as of 1st October 2008 .....	282
9.4.3	SHEEP PRODUCTION: Total Number of Indigenous Sheep by Category of Sheep and District as of 1st October 2007/08 Agriculture year.....	282
9.4.3	SHEEP PRODUCTION: Number of Households Rearing Sheep, Head of Sheep and Average Head per Household by Herd size During the 2007/08 Agricultural Year.....	283
9.4.5	SHEEP PRODUCTION: Number of Sheep by Breed as of 1st October 2008 .....	283
	PIG PRODUCTION .....	284
9.5.1	PIG PRODUCTION: Number of Households Raising Pigs by District during 2007/08 Agriculture Year .....	285
9.5.3	PIG PRODUCTION: Number of Households rearing Pig, Head of Pig and AverageHead per Household by Herd size During the 2007/08 Agricultural Year -.....	285
9.5.5	PIG PRODUCTION: Total Number of Pigs by Type of Pigs and District as of 1st October 2008 .....	285
9.5.6	PIG PRODUCTION : Number of Pigs per Household by District as of 1st October 2008 .....	286
	CHICKEN AND OTHER LIVESTOCK .....	287
9.6.1	CHICKEN PRODUCTION: Number of CHICKEN by Type and District as of 1st October 2008 .....	288

9.6.4	CHICKEN PRODUCTION : Number of Households Keeping Chickens and Average Number of Chickens per Household by Flock Size as of 1st October 2008 - TANGA.....	288
9.6.5	CHICKEN PRODUCTION: Number of Other Livestock by Type of livestock and Region as of 1st October 2008.....	288
9.6.6 :	OTHER LIVESTOCK : Total Number of Other Livestock by Type as of 1st October 2008.....	289
	PESTS AND PARASITES.....	290
9.7.1:	PEST AND PARASITES: Number of Livestock Rearing households deworming Livestock by District during 2007/08 Agriculture Year .....	291
9.7.2:	PEST AND PARASITES: Number of Livestock Rearing households that dewormed Livestock by type of livestock and District, 2007/08 Agricultural Year .....	292
9.7.3	PEST AND PARASITES: Number of Livestock Rearing Households Normally Encountering Tick Problems by District during 2007/08 Agriculture Year ...	293
9.7.4	PEST AND PARASITES: Number of Livestock Rearing Households by Method of Tick Control and District during 2007/08 Agriculture Year .....	293
9.7.5	PEST AND PARASITES: Number of Livestock Rearing Households normally Encountering Tsetse Flies Problems by District during 2007/08 Agriculture Year .....	293
9.7. 6	PEST AND PARASITES: Number of Livestock Rearing Households by Method of Tsetse Flies Control and District during 2007/08 Agriculture Year.....	294
9.7.7:	PEST AND PARASITES: Number of Livestock Rearing Households normally Encountering Newcastle Disease Problems by District during 2007/08 Agriculture Year .....	294
9.7.8:	PEST AND PARASITES: Number of Livestock Rearing Households by Method of Newcastle Disease Control and District during 2007/08 Agriculture Year...	294
9.7.9	PEST AND PARASITES: Number of Livestock Rearing Households normally Encountering Fowl Typhoid Disease Problems by District during 2007/08 Agriculture Year .....	295
9.7.10	PEST AND PARASITES: Number of Livestock Rearing Households by Method of Fowltyphoid Disease Control and District during 2007/08 Agriculture Year .....	295
9.7.11	PEST AND PARASITES: Number of Livestock Rearing Households normally Encountering Foot and Mouth Disease Problems by District during 2007/08 Agriculture Year .....	295

9.7.12	PEST AND PARASITES: Number of Livestock Rearing Households normally Encountering Lymphskin Disease Problems by District during 2007/08 Agriculture Year .....	296
	LIVESTOCK EXTENSION.....	297
9.8.1	LIVESTOCK EXTENSION: Number of households receiving extension advice by District during the 2007/08 agriculture year .....	298
9.8.2	LIVESTOCK EXTENSION: Number of Households receiving Livestock advice (overall) By Source of Extension and District during the 2007/08 agriculture year .....	298
9.8.3	LIVESTOCK EXTENSION: Number of Agriculture Households Receiving Advice on Feeds and Proper Feeding by Source and District During 2007/08 agriculture Year .....	299
9.8.4	LIVESTOCK EXTENSION: Number of households receiving extension advice on Proper Livestock Housing by District during the 2007/08 agriculture year .....	299
9.8.5	LIVESTOCK EXTENSION: Number of households receiving extension advice on Proper Milking and Milk Hygiene by District during the 2007/08 agriculture year .....	300
9.8.6	LIVESTOCK EXTENSION: Number of households receiving extension advice on Livestock fattening by District during the 2007/08 agriculture year .....	300
9.8.8	LIVESTOCK EXTENSION: Number of households receiving extension advice on Herd/Flock size and selection by District during the 2007/08 agriculture year .....	301
9.8.9	LIVESTOCK EXTENSION: Number of households receiving extension advice on Pasture Establishment by District during the 2007/08 agriculture year.....	301
9.8.10	LIVESTOCK EXTENSION: Number of households receiving extension advice on Group formation and strengthening by District during the 2007/08 agriculture year .....	302
9.8.11	LIVESTOCK EXTENSION: Number of households receiving extension advice on Calf Rearing by District during the 2007/08 agriculture year.....	302
9.8.12	LIVESTOCK EXTENSION: Number of households receiving extension advice on Use of improved Bulls by District during the 2007/08 agriculture year.....	303
9.8.13	LIVESTOCK EXTENSION: Number of households receiving extension advice on Livestock Feeds processing by District during the 2007/08 agriculture year .....	303

FISH FARMING .....	304
9.9.1 FISH FARMING: Number of Agriculture Households Practising Fish Farming by District during the 2007/08 Agriculture Year .....	305
9.9.2 FISH FARMING: Number of Agriculture Households by System of Fish Farming and District during the 2007/08 Agriculture Year .....	305
9.9.3 FISH FARMING: Number of Agriculture Households by Source of Fingerling and District during the 2007/08 Agriculture Year .....	305
9.9.4 FISH FARMING: Number of Agriculture Households by Location of Selling Fish and District during the 2007/08 Agriculture Year .....	306
9.9.6 FISH FARMING: Total Number of Stocked Fish by Type and District during 2007/08 agriculture year .....	306
9.9.5 FISH FARMING: Total Number of Fish Harvested, their weight and Quantity Sold by District during 2007/08 agriculture year .....	306
9.9.7 FISH FARMING: Number of Agricultural Households By frequency of stocking of Fingerings in fish ponds and District, 2007/08 Agricultural Year .....	307
9.9.8 FISH FARMING: Number of Agricultural Households By level of care of fish ponds and District, 2007/08 Agricultural Year .....	307
BEE KEEPING .....	308
9.10.1 BEE KEEPING: Number of Agricultural Households involved in Honey Production/Collection and District, 2007/08 Agricultural Year.....	309
9.10.2 BEE KEEPING: Number of Agricultural Households By Honey production/Collection and District , 2007/08 Agricultural Year .....	309
9.10.3 BEE KEEPING: Number of Bee hives by Type, Size of Bees and District during the 2007/08 Agriculture Year.....	310
9.10.5 BEE KEEPING: Average price of Honey (Tshs/litre) by Size of Bees and District during the 2007/08 Agriculture Year.....	310
POVERTY MODULE.....	311
10.1 HOUSEHOLD FACILITIES: Number of households reporting average number of rooms and type of building Materials and District, 2007/08 Agricultural Year .....	312
10.2: HOUSEHOLD FACILITIES: Number of households reporting average number of rooms and type of Floor Materials by District 2007/08 Agricultural Year ....	312
10.3 HOUSEHOLD FACILITIES: Number of households by type of Wall Materials and District, 2007/08 Agricultural Year .....	313
10.4 HOUSEHOLD FACILITIES: Number of Agricultural Households reporting ownership of Assets by District, 2007/08 Agricultural Year.....	313

10.5	HOUSEHOLD FACILITIES: Number of Agricultural Households Reporting Main Source of Energy for Lighting by District, 2007/08 Agricultural Year .....	314
10.14:	HOUSEHOLD FACILITIES: Number of Agriculture Households Distance to Main Source of Drinking Water in wet Season and District during, 2007/08 Agricultural Year .....	315
10.15:	HOUSEHOLD FACILITIES: Number of Agricultural Households Reporting Time Spent to and from Main Source of Drinking Water in wet season and District , 2007/08 Agricultural Year.....	315
10.18:	HOUSEHOLD FACILITIES: Number of Agricultural Households Reporting Time Spent to and from Main Source of Drinking Water in Dry season and District , 2007/08 Agricultural Year .....	316
10.7:	HOUSEHOLD FACILITIES: Number of Agricultural Households Reporting type of TOILET the household normally use by District , 2007/08 Agricultural Year .....	316
10.8:	HOUSEHOLD FACILITIES: Number of Agricultural Households Reporting Number of meals the household normally has per day by District, 2007/08 Agricultural Year .....	317
10.11:	HOUSEHOLD FACILITIES: Number of Agricultural Households Reporting the status of food satisfaction of the household during the Preceeding Year by District, 2007/08 Agricultural Year .....	317

**APPENDIX II: TABLES****2.1.1 TYPE OF AGRICULTURE HOUSEHOLD: Number of Households by type of Household and District during 2007/08 Agriculture year**

District	Rural Households involved in Agriculture	% of Total Rural Households	Rural households NOT involved in Agriculture	% of Total Rural Households	Total Rural Households	% of Total Households	Number of Urban Households	% of Total Households	Total Number of Households
Lushoto	94,075	99.7	252	0.3	94,327	28	7,240	10.71	101,568
Korogwe	56,898	98.6	788	1.4	57,686	17	9,614	14.2	67,300
Muheza	41,779	98.2	747	1.8	42,526	13	28,340	41.9	70,866
Tanga	15,629	85.3	2,695	14.7	18,324	5	43,231	63.9	61,555

*I To be filled by the supervisor ONLY after Field/farm level checking of the enumeration process. This should be countersigned by the Supervisor in front of the enumerator*

*All questionnaires must be checked at the district office.*

*See the back page for details of queries*

## Definition and working page for page 1

### General Definitions

Who is a Smallholder /Small Scale farmer?

Should have one or more of the following: in the 2007/08 farming season had one or more cultivated and planted farms. The farm land may either be owned, rented, borrowed. The farmer may also be raising 1 and 50 head of cattle, and/or between 5 and 100 head of sheep/Goats/Pigs, and/or between 50 and 1000

**Household:** A group of people who occupy the whole of part one or more housing units and makes joint provision for food and/or other household items. Usually such a group comprises a husband, wife, and their children. Other relatives may be members of the household if they happen to live and get food provisions from the same household. People who live together and eat from the same pot may be considered as members of the same household even if they stay in separate dwellings. An individual who lives and eat alone is considered as an independent household.

**Household Head:** A person who is acknowledged by all other members of the household either by virtue of his age or standing in the household as the head. He/she should be a permanent resident of the house and he/she is the main person responsible for decision making regarding use of household resources..

**Agricultural Holding:** This is an economic unit of agricultural production under single management. This unit may have been grown various crops. For the purpose of the survey, the agricultural holdings are restricted to those which meet one of the following conditions:

- Having or operated at least 25 sq meter of arable land
- Own or keep at least one head of cattle or five goats/sheep/five pigs or fifty chicken/ducks/turkeys during the agricultural year 2007/08 (from October 2007 to September 2008).

### Question Specific Definitions:

#### Type of Agriculture holding Codes (Q2.1):

**Crops only:** A holding is referred to be a crop only holding if it has cultivated at least one piece of land. This also applies to all households owning or have kept livestock whose number does not qualify such households to be an agricultural holding (No cattle, less than 5 goats/sheep/pigs, less than 50 chickens/turkeys/rabbits).

**Livestock only:** A holding is referred to be a livestock only holding if it has exercised livestock husbandry only during the 2007/08 agricultural year.

#### NOTE

For agricultural holding only and pastoralist holding only; the number of livestock should be at least one head of cattle, not less than five goats/sheep/pigs, not less than 50 chickens / turkeys / rabbits. This also applies to households having or operated less than 25 sq meter of cultivated land (which does not qualify the household to be considered as agricultural holding) but has the number of livestock that makes the holding qualifies to be considered as livestock holding.

**Pastoralist holding:** This refers to a household which practices livestock production as its major income generating activity and a means of subsistence, but moves from one place to another searching for water and pasture for the livestock. This movement usually involves long distances and in many cases the whole household unit moves with the livestock and they have no permanent place of residence.

**Both crops and livestock:** A holding is referred to be a both crops and livestock if it has cultivated a piece of land equal or exceeding 25 sq meter and if such households have own or kept livestock whose number qualify such household be considered as an agricultural holding.

### Procedures for questions:

#### Q 2.1 Type of agriculture household/holding

Using the options under the question classify the type of agriculture household/holding

**Note:** If the household had an acre of crops and raised 40 chickens during 2007/08, it is classified as 'Crops only' as the number of chickens does not qualify the household as a livestock holding.

Definition and working page for page 2	
<b>Question Specific Definitions:</b>	
<b>Relation to head (Col 2):</b> <b>Household Head:</b> A person who is acknowledged by all other members of the household either by virtue of their age or standing as the household head.	<b>Section 3.0 Note</b>  Make sure that you define the hh proper to ensure that all the members of the hh are included. Ensure that you stress that the hh is not just the hh heads direct family and that it includes other people living and eating together with the family.  If you notice that the hh is large or you see many people around the hh and you have been given a smaller number of the hh members, make further enquiries until you are sure that you have captured all the hh members.
<b>Read and Write (Col 8)</b> <b>Any other language: Must be a written language.</b> For someone who can read and write in Kiswahili and any other language apart from English, the correct code is 1. For one who can read and write in English and any other language apart from Kiswahili the the correct code is 2. Code 4 should only be used for any other language which is not English or Kiswahili.	
<b>Education Level Reached (Col 10):</b> Ask the respondent the highest educational level reached. This aims at establishing whether at the time of enumeration the member of the household is studying has completed or has never studied. Make further enquiry for the level of education reached for those who have completed studies. Establish if the member had attained any training after graduation for the purposes for completing column number 9. For those who still continue attending studies during the period of this survey, establish their learning stage. For instance for a household member who studied up to Standard Three but did not complete his/her education at this level, then his/her highest education level reached is Standard Two. For those indicated under code 3 (not studied) in column 8 should be marked code 99 (Not applicable) in column 9.	<b>Section 3.0 Household information.</b>  ii) For each household member complete columns 1,2,3 and 3 After completing columns 1, 2, 3 and 3 for each household member, go back to the first household member and complete the remaining columns for that member. iii) Repeat step 2 for the rest of the household members.

### Definitions and working page for page 3

#### Definitions for Key Specific Questions

##### Section 4.1 – Land Access/Ownership

These are areas that were used by the households for the 2007/08 farming season

**Lease/Certificate of Ownership:** Area under lease/certificate of ownership refers to the areas which were issued by the government. The household possesses government issued leasehold title or certificate of ownership. The land will normally be officially surveyed and boundaries marked. This includes leased land bought from others where the lease/certificate of ownership has been transferred.

**Customary Law:** This refers to the land which the household does not have an official government but its right of use is granted by the traditional leaders.

**Bought:** This refers to the areas of customary land that has been bought from others. This land does not have an official title and therefore is not leasehold.

**Rented from others:** Land rented from others for cash or for a fixed amount in crop produce (e.g. fixed number of bags at harvest).

**Borrowed:** use granted by land owner free of charge. Land owner can either be a lease holder or has right of access through customary law.

**Share cropping:** where the household is permitted to use land which is then paid for from a percentage of the harvested crop

#### Section 4.2 Land Use

Temporary crops: are sown and harvested during the same agricultural year

Permanent crops: are crops once sown or planted last for some years and need not to be replanted after each annual harvest.

Permanent crops /mixed crops: This is a mixture of permanent and seasonal crops. The two crops can either be randomly planted together or in a particular pattern e; for example intercropping (1 row of maize and 1 row of beans). A field that has been divided into plots for different crops is not mixed).

This is further subdivided into:

Mixture of Permanent crops – two or more permanent crops grown together

Mixture of Permanent and Temporary crops – permanent crop and annual crop together

Mixture of Temporary crops– two or more temporary, annual crops grown together

**Pasture land:** this is an area of owned/allocated land which is set aside for livestock grazing. It can be improved pasture where the farmer has planted grass, applied fertilized or where other means have been applied to improve the pasture. Or it can be natural pasture.

**Natural Bush:** Land which has naturally grown shrubs and trees and is considered productive but is not utilized for farming or livestock production.

### Overview to section 4

#### Overview to section 4

##### Section 4.0: Preliminary note

##### Land Access/Ownership

Land access/ownership refers to the area utilized by the members of the household. This does not include communal land where the resources are shared between household members. It does not include official communal land that the household has sole access to for example a plot for crop farming in the communal area.

### Procedures for questions

#### Section 4.0 – Land Ownership

1. Ask the respondent if he knows the total areas of land the household has sole access to. If he knows make a note in the calculation space
2. Ask the respondent the area of the different land ownership categories the household has sole access to (Q4.1, 1 to 4.1.7) and record in the appropriate spaces.
3. Add up the area of the different categories of land and compare it with the total area obtained in step 1 (if the respondent provided the information)
4. If the total area is different find out which one is correct and make

#### Section 4.2: Land Use

1. Ask the respondent the area of the different land use categories the household has sole access to (Q4.2.1 to 4.2.12) and record in the appropriate spaces.
2. Add up the area of the different categories of land and compare it with the total area obtained in section 4.0. The total area should be the same.
3. If the total area is different find out which one is correct and make amendments where appropriate.

4.0 LAND ACCESS/OWNERSHIP/TENURE		Identification <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/>

02	Oca
03	Radish
01	Green Beans
04	Bizari

**Crop Codes Legumes and Oil**

Code	Crop
31	Beans
32	Cowpeas
33	Green Gram
34	Chick Peas
35	Dengu
36	Bambara nuts
37	Njegere
41	Sun flower
42	Simsim
43	Ground uts
47	Soya beans
48	Caster Seed

**Instructions for calculating the area of mixed crops in a mixture**

**A.** If the mixed crop is mixed annual ly only enter the total area of the field in the remaining area under temporary Crop and go to step one of these instructions.

**B.** If the mixed crop is mixed permanent and annual try to work tyhe percent age taken by the different crops and calculate the area of annual crops outlined in step 1. Otherwise use the number of trees method to calculate the area of annula crops in the mix.

**C:** Number of trees method to calculate annual crop areas in a permanent-annual crop mix.:

- List each of the permanent crop in column b and enter the ground area per acre for each permanent crop ( from instrctions for page 8) in column d.
- Enter the number of permanent trees in the mix in column e as will be provided to you by the respondent
- Calculate the area occpied by each crop by multiplying column d and collumn e and sum up these to obatin the total area of permanent crops in the mix.
- To obatin the area for temporary crops , subtract (-) the area fro permanent crops from thne total area of crop mix and enter the result in in the total area under temporary crops.
- Proceed to step 1 to calculate the area under each temporary crop.

**1.** Enter the name of each temporary crop in tyhe crop mix and estimate percentages of each crop.

**2. Using the percentage for each crop, calculate the are for each crop from the remaining area under temporary crop.**

**3.** After completing the excrise for all the fields, sum the area of each crop in tyhe mix plus any monocrops and uenter the totals in section 5.1.1 Collumn 3.

**4. Once the quantity harvested is obtained , cakiculate the yields (metric tonnes/acre) and compare the figures with the norms given in the crops code box. If there is significantly difference, check the area and the amount harvested..**

[illegible]

## Definitions and working page for page 5

**Storage (Col. 30, Q 5.1.1):**

- **Traditionally Made structures:** The design of storage structures villagers have inherited from forefathers .
- **Improved Traditionally made structures:** The design of traditional storages structures improved through modern technology.

**Marketing Challenges Q 5.1.1 Col. 33:**

- **Farmers' Association:** Village farmers who came together and started an association for the purposes of purchasing inputs/selling/storage of crops aiming at fetching better prices.
- **Cooperative Union:** A large inter-village/community set up in the district/ region or at national level for providing inputs, markets and storage of farmers' crops.
- **Government Regulatory laws for crops marketing:** Government instituted laws for regulating transportation and selling of crops.

**Inputs (Q 5.1.1)**

- Farm Yard Manure:** An organics fertiliser made on farm from animal dung. .
- Compost:** An organic fertiliser made on farm from decomposed plant materials.
- Insecticides:** This is the chemical used in protecting plants or killing pests.
- Fungicides:** Protects plants from fungi attack.
- Herbicide:** Chemicals used to control or kills weeds.
- Improved seeds:** Scientifically attested to be suitable for agricultural use.

## Questions specific definitions

**Q 5.1.1. Instructions on crops storage:**

1. For the listed crops establish whether or not the household stored crops for 2007/2008 agricultural season.
2. For the listed crops give explanations on storage.

**Crops storage is keeping/reserving crops in a container or a special place for future use.**

**Q 5.1.1 Col 31**

1. For each of crops listed indicate major marketing problems for 2007/2008 agricultural season.

**Working area/calculation space**

**Definitions and working page for page 6**

**Temporary/Annual Crops**  
Crops planted and harvested within 12 months after which time the plants die. Most annual crops are planted and harvested on a seasonal base.

**Cash crop codes:**  
Code Crop  
50 Cotton  
51 Tobacco  
53 Payrethrum  
62 Jute  
19 Seaweed

**Crop Codes(Cereal / Tubers/ Roots):**  
Code Crop  
11 Maize  
12 Paddy  
13 Sorghum  
14 Buirush Millet  
15 Finger Millet  
16 Wheat  
17 Barley  
22 Sweet Potatoes  
23 Irish Potatoes  
24 Yams  
25 Cocoyams  
26 Onions  
27 Ginger

**Vegetable Codes:**  
Code Crop  
86 Cabbage  
87 Tomatoes  
88 Spinach  
89 Carrot  
90 Chillies  
91 Amaranths  
92 Pumpkin  
93 Cucumber  
94 Egg plant  
95 Water melon  
96 Cauliflower  
06 Melloon  
05 nyanyachungu  
02 Oca  
03 Radish  
01 Green Beans  
04 Bizar

**Crop Codes Legumes and Oil Code Crop**  
31 Beans  
32 Cowpeas  
33 Green Gram  
34 Chick Peas  
35 Dengu  
36 Bambara nuts  
37 Njigere  
41 Sun flower  
42 Simsim  
43 Ground uts  
47 Soya beans  
48 Caster Seed

**Instructions for calculating the area of mixed crops in a mixture**

**A.** If the mixed crop is mixed annual ly only enter the total area of the field in the remaining area under temporary Crop and go to step one of these instructions

**B.** If the mixed crop is mixed permanent and annual try to work tyhe percent age taken by the different crops and calcaulet the area of annual crops outlined in step 1. Otherwise use the number of trees method to calculate the area of annula crops in the mix.

**C:** Number of trees method to calculate annual crop areas in a permanent-annual crop mix.:

(i) List each of tyhe permanent crop in column b and enter the ground area per acre for each permanent crop (from instructions for page 8) in column d.

(ii) Enter the number of permanent trees in the mix in column e as will be provided to you by the respondent.

(iii) Calculate the area occpyed by each crop by multiplying column d and collumn e and sum up these to obatin the total area of permanent crops in the mix.

(iv) To obatin the area for temporary crops , subtract (-) the area fro permanent crops from thne total area of crop mix and enter the result in in the total area under temporary crops.

(v) Proceed to step 1 to calculate the area under each temporary crop.

**1.** Enter the name of each temporary crop in tyhe crop mix and estimate percentages of each crop.

**2. Using the percentage for each crop, calculate the are for each crop from the remaining area under temporary crop.**

**3.** After completing the exrcise for all the fields, sum the area of each crop in tyhe mix plus any monocrops and uenter the totals in section 5.1.1 Column 3.

**4. Once the quantity harvested is obtained , calcluate the yields (metric tonnes/acre) and compare the figures with the norms given in the crops code box. If there is significantly differntce, check the area and the amount harvested..**

[illegible]

## Definitions and working page for page 7

**Storage (Col. 30, Q 5.2.1):**

- **Traditionally Made structures:** The design of storage structures villagers have inherited from forefathers .
- **Improved Traditionally made structures:** The design of traditional storages structures improved through modern technology.

**Marketing Challenges Q 5.2.1 Col. 33:**

- **Farmers' Association:** Village farmers who came together and started an association for the purposes of purchasing inputs/selling/storage of crops aiming at fetching better prices.
- **Cooperative Union:** A large inter-village/community set up in the district/ region or at national level for providing inputs, markets and storage of farmers' crops.
- **Government Regulatory laws for crops marketing:** Government instituted laws for regulating transportation and selling of crops.

**Inputs (Q 5.2.1)**

- Farm Yard Manure:** An organics fertiliser made on farm from animal dung. .
- Compost:** An organic fertiliser made on farm from decomposed plant materials.
- Insecticides:** This is the chemical used in protecting plants or killing pests.
- Fungicides:** Protects plants from fungi attack.
- Herbicide:** Chemicals used to control or kills weeds.
- Improved seeds:** Scientifically attested to be suitable for agricultural use.

## Questions specific definitions

**Q 5.2.1. Instructions on crops storage:**

1. For the listed crops establish whether or not the household stored crops for 2007/2008 agricultural season.
2. For the listed crops give explanations on storage.

**Crops storage is keeping/reserving crops in a container or a special place for future use.**

**Q 5.2.1 Col 33**

1. For each of crops listed indicate major marketing problems for 2007/2008 agricultural season.

**Working area/calculation space**

## Definitions and working page for page 9

**Storage (Col. 33, Q 5.3.1):**

- **Traditionally Made structures:** The design of storage structures villagers have inherited from forefathers .
- **Improved Traditionally made structures:** The design of traditional storagesrutures improved through modern technology.

**Marketing Challenges Q 5.3.1 Col. 35:**

- **Farmers' Association:** Village farmers who came together and started an association for the puporses of purchasing inputs/selling/storage of crops aiming at fetching better prices.
- **Cooperative Union:** A large inter-village/community set up in the district/ region or at national level for providing inputs, markets and storage of farmers' crops.
- **Government Regulatory laws for crops marketing:** Government instituted laws for regulating transportation and selling of crops.

**Inputs (Q 5.3.1)**

- Farm Yard Manure:** An organics fertiliser made on farm from animal dung. .
- Compost:** An organic fertiliser made on farm from decomposed plant materials.
- Insecticides:** This is the chemical usde in protecting plants or killing pests.
- Fungicides:** Protects plants from fungi attack.
- Herbicide:** Chemicals used to control or kills weeds.
- Improved seeds:** Scientifically attested to be suitable for agricultural use.

## Questions specific definitions

**Q 5.3.1. Instructions on crops storage:**

1. For the listed crops establish whether or not the household stored crops for 2007/2008 agricultural season.
2. For the listed crops give explanations on storage.

**Q 5.3.1 Col 35**

1. For each of crops listed indicate major marketing problems for 2007/2008 agricultural season.

**Working area/calculation space**

**Definitions and working page for page 10**
**Investment in agriculture**
**Investment activities:**

Investment activities refer to medium to long term farm development structures and projects. This can be irrigation structures, erosion control and water harvesting structures or other permanent or semi-permanent investment made on the land that the household owns.

**Irrigated farming: Section 6.5:**

**Source of irrigation water** (Col 1): The main source of the water used for irrigation.

**Method of obtaining water** (Col 2): The mechanism by which the water is extracted from the source

**Irrigatable area** (Col 3): The area the irrigation system is designed to cover in acreage

Area of irrigated land during the 2007/08 (Col 5): Area of land under irrigation during the 2007/08 agricultural year. This is the actual area and NOT the cumulative areas recultivated in 2 or more cropping seasons.

**Farm Implements (Col. 1):**

**Machette** : Include all implements use in tree cutting namely cicle, etc.

**Sprinkler**: The pump carried on the back or a hand used water pump

**Hand used small tractor**: A small tractor used in cultivation while the user walks on foot (see photo).

**Section 6.2 Use of draft animals**

Animals used in agricultural activities by the household during 2007/08 agricultural season.

**Castrated Bulls**: Castrated oxen meant for use in agricultural production.  
**Uncastrated Bulls**: mature bulls used for garicultrural activities but are not castrated.

**Cow**: Farmers also use mature female cattle in agricultural activities due to shortage of bulls

**Donkey**: Mature Male or female donekys are also used for agricultural production.

**Q 6.5 Irrigation.**

1. If a household uses irrigated farming give explanations aon source and method of obatinig water. .

2. **See Col 10**, Q. 5.1.1 and 5.2.1 and **Col 12**, Q 5.3.1 to see if irrigation was applied to any crop.

**Farm implements, Q 6.1:**

1. Column 2 Indicate whether or not inputs were used

2. Complete collumn 3 by entering the number of inputs used.

**Farm inputs: Sections 6.3 and 6.4**

1. Column 2 Indicate whether or not inputs were used.

2. Compelte collumn 3 by indicating where the inouts were obatined and collumn 4 by indicating the distance from where the inputs were obatined

**Compost**: An organic fertiliser made on farm from decomposed plant materials.

**Insecticides**: This is the chemical usde in protecting plants or killing pests.

**Fungicides**: Protects plants from fungi attack.

**Herbicide**: Chemicals used to control or kills weeds.

**Improved seeds**: Scientifically attested to be suitable for agricultural use.

## Definitions and working page for page 11

## Q 6.6

**The type of erosion control/Water harvesting (Col 1)**

**Terraces:** Structures constructed on mountain slopes to provide flat terrain for crop planting.

**Erosion control bunds:** these are bunks of earth/stones built perpendicular to the slope to slow down the speed of water and thus preventing soil erosion. Its differs from terraces in that the soils on these banks are not at ground level .

**Gabions:** A box like structure made of wire and filled with large stones to prevent gully erosion.

**Sand bags:** Are used in controlling and preventing gully erosion  
**Tree belt/wind breaks:** Trees planted against the wind direction for breaking wind speed..

**Section 7.0 Acces to credit for crop or livestock production**

Credit refers to something provided in cash or in kind (such as farm inputs, machines, livestock and other things) for crop or livestock production. The value of the credit must be repaid back to the lender. An Interest may or may not be attached to the value of the credit

The credit may be repaid either in cash or through farm produce to be harvested .

In this question the enumerator is at liberty to inquire up to three sources of credit where the farmer accessed credit from more than one source.

**Section 8.0 Agricultural Extension Services**

**Agricultural Extension Services:** Refers to educational services provided to farmers by extension officers for the purposes of increasing crop and livestock production.

**Share-cropping:** Refers to farming where smallholder / Smallscale farmer enters into an agreement with large scale farmer where the former sells produce to the latter in exchange of provisions of farm inputs and the like. .

**Contract farming Farming:** Farming agreement entered between smallscale and large scale farmers with regards to markets of farm produce and provision of farm inputs

**Q 6.6 Number of water harvesting structures and year of construction**

1. The number water harvesting structures refers to the number of working / maintained structures and does not include derelict or irreparable structures.

2. Year of construction refers to the year in which the structures were built, and not the year the structures were last repaired. The year should be written in figures e.g. 1998, 2006.

**Section 7.0 Source of agriculture credit**

If the farmer obtained credit from more than one source the use the code from the list provided. Start with the main source of credit in Section "7.1.1".a

**Section 8.0 Agricultural extension services**

1. Ask if the household did receive agricultural extension services during 2007/08 agricultural season from the respondents listed in column 1, then enter column 2.

2. Complete all columns for every extension officer.

6.6 SOIL EROSION

## Definitions and working page for page 12

**Q 9.1 and 9.3 :** What is required is to establish whether or not the household kept or raised the listed livestock during 2007/08 agricultural season (i.e. from October 2007 to September 2008). Also to establish the number of livestock as of 1st October 2008

**Keeping or raising livestock** is to to keep livestock at home while providing the livestock with animal feeds and medication and other services. The livestock could be owned by the farmer or kept on behalf of relatives or neighbours .

**Sections 9.1.1 to 9.1.7 Cattle****Note:**

**Q 9.1 is for the actual number of cattle owned or kept by the household (as of 1st October 2008). This number does not include herds of cattle kept on behalf by relatives or neighbours; that is, the cattle outside the residential area of the household under survey.**

1. If the the household keep mature fecund female cattle, it is expected that such a household will have calves which will be entered in question 9.1.6 or 9.1.7

**Type of cattle (section 9.1.1 to 9.1.7)**

**Bull:** Mature uncastrated male cattle used for breeding

**Cow:** Mature female cattle that has given birth at least once

**Ox:** Castrated male cattle used for farm work

**Steer:** Castrated male cattle used for meat

**Heifer:** Female cattle of 1 year up to the first calving

**Section 9.3 Goat****Note:**

**Question 9.3 is for the actual number of owned or raised by the household (as of 1st October 2008) This number does not include goats kept on behalf by relatives or neighbours, that is the goat outside the residential area of the household under survey.**

1. If the household has she goats, you would normally expect them to have kids

**Type of Goat (Qs 9.3.1 to 9.3.5)**

**Billy Goat (he-goat):** Mature Uncastrated male goat used for breeding

**Castrated goat:** Male goat that has been castrated

**She Goat:** Mature female goat over 9 months of age

9.0	<b>LIVESTOCK (LIVESTOCK AND FISH)</b>

NOTE: If answers to Qs 9.1 to 9.6 is No (THAT IS THE HOUSEHOLD DOES NOT RAISE LIVESTOCK,) Proceed to q.9.9

## Definitions and working page for page 15

## General definitions

**Fish farming:** Refers to the rearing/production of fish. It is different from fishing in that in fish farming the fish have to be reared. While in fishing, fishing nets or traps are used to catch fish from rivers, lakes and the sea; thus fishing should not be included in this section

I

## Question Specific Definitions (Q 9.9 )

Production unit number (Col 1): A production unit is a pond river/lake which is treated as a separate entity for the production of fish eg it may be by virtue of manageable size, maturity of fish, type of fish etc. eg. a farmer may have 3 fish ponds (each one is a separate production unit).

Frequency of stocking (Col . 5): What is the number of time the farmer puts new fingerlings into the pond each year.

Fingerlings: These are young immature fish used for stocking ponds.

**Sols: (Col 10 & 11)**

If no fish were sold enter "0" in column 10 and 11`

## Fish sold (Col.12)

Kama hakuna samaki waliouzwa jaza "0" katika safuwima 12

## Working space for page 15

 23 Pests and diseases  
 24 Advice from Local government  
 25 Long dry spells  
 26 Conflicts between livetsock keepera and pastoralists

**Definitions and working page for page 16****10.0 Household poverty indicators****Number of rooms used for sleeping in the household (Q 10.1.4)**

Include sitting room, dining room, kitchen, etc if used for sleeping.

It also includes rooms outside the main dwelling

A room is defined as a space which is separate from the rest of the building by a permanent wall or division. A building / house that is not divided into rooms is considered to have one room.

**Household assets (Q 10.2):**

These assets must be functional. Do not include if broken.

**Access to drinking water (Q 10.4):**

If there is more than one source use the one, which the hh uses most frequently.

**Main source of hh cash income:(Q 10.7:**

Activity that provides the hh with the most cash during 2007/08 agricultural season.

*Tanga Region Agriculture Sample Census – 2007/08*

Average/maximum yields per area											
Use this table to compare the yields calculated in Sections 5.1, 5.2 and 5.3.											
These stats are strictly to be used as a guide for the purpose of assisting to get the correct area and yields for each crop.

## Definitions and working page for page 3

## Question Specific Definitions:

Obtain answers to the following questions from the meeting between the enumerator and influential farmers in the village. Influential people can be Village Chairman, Village Government Executive Officer, Councillor, Ward Chairman, Extension Officer in the village or any other person in the village and who is well informed about village matters. It is important to not that these questions must be asked in groups (of more than one people) to obtain answers discussed and approved by many people.

## Definitions of some specific terms

## Access to community resources. Section 1.0

**Community Resources:** Resources in which the hh members have no individual claim to and which are shared together by all the village

**Community Land:** The area officiall demarcated by the village as shared/public land.

**Squatting farmers Land:** Communal land where individual hhs make sole claim to (for crop farming or fenced livestock) without official rights to ownership.

**Available remaining Land:** Official area of communal land minus areas of squatting farmers.

**Government Land Reserve:** Area set aside by the government as national reserve

## Community tree planting scheme(Section 14.3)

**Community Forest:** A forest planted on the communal land which is planted, replanted or spt planted by the members of the village.

**Plant Planting:** An area designated by the village for planting a block of trees.

**Spot Planted:** Replanting an area where selective logging has been carried out. A tree is planted to replace the one that has been cut.

**Indigeous Trees:** Trees that are native to Tanzania

**Exotic Trees:** Trees that are not native to Tanzania

**Non Government Organisation:** Is managed by people from outside the village and it normally covers more than one village/District/R region. Its function is to provide deveoopment assistance to the farmer and is free from direct government links.

**Village level organization:** is managed by members of the village. Its purpose is normally to access/provide development assistance to the village

## ACCESS TO COMMUNAL RESOURCES

1 ACCESS TO COMMUNITY RESOURCES									
1.1 Does the village set aside an area for communal resources e.g. forest, grazing, etc. (Yes=1 No=2) <input type="checkbox"/>									
(If the answer is no proceed to 1.2)									
Area of Community, Village, Ward resources					Area in acre				
1.1.1	Total area of communal land				Official figures from the leader				
1.1.2	Area of squatting farmers in communal land				Key informant (Leader/Extension officer etc.)				
1.1.3	Remaining available communal land				Key informant (Leader/Extension officer etc.)				
1.1.4	Government reserve land				Key informant (Leader/Extension officer etc.)				
1.2 UPATIKANAJI NA MATUMIZI YA MALIASILI ZA JUMUIYA/KIJIJI/SHEHIA									
Community Resources		Distance from the resource in Km -season			Main Use		Instructions on distance from the resource (Cols 2 and 3): Distance is estimated from the centre of the village. If under 1 km 1, enter 0 If above 1 km 1 enter whole number, eg. 1.5km= 2km, 1.25km= 1km		
		Dry (2)		Rainy (3)					
1.2.1	Water for human consumption								
1.2.2	Water for livestock								
1.2.3	Communal grazing land								
1.2.4	Communal firewood								
1.2.5	Wood for charcoal burning								
1.2.6	Wood for building poles								
1.2.7	Forest for bee keeping (honey)								
1.2.8	Hunting								
1.2.9	Fishing								
2.0 COMMUNITY PLANTED TREES									
2.1 Did your village have community planted trees during 2007/08 agriculture year? (Yes=1, No=2) <input type="checkbox"/>									
(If the answer is no proceed to Section 3.0)									
Details of the community tree planting scheme									
No.	Distance from the community forest	Forest Area (acre)	Type of Planting	Type of Trees	Source of seeds/ Seedlings	Number of Years since the start of planting	Main uses 2007/08 agriculture year	Main uses of communal forest products	
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	
2.2									
Type of planting (Col. 3): Plantation planting.....1 Spot planting.....2		Source of seedlings (Col. 5): Seeds collection and planting.....1 Village Nursery.....2 Department of Forestry.....3 Private Individuals.....4			Main Uses (Col. 7): Poles .....1 Wood .....2 Charcoal .....3 Firewood .....4 Other / Specific .....8		Main use of revenue (Col. 8): Village development fund.1 Household use.....2 Household income.....3		
3.0 Non governmental Organisation (NGOs) Contact									
3.1 Did any NGO visit the village during 2007/08 agriculture year? (Yes=1, No=2) (If no proceed to Section 4) <input type="checkbox"/>									
Na.	Type of NGO	Visited Y=1, N=2	Number of visits	Distance to the Office (km)	4.0 Community Based Organisation				
3.2	Extension/ Research				4.1 Did the village have any CBO during the 2007/08 agriculture year? (Yes=1, No=2) <input type="checkbox"/>				
3.3	Service /Input provision				4.2 Type of CBO Nd=1, Hap=2				
3.4	Community Development				4.3 Extension/ Research				
3.5	Other				4.4 Service /Input provision				
					4.5 Community Development				
					4.6 Other				
5.1 Did the village have Field farm schools during 2007/08, agriculture year? (Yes=1, No=2) <input type="checkbox"/>					5.2 Did the village participate in any research on crops/ improved livestock during in the village during 2007/08 agriculture year? (Yes=1, No=2) <input type="checkbox"/>				
5.3 Did the village have local ironsmiths during 2007/08 agriculture year? (Yes=1, No=2) (If the answer is 2 proceed to q. 5.5) <input type="checkbox"/>					5.4 Did the village have any training centres on draft animals during 2007/08 agriculture year? (Yes=1, No=2) If number 2 is the answer conclude the enumeration. <input type="checkbox"/>				
5.4 Number of local ironsmiths					5.6 Number of training centres for draft animals				

**Procedure:** Administer this from after completing all smallholder questionnaires for the village.

1. Copy the name of all crops from Sections 5.1, 5.2 and 5.3 grown in the village from smallholder questionnaires. This should also include livestock raised by the household from questions 9.1, 9.3, 9.4 and 9.5 and enter them in col na 1 of this form. Also see codes for livestock below.
2. Enter price estimates per kg in col 5 and 6.
